What we mean is this: We take it off ice in our huge basement refrigerators and we put it on ice in the trig little wagon refrigerator (every business, and every body Bennett wagen has one), and it comes to knows it. your home JUST PERFECT. The rest is up to you. See?

DON'T YOU NEED A REFRIGERA-TOR? No good housekeeper would think of attempting to get along without one. They're not necessarily expensive. Shape, style, ornament, finish and size are only matters of taste. They affect the price, of course, but not the efficiency.

The two leading features in a good refrigerator are ICE PROTECTION and AN INTERIOR ARRANGEMENT that insures A UNIFORM LOW TEMPERA-TURE AND DRY AIR, so that the food may be thoroughly preserved.

Eddy, head of the Christian Science church, advising her followers against alliance with any organisation which does not admit both sexes to membership on equal terms is being loyally obeyed by Christian Scientists in New York.

The edict, which was published about the middle of May in the Christian Science Sentinel, reads: "The members of the mother church shall not be made members of clubs or erganizations, the Free Masons excepted, which

exclude either sex or are not named in the manual of the mother church. God separates the tares and the wheat and garnen the latter in his storehouses." It was so late in the season when this order was issued that few of the Scien-

tists in clubs thought it worth while to hand in their resignations. They simply will not return to their organizations in The effect will be severely felt, for in almost every club in the city are women

Dr. George L. Miller Contributes in Characteristic Vein to the Amenities of the Campaign.

OMAHA, June 24.—To the Editor of The Bee: The whilom statesman of "the senith city of the unsalted seas," now of Tammany Hall, associate proprietor of flat finance, joint author with the rhetorical organizer of democratic defeat and disaster, of revolutionary proclamations against "government by injunction," and all the rest of the edious stuff, openly says that Mr. Bryan will not insist upon the Kansas City platform at the coming St. Louis cause, in his late irruption in New York word against the great writ of injunction for which the United States constitution so wisely prevides to safeguard the rights and secure the welfare of all the people Not even so much as a mention of anything of the hedge-podge of populism and socialism that is contained in the Kansas great statesman: "Democracy against Piutocracy"—a vague and empty phrase, stamped on every side, and all over, with the trade marks of the political chariatan

This surrender is to the last degree ignoble and disgraceful. After giving support to the man Hearst, more or less openly for nenths, whose inherited money, as Mr. Bryan well knew, was being used to corrupt by actual purchase the young men of the democratic party in every state of own state and everywhere he demanded, with endless iteration and insolent audacity, that the Kansas City platferm should be, would be, and must be, reaffirmed at the coming national conventien. At the recent primaries he came into Omaha with Hearst's money, or his own, turned ward heeler and beat out and sought out the brave young men, his former dupes and supporters, on the sole issue that the Kansas City platform must be endersed in this state and at the national convention. He permitted his printed name to go on the ballow in Omaha certifying that the names on them could be depended upon to support "democratio which he new ignominiously the skirmish line of actual battle.

The truth about our brilliant friend, Mr. never strong. He is simply a rhetorical never did. Borrowing much from John P. silowed counsel until next Wednesday to Jones, Richard P. Bland and Eugene V. file briefs. Debs in 1896, the spectacle he made of kinnelf as a preacher of discontent and as a prophet of evil in that season of calcusty, showed his ignorance and shallowness. Events long since made him ridicaleus in the District of Columbia, was postponed whenever he ventured upon any serious to next Tuesday. question of government. And even at this late day Mr. Bryan and Mr. Towns, and the rest of the dissarded seers and apostles of populism, defend their absurd assessment

on the money question on the ground that ncreased production of gold has brought relief that they sought in 1896 and 1900 by forcing the silver standard on the basis of a 50-cent dollar. Neither Mr. Bryan nor Mr. Towne, nor Mr. Debs, has ever known, and they will probably never learn, that if these financial philosophers and frauds had succeeded in their plots to destroy the public credit and rob the sons of toll of half their possessions, more than \$800,000,000 of gold would have been driven from circulation in the very hour of such a result by the power of the unwritten Gresham law which no human statute can centrol. As General Benjamin Harrison, one of the greatest men this country ever saw, said afterwards, all the mints of the convention. I am disposed to agree with country, running night and day for many Mr. Towne, and all the more readily be- years, could not have coined silver dollars enough to have made good that loss to the

| circulating medium. Mr. Bryan's premature surrer the daviltry of deadly fusion in this state, I quite agree with the senator, but if Bryan has really backed down before reaching the fighting line, no more fusion and therefore no mere Bryan, in the state nor in this country.

Events have made plain to men of sense and judgment the fact that Mr. Bryan City platform. Only one issue, says this as a political leader has neither foresight nor bindsight. He learns nothing from experience. Infatuated with a wild sense of his own inherent greatness, "intoxicated by the exuberance of his own verbosity," as Disraell said of Gladstone, and dassled by a notoriety which he mistakes for fame; rich in mency by immerality in politics, he is as blind as a bat to the consequences of his ewn conduct. But Mr. Bryan hears well. He has a pretty pair of cars. On his late visit to New York he evidently put both of them to the ground, and he caught a the union for his own base uses, in his great sound. It was a thunderous sort of rumble of the lecomotive that is bearing down upon the St. Louis convention with resistless power, and which is certain to grind to powder any man or combination of men that shall dare to stand in the way of the immediate and unconditional restoration of the national democracy of Seymour, Tilden, Hendricks and Thurman
