Bougha County Assessor Challenges Figures of Ballroad Man and Points Out Where He Has 4. Hade Minnhes.

(Continued from First Page.)

In Western Nebraska.

8. Investigation will demonstrate that in ounties like those in western Nebraska, a which lands are very low in value, the verage selling price per acre of such lands a are being sold varies more widely from verage actual value of all the lands than does in counties in which land values re high. If so, the unreliability of averge selling price per acre as the sole test in average value per acre is still further hown.

il.000,000,000.

It The board should at this time equalize the value of lands and lots and of all other property subject to general taxation in Nebraska at the full amount they are convinced it is natually worth. This they should do for the following, among other

mules c a. Because the law requires them to do so, b. Because the state is in need of every ent of revenue for state purposes that can be raised by legal levies based upon a full thieves.

c. Browner this is the fact favorable time, at the beginning of operations under the new revenue law, to place all values as nearly as possible at what they honestly should be.

d. Hecause no other assessment of real estate will be made until 1998, and any faiture of the board at this time to equalize lands and lots at their full actual value will be unjust now and will operate with increasing injustice throughout the four years to come.

The lands now being sold are quite evenly distributed, as to area, among the three classes of lands, the high priced lands, the medium priced lands and the low priced lands. The middle class in Washington and Burt counties comprises lands selling at from \$50 to \$50 per acre, and in Lancaster and Wayne counties those selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. Lands selling at from \$50 to \$50 per acre. in pursuance of the usual custom the convention appointed a committee, of which it honored me with the chairmans ip, to wait upon you and inform you of its action, which duty, speaking for the committee, I now chserfully perform, with the hope and the confident expectation that a majority of the people of the republic will in November next approve the action of the convention by choosing electors who will assure your election to the presidency as your own successor.

fication speech and then mounted the conted. He left the station before his son, chair to deliver his address in response. So cordial a reception was given to him that it was some time before he could pro ceed. He was in excellent voice, and though he followed the printed text of his speech he saidom referred to it. The address was punctuated by applause. The

president said: Mr. Speaker and Gentlemen of the Noti

action of the convention, you represent. I shall, under Frevidence, continue to work with an eye single to the welfare of all our people.

A party is of worth only insofar as it promotes the national interest, and every official, high or low, can serve his party best by rendering to the people the best service of which he is capable. Effective government comes only as the result of the loyal co-operation of many different persons. The members of a legislative majority, the officers in the various departments of the administration, and the legislative and executive branches as to reard each other, must work logether with subordination of self to the common end of successful government. We who have been entrusted with power as public servants during the last seven years of administration and legislation now come before the people content to be induced by our record of achievement. In the years that have gone by we have made the deed equare with the word, and if we are continued in power we shall unawervingly follow out the great lines of public policy which the republican party has already laid down: a public policy to which we are giving, and shall give, a united, and therefore an efficient, support.

More Feriumate Than Oppenents.

More Fortunate Than Opponents.

In all of this we are more fortunate than our opponents, who now appeal for confidence on the ground, which some express and same seek to have confidentially understood, that if triumphant they may be trusted to prove false to every principle which in the last sight years they have laid down as vital, and to leave undisturbed those very acts of the administration because of which they ask that the administration itself be driven from power. Seemingly their present attitude as to their past record is that some of thom were mistaken and others insincers. We make our appeal in a wholly different spirit. We are not constrained to keep silent on any vital question; our policy is continuous, and is the same for all sections and localities. There is nothing experimental about the government we ask the people to continue in power, for our performance in the past, our proved governmental efficiency, is a guarantse as to our promises for the future. Our opponents, either openly or secretly, according to their several temperaments, now ask the people to trust their presunt promises in consideration of the fact that they intend to treat their past promises as null and void. We know our own minds and we have kept of the same mind for a sufficient is highly in the to give to our policy collectude and sanity. In such a fundamental matter as the enforcement of the law we do not have to depend upon promises, but merely to ask that our record be taken as an earnest of what we shall continue to explain why the laws were not enforced, but to fixe to give to our policy collectude and sanity. In such a fundamental matter as the enforcement of the law we do not have to depend upon promises, but merely to ask that our record be taken as an earnest of what we shall continue to explain why the laws were not enforced, but to fyint out that they actually have been encored and that whenever by dilignant investigation a public official can be found who has betrayed his trust he will be fundamented under a rep More Feriunate Than Opponents.

Unwise to Change Good Politics.

Assuredly it is unwise to change the pulleles which have worked so well and which are now working so well. Prosperly has come at home. The national honor and interest have been upheld abroad. We have placed the finances of the nation upon a sound gold basis. We have done this with the aid of many who were formerly our opponents, but who were formerly our opponents, but who would resider openly support for allently acquises in the hereay of unsound finance, and we have done it against the convinced and violent apausition of the mass of our pruent opponents who still ratuse to retant the unsound opinious which for the mement they think it inexpedient to assert. We know what we near when we speak of an honest and stable currency. We mean the same thing from year to year. We do not have to avoid a dednite and come users committed on the most important issue which has recently been before the near future be before them again. Upon the principles which maderic this issue the convictions of half of our number so not claim with those of the other half. So long as the republican party is in power line gold standard is settled, not as a implier of integering political expedicacy, not because of shifting conditions in the production of soid in certain miching centers but in accordance with what we regard as the fundamental prize lies of a petione merestry and wishes, Unwise to Change Good Policies.

have enacted there is now ample circulation for every business need, and every doliar of this circulation is worth a dollar in gold. We have reduced the interest bearing debt and in still larger measure the interest on that debt. All of the war taxes imposed during the Spanish war have been ramoved with a view to relieve the people and to prevent the accumulation of an unnecessary surplus. The result is that hardly ever before have the expenditures and income of the government so closely corresponded. In the fiscal year that has just closed the excess of income over the ordinary expenditures was \$9,00.000. This does not take account of \$0.000,000 expended out of the accumulated surplus for the purchase of the isthmian canal. It is an extraordinary proof of the sound financial condition of the usuin course in such matters and threwing the burden upon posterity by an issue of bonds, we were able to make the payment outright and yet after it to have in the fressury a surplus of \$50,000,000. Moreover, we were able to pay \$50,000,000 out of hand without causing the slightest disturbance to husiness conditions.

of other in the course of internain beyond duese the built to repeal in the course of internal in the course of tion; for otherwise the changes would amount not to readjustment but to repeal. The readjustment when made must maintain and not destroy the protective principle. To the farmer, the merchant, the manufacturer this is vital; but perhaps no other man is so much interested if the wage worker in the maintenance of our present economic system, both as regards the finances and the tariff. The standard of living of our wage workers is higher than that of any other country, and it cannot so remain unless we have a protective tariff which shall siways keep as a minimum a rate of duty sufficient to cover the difference between the labor cost here and abroad. Those who, like our opponents, "denounce protection as a robbery" thereby explicitly commit themselves to the proposition that if they were to ravise the tariff in heed would be paid to the necessity of meeting this difference between the standards of living for wage workers here and in other countries; and therefore on this point their antagonism to our position is fundamental. Here again we ask that their promises and ours be judged by what has been done in the immediate past. We ask that sober and sensible men compare the workings of the present tariff law, and the conditions which obtain under it, with the workings of the preceding tariff law of 1856 helped to bring about.
