FARMERS WAIT FOR TOP NOTCH FIGURES

Continued Rains Send July Wheat up to Ninety Cents and Chances Are Good for Loftier Flight.

OMAHA, July 7, 1994.

There was no let up in the grain boom today, and prices bounded still ligher than
yesterday's close. Demand at Umaha is
great, but there were no receipts. Farmers
seemed inclined to hold back their harvested grain stuffs, looking for even better
values, but as a prominent dealer today remarked, the figures have just about reached
the top. Cash grain should bring good
values here, as all houses are in need.

Wenther played the bugaboo for bears
again today, and on excessive and continued rains the July wheat touched 90 cents
at Chicago. Old July went even higher
there. On this market July wheat went to
80 cents and was bid up well, but there
were no sellers whatever. It closed at 87
cents and dealer if

were no seilers whatever. It closed at 87 cents asked.

Trade here was dead. One cash sale reported, but outside of that the deals, if there were any, were of a private nature and small. There were no receipts of grain, and shere is not likely to be any within the next few days.

The rains of the past ten days in the southwest have played havoc with the shorts. The weather map showed more rain during the past twenty-four hours in the Ohlo valley west and southwest. The forecast is for more wet weather. The longs have got the bear by the tail and are pinching him unmercifully. When a holder of July twists bruin's appendix a trifie, the market responds with larger figures. It is clear now that there will be few deliveries of July grain, if any, and shorts will have to settle on contracts.

Kansas City July wheat went up 5 cents and those who have empty bine and bis contracts on the market are badly scared. However, they are holding out the bope that the rain clouds are nearly, if not entirely, exhausted and that bright warm weather is sure to come. In that event their scalps may be saved by a smaller margin than present values would indicate.

In Chicago there was good trading in ate.

In Chicago there was good trading in he cats pit but here there was none.

Reports from Kentucky say farmers there are refusing 90 cents for their wheat and that millers are badly in need and cannot that millers are badly in need and cannot buy at any price.

Higher cables and a strong foreign demand worked in conjunction with the weather conditions in builling the market hers as well as elsewhere. If the Kansas flood situation is not relieved within a day or two, traffic will be congested and the shipment of what little grain has been harvested there will be tied up.

Kansas City says that desiers at Chicago have little idea of the seriousness of the situation in that section and that prices have not responded as they would were the facts realized in their enormity.

E. C. Twambley of Twambley, Son & Coreturned from a trip to Chicago yesterday. "Corn all over Illinois and lows is stunted, he said. 'It is very backward and wet. Looks as though a spell of warm weather, unless it comes immediately, will not be able to prevent heavy losses."

Reaction Occurs from the Activity of Past Few Days.

RUMORS OF FLOODS CAUSE SOME ALARM

United States Steel Comparatively Firmer Than General List-Railroad Stocks Also Figure in the List.

NEW YORK. July 7.—Today's stock market was reactionary again and there was very obvious and very heavy liquidation to take profits on the advance of the last two days. The reaction was only partly effective in the early dealings and the market was protected by bidding up of special stocks here and there, but this policy became less effective as the day advanced and the reaction became general. Wall street is traditionally suspicious of crop scares at this time of the year, but much more effect was produced on speculative sentiment today by the persistent strength in wheat than was the case resterday. Some alarming rumors were circulated of damage by rain and floods in the southwest. The weather map was pronounced very unfavorable. The cotion market shared to some extent in this.

The political news of the day was not different from that of yesterday, thus giving a rather forced construction to the view that yesterday's rise in prices was due to that cause. United States Steel was comparatively firmer than the general list, which was attributed to the reaffirmation of prices of first products by the pools. The local tractions proved an effective support for the early market during the most active period of profit-taking saies. In view of the profit-taking nature of the day's selling, the largest declines are not only found in those stocks which were most conspicuous in the buying movement, especially Union Pacific, St. Paul and Pennsylvania, but pretty much all the active stocks in the market figure in the list of 1 to 44 points loss. The closing was irregular and near the lowest of the day. Bonds were irregular. Total sales, par value, \$2.500,000. United States bonds were unchanged on call.
