# NEBRASKA CROP CONDITION

Past Week Showery, with the Rainfall Abovo, the Normal.

NO GREAT INVERFERENCE WITH HARVEST

Corn Ben Grown Well, but Still Pully Two Weeks Rehind Its Sermal Condition for Time at Xeur.

Weekly bulletin of the Nebraska section of the climate and crop service of the weather bureau for the week suding Mon-

while in a few places it exceeded two inches.

The showers of the past week have not interfered ith all arrivality with harresting. The oats harvest in about sauched in southern counties and is beginning in northern counties and is beginning in northern Rye and barley are about all cut. Haying is in progress, and some into was demanated by rain. Rain retarded threshing in eastern counties, but in central counties some threshing, was some af both wheat and oats will fair to good yields reported. Corn has grown well but the low temperature has prevented any substantial gall in condition, and it is still a week or ten days behind normal sovanezment. The crop, however, in in good, healthy, promising condition.

# THE MEAT QUESTION

The solution of the meat question is simple! This is the time to stop "the ment habit." Physicians all agree that meat overheats the body and creates unnatural conditions. SHREDDED WHEAT-"Nature's best food"-keeps the body cool and gives perfect nourishment and in exactly the proportion demanded by nature. It is the best and most economical food prepared, because, by Government analysis, it "contains all the elements necessary for proper nourishment," and the 1904 Report issued

The Michigan Agricultural College shows that for a given expenditure SHREDDED WHEAT has nearly two and one half times more nutriment than the best sirioin steak-But, think of the difference in cost !
