Warm Weather Suggests Need of Best Sanitary Conditions Possible.

INSPECTOR INSISTS ON WEED CUTTING

Wild Vegetation in Order to Prevent Breeding Disease-Magte City Gossip.

The warm weather of the last week flas called the attention of the City Health Board to the sanitary condition of back yards and alleys. An inspection of some of the alleys and back yards was made Yesterday by Sanitary Inspector Frank E. Jones, and the result will be the serving of a big ratch of clean-up notices next

"It is surprising," said the inspector 'how people will allow refuse to accumulate when there is no difficulty now in having garbage hauled to the river." The inspector declared that only about one-third of the residents pay any attention to the first notice served. This necessitates a secand and frequently a third call from the inspector before any effort is made to

Weeds are being cut by prisoners in order to prevent disease, and the assertion is made that if there is a general cleaning up now the city may get through the summer without having an epidemic of any

Under the city ordinances the health board has the power to cause the arrest of persons violating orders to clean up, but such action is seldom taken except as a last

Cooperage Works to Close. Manager Welch of the Omaha Cooperage works, located at Thirty-fifth and I streets, declared Saturday he would be compelled to close down his works during the strike.

W. have our works full of barrels now and since the packers closed a portion of sheir plants there has been no demand for our products. There is no use in keeping on working, because we have no place now to store the finished product."

By the closing down of these works about men will be thrown out of employment. Mr. Welch expects to start up again just as soon as there is a deniand for cooperage

Hannon Getting Ready. Up to quitting time yesterday afternoon Contractor Dan Hannon had set 1,415 feet of curbing on Railroad avenue. At the present rate the curbing is being set it will take sixty days to set the curbing, to say nothing of the paving. However, Hanner secured some additional tools yesterday afternoon and stated to the city engineer that he would put on more men on Monday. The city officials are not at all satisfied with the progress of the work and have stated so in unmistakable terms. Funds for the paynent of this curbing and paving are in the bank so the contractor really has no excuse for not pushing the eurbing. Of ourse the double track ralls are to be laid before paving commences. Engineer Beal states that the paving at the county line can be commenced at any time as the car tracks do not extend clear to the line. Chairman Kiewit of the street and alley committee of the council is keeping a close eye on this work and is doing everything he can to hurry the contractor

A NEW PRINCIPLE IN MEDICAL SCIENCE.

For years it has been the practice of med-ical men to treat patients suffering from piles by local, external applications. These treatments give but temporary relief, but have never affected a positive cure.

After months of research and study, accompanied by actual experience with various patients, Dr. C. A. Perrin arrived at a posttive conclusion as to the exact action of the various parts of the bowel system, under different conditions, and when subjected to various prescriptions.

He finally prepared that wonderful inter-nal remedy known as Dz. Persin's Pitz SPECIFIC, which is put up in bottles, retailing at all reliable drug stores for \$1.00 each. This internal remedy has been on the market for the past ten years, and in all of that time there has been but three cases where a positive cure has not been effected.

Dr. Perrin's File Specific is sold under a positive guarantee by the druggist making the sale, to refund the full purchase price, providing the remedy fails to cure. This is the absolute proof of its merit. Any man or woman who suffers from blind, bleeding. itching or internal piles can try this internal remedy with the absolute certainty that it will cost nothing unless it cures. Here is what one sufferer says of this wonderful

Dr. C. A. Perrin, Heleun, Moss.—I wish to thank you for the cure pour wonderful medicine has done for me. I had the piles some five years, and under the advice of a doctor had them removed by the halfe and felt free for awhile, but they returned and I at once not a bottle of your Perrin's Pile Specific and one bottle has entirely curst me, and I am as good as I ever was.

Yours truly,

October 18, 2882.

Retter one a bostle of the Sullivant.

Chicago.

Better get a bottle of your druggist today and get relief from present and future

BRYAN'S LATEST ERUPTION Dr. Miller Agnia Pays His Respects to the Editor of the Commoner.

OMAHA, July 18 .- To the Editor of The Bee: Everybody was glad to have Mr. Bryan revive from the prostration that was clearly caused by that two-thirds vote for Alton B. Parker at the St. Louis convention on the first ballot. He made it plain in the same hour that he fell for support upon the stalwart shoulders of Hon. Constantine J. Smyth, his good friend and mine, that an alarming mistake had been made which attributed the seigure to a threatened pneumonia. The galvanic power of that streak of lightning from Judge Parker to Mr. Sheehan brought Mr. Bryan back to the platform of the convention in a Jiffy, with as finega display of his conceded powers as an actor as an Irving or a Barrett ever achieved on the stage in a condition of simulated inebriety. The correctness of this diagnosis proves that hysteria is not confined to the weaker sex and also that it is never dangerous. If confirmation is wanted by any doubting Thomas. Mr. Bryan's continuous volcanie gruptions since he began his pretended support, but actual opposition, to Alton B. Parker, amply furnishes it. Next to maintaining the political placer mine bearing the name of the Commoner, which brings into his personal pocket \$100,000 a year, the dearest thing on this round earth to the plutocratic heart of William Jennings Bryan is the defeat in November next of Alton B. Parker. Nobody knows better than he that the victory of Parker will be the immediate death of Bryan.

The latest eruption of the Salt river gaveer finds him in St. Louis spouting inherited wisdom by the yard about the democratic platform. This second attempt is meant to repair damages to his own anatemy caused by the first. Perhaps, with that pretty pair of ears on the ground again, he had heard from Mr. Sullivan, the new national committeeman of Chicago, who publicly declares that Mr. Bryan will not be allowed to speak in the campaign filinois because "he would do more harm than good." Mr. Sullivan has evidently taken a very accurate measure of the distinguished Sait river statesman. It may require considerable time for him to and discarded democratic leader, but he wake up later on to find himself on the flat of his back in the mud, wherein, with stone blind infatuation, he chose to make his bed.

I will merely add, as a matter of opinion that the Salt Creek volcano of false pretense and nauseating egotism is wasting his breath in his voluntary volubility about particular declarations in the St. Louis platform. The real platform is embodied in the fine and courageous personality of Alten B. Parker of Esopus, who dealt en's working pants, 60c. Men's cordurey that solar plexus blow at the Hearstnts, tec. All kinds of underwear, 10c. Bryan combination at St. Louis, which GEORGE L. MILLER.

tuest men's suits that are actually worth IN THE GOOD OLD SUMMER TIME What the Oldest Inhabitant and Careful Observer Heard on the Streets.

> The following are a few of the things the Careful Observer and the Oldest Inhabitant heard on their end-of-the-week ramble bout town last evening: "Fine California freestone peaches, only

> 10 cents a dozen." "All the latest songs for 5 cents or a half dime: T've Got My Eyes on You, 'Your Face Seems Familiar to Me, 'I Love You More Than That Other Guy,' and all the comic and popular songs of the day." "Now, friends, we have just got \$1.95. Make it \$2. That's right, \$2.45. Make it

"Is that the east side car?" 'No, ma'm, this is the west side car." "Oh, pshaw! Just like my luck."

"Ding, ding." "Oh, George, come and see these new ress patterns. They are just too lovely for any use. And only 75 cents a yard. I don't see how they can do it for the money Now, George, don't you think--" "I think dear, we had better be getting

long home. You know we left Harry and Maud alone, and told them we would not stay very long, and you know I always do like to keep my word." "Say, it has been hot today. I thought

would suffocate several times, but I didn't. But then you know it is good for the corn and we city folks should not grumble if the heat is excessive so long as the corn is growing. We need the corn, you know. Do you know I think we are going to have a fine corn year this season. And this strike is only settled soon, the Omaha base ball club wins the present series of games, the curfew whistle proves ffective and the Knights of Ak-Bar-Ben get their 2,500 members, then we shall all ejoice and be exceeding glad."

Then the Oldest Inhabitant and the Careful Observer won two cigars on a slot achine and thought it about time to get

DROPS DEAD WHILE AT WORK John Waybright, Pressman at the World-Herald, Succumbs to

Heart Disease. Without a word, John Waybright, ressman in the employ of the Worldderaid, while working Saturday night in the

press room fell over dead. Heart fullure. accentuated by the intense heat, was given as the cause. Jake Reiner, the foreman of the press com, in speaking of the affair, said: "It was all over in a moment. Way-

bright was attending to the machine opstargered and fell to the floor. I went over to him and touched him, arking what was the matter. The police surgeons were ent for and they pronounced him dead." Waybright lived with his sister, Sadie Wayhright, at Sixth and Jackson streets, and was 32 years of age. He was a single man. Coroner Brailey took charge of the remains, and it is expected that the in-

Poor Place Owing to Strong Sentiment Against the Yankees-

MINING ENGINEERS DO WELL THERE

Percy A. Robbins of the De Beers Company Talks About General Business and Mining Conditions.

Percy A. Robbins, consulting mechanical and electrical engineer of the De Beers Consolidated Mines, limited, Kimberley, South Africa, is in the city, the guest of John W. Towle. Speaking of matters pertaining to conditions in South Africa Mr. Robbins said:

"There is great depression in business matters there at the present time. A great many business houses are in very hard straits, and there is little sign of improvement. The depression is due mainly to the late war. Owing to the depression there is comparatively little activity in mining A large number of persons who have what would be good paying properties if they were properly worked, are allowing them in idleness for lack of capital to develop them. Most of these people are heavily involved, and in order to pay the interest on their notes are forced from time to time to relinquish a portion of their stock in the enterprises. This has the effect of constantly and gradually lowering the price of all stocks except those in the active mines which are paying dividends. "There are practicals no resources in the country aside from its mineral wealth. Farming as we know it in this country

Agninst American Goods. There is a strong anti-American feeling in the country which is constantly grow-This feeling is against everything of American manufacture. Even the De Beers company exhibits this feeling, al-

all that can be gotten from the soil.

though it is headed by a general manager. Gardner Williams, who is an American, Of course Mr. Williams cannot change the sentiment of the board of directors. We have two boards of control governing the affairs of the company. One located in Kimberley, which is active, and the other ocafed in London.

"During the last year the De Beers properties produced about \$30,000,000 worth of rough stones, which are all sold to a selling syndicate in London on a fiveyear contract. This syndicate controls the diamond market of the world, for the Kimberley properties produce about 95 per cent of the world's output of diamonds. A small percentage of the output of diamonds is produced by the Practoria mines and some are mined in Brazil, but the great bulk of the stones come from Kimberley. The Brazilian stones ascertain his own position as a discredited are the best in the world, but the supply is limited.

"South Africa at the present time is

ominated by the English. The Boers have gone back to their regular occupation of farming and are minding their own business. There is no personal feeling between the English and Boers engendered by the war, as it was purely a political war and was not brought about by the hatred of one race for the other. "There are about 8,000 Americans, I should say, in South Africa at the present time, but it is a poor place for an American unless he has some occupation secured before he goes there. The country s overrun with mechanics at present, who, owing to the business depression, can secure no employment. Nearly every important engineering position is filled by an American. The American engineer has no difficulty in establishing his superiority over the engineers of other countries, and of course picks up the best positions on

this account. "The war, booms and depression which have repidly succeeded each other in South Africa during the past few years have made times there very exciting and have made it quite interesting to live there.

Sell Their Dinmonds Here. "Sixty per cent of the output of the Kimberley fields finds a market in America, and while general business was poor this country the production of the stones was reduced a great deal, but since prosperity has been restored in the United States the market for diamonds has improved and in consequence the mines have been running to their full capacity. There is no truth in the report that the production is limited to keep the market up. It is impossible to supply the demand for stones at this time and the mines are run-

ning to their full capacity. "The De Beers mines employ about 13,000 natives and 3,500 white men. The white men are artisans and do the mechanical work about the mines, while the natives do the mining proper. The diamonds are found embedded in the rock which is taken out of the mine. They are not extracted immediately from the stone, but it is allowed to lay one year after being taken from the mine to disintegrate. During the time that the disintegration is taking place the stone is spread over a broad expanse of territory and is constantly harrowed and watered. This process hastens the disintegration. It is spread about ten inches in thickness. The sorting of the diamonds from the rock is accomplished by a purely mechanical process. The natives who do the mining simply produce the stone in its rough state. It requires 8,000,000 tons of stone to produce a

ton of diamonds. "The gold mines of the country are not located near the diamond mines, but are 400 miles northeast of the Kimberley fields. The salaries of American engineers in South Africa, I should say, are about the same

as they are in this country." Mr. Robbins left Africa May 1, and arrived in New York June 1. Since landing in this country he has visited the principal eastern cities and is now on his way west. He will visit Denver, Salt Lake City, the Yellowstone park and will then return to his former home in Chicago, from which point he will go to northern Michigan to inspect the Calumet and Hecla copper mine. From there he will go to St. Louis to visit the exposition, from there to England and back to his work in South Africa. He expects to reach Kimberley about November 1.
