GLASGOW, July 16 .- (Special Cablegram' again." to The Bee.)-This week Glasgow was again ringing with the fame of the collier surgeon, William Ras. Many voices in numerous dialects proclaimed his wonderful cures. Many remarkable scenes were wit- the reading by sitting in a very large chair and who took an active part in the buildnessed. Patients supported on crutches and quietly telling the audience about her ing of the Transsiberian railway, declared and sticks limped painfully up to the house, received their treatment and emerged triumphantly, discarding in many cases the club-soled shoes, irons and other aids to balance with which they had entered.

An elderly woman who had not walked for some time owing to trouble with her ankles, was able to traverse the road back to the station. A factory hand from Lancashire, who for eighteen months was unable to work through hip trouble, struggled slowly in with the aid of two sticks. One was enough when he left the cottage, three or four minutes attention having put him right. That was an exceptionally quick cure, but none of the cases seemed to take long, and every half hour saw two or three patients come into view, improved if not always cured.

PARIS, July 16 .- (Special Cablegram to The Bee.)-An interesting discovery of an board, has just been made at Havre during

dredging operations for a new channel about 100 yards beyond the jetty. The dredger brought up two human skeletons and a seaman's boot of old-fashioned pattern. A diver was sent down and discovered the remains of a frigate of apparently about 500 tons burden, which had evi-

dently gone down during a sea fight, several of the old guns being still loaded. Numerous flint-lock muskets were also found on board and cannon balls, coupled together by chains, in pairs. Some coils of rupe were still in position, but fell to pieces on being touched. On proceeding to the

lower dack the diver made the gruesome

discovery of several human skeletons, being evidently those of the crew who went down with their vessel. Already six cannon, ten feet long, made of east iron, have been brought to the surface, and it is hoped that many more curious relics will be rescued before old ship is blown up with dynamite, as it

Assuming that the supplies from Eastern Siberia were forwarded to Harbin by the Shilka, the Amur, and the Sungari, it would still be necessary to send fourteen or fifteen trains to Harbin daily with provisions, ammunition, rallway material, etc. This would make twenty-eight to thirty running both ways, and M. Novel School Will Be Started In New York City This Fall.

(Copyright, by New York Herald Co. 1904.) NEW YORK, JULY 16 .- (New York Heraid Service-Special to The Bee.)-Something new in the educational line in this city will be started this fall when a permanent school for social workers will be established with a curriculum the like of which has never been carried out in an American college or university. It will be picturesque and at the same time practical, because dealing with vital social problems and presented by those actually engaged in working at them.

This announcement is the result of a even years' movement to raise the standards of workmanship in philanthropy. Since 1897 workers from all parts of the United States have each summer attended the sessions of the summer school in philanthropical work carried on by the New York Charity Organization society, but there has long been a demand for something more definite and systematic.

As an outcome the permanent school is

to be instituted by the committee on philanthropic education. Edward T. Devine will be the director of the school, and he will have associated with him Mrs. Arma Garlin Spencer, director during the last year of the winter course in philanthropy, and Alexander Johnson, secretary of the National Conference of Charities and Corrections. The course will open October 5. Instructions will include all the principal forms of chariable activity-child-helping agencies, the care of needy families, hospitals and hygiene, the prevention of disease, reformatory methods and probation laws, sanitary housing, preventive social work, immigration problems, the state's charities, the anti-tuberculosis campaign and many more. (Copyright, by New York Herald Co., 1904.) WASHINGTON, July 16 .- (New York Herald Service-Special to The Bes.)-Washington already has its Congressional Limited and other famous trains, but according to present plans for improvements about the capital the Roll Call Limited, the most novel train in the world, is soon to make its appearance. This train will make frequent and rapid trips through an underground passage from the capitol to the two the use of the senators and members of the house, respectively.

On the main basement floor of the building will be the terminal station of an upto-date little electric railroad, with cars equipped for the comfort of the distinguished gentlemen in congress.

With a final warning that all shall be from its station. It will pass through a brilliantly lighted subway under the southeast lawns of the capitol grounds and ing held. within a few seconds will halt in the subassement of the house wing. Here the members will disembark to find themselves within easy acess of the private elevator leading to the floor of the house. The journey will require the briefest possible space of time.

As a counterpart to the house office building congress at the session just closed made provision for the construction of ar office building for the senate. The house building is to be located opposite the southeast corner of the capitol grounds, while the senate building will occupy the corresponding square to the northeast. The senate building will be but a year behind the house building at the most, and when it is completed the subway and electric transportation facilities provided for the house will be duplicated.

PANAMA MAKES IMPROVEMENTS

Much Money Paid by United States Has Already Been Approprinted.

(Copyright, by New York Herald Co., 1904.) WASHINGTON, JULY 16 .- (New York Herald Service-Special to The Bee.)-With creditable promptness and considerable lavishness the new Republic of Panama is proceeding to utilize for public improvements the \$10,000,000 which it received from the United States recently for the Panama canal rights. According to a report from H. A. Gudger, the American consul general at Panama, \$3,250,000 has already been appropriated, \$1,000,000 of which goes to the province of Panama alone.

According to the law appropriating this money, which was passed by the National Assembly on June 6, the plans and specifications for the improvements for which it is to be used must be all filed and the work must be under way by December 31. The work for which the money will be used covers a wide range. The sum is distributed among the various provinces as follows: Province of Panama, \$1,000,000; province of Colon, \$300,000; province of Chiriqui, \$450,000; province of Cocle, \$350,000; province of Los Santos, \$350,000; province of Vera Aguas, \$350,000, and province of Bocas del Toro, \$450,000.

The act gives the president of the repub lic the right to admit free of duty all ma-

terial used in these public improvements. DISCOVER NEW ANAESTHETIC

Men Taken to Plant.

About 10 o'clock twenty-five men from branch houses arrived at the Cudahy plant. These men met in Omaha and with Attorney Tom Creigh as pilot, boarded a special motor train. At A street the car was met by Chief of Police Briggs, who and Henry T. Wickham were named as occupied a front seat. The car was run to Thirty-third and Q streets without any trouble and the branch house men marched in a body to the plant. the first time. Artillery fire was opened by the Japanese on Wednesday, evidently for the purpose of trying to find the position of the Russian batteries, which, understanding the object, did not reply by a single shot. The Japanese after that gave up the advance upon the main road, reverting to their usual tactics of outflanking and thus turning the positions as they did at Kai

The Russ, in a special dispatch from Ta Tche Kiao, says the position is very strongly fortified and the Japanese are not likely to take it unless they can largely outnumber the garrison. It remarks with amusing confidence that the presence there of General Kouropaticin must have had a demoralizing effect upon the Japa-
