T Indicates trace of precipitation L. A. WELSH, Lanal Porecaster. SCROFUL

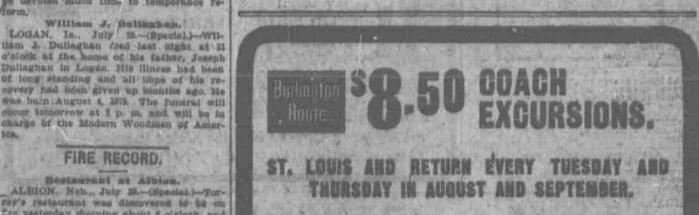

Swollen glands, tamors, white swelling, sores, pustul a or scaly skin eruptions, flabby muscles, brittle bones, weak digestion, emaciated, illy-nourished bodies, are some of the well-known cormaries of Scrofula. Scrofula is inherited. Parents too closely related by the ties of blood, or tainten with consumption or blood peison, may look for signs of Scrofula in their children. The middle-aged often have it, but children are the chief sufferers. Scrofula breaks down

the vital forces, and the blood becomes so weak and poor that it does not nourish the body. The ramedy in all scrofulous affections must be one that puri-fies 'the diseased blood, builds up the weak digestion, incruanes the appetite and gives new en-ergy and strength to all life's forces. No medicine has won as much fame as a blood purifier so much fame as a blood purifier

as S. S. S., and its tonic effects upon the system are not equaled by other remedy. It makes the weak, tainted blood rich and pure, and drives out of the circulation all tuber-SS

cular deposits and morbid matter that cause the glandplar swelling, sores, abacesses, tumors and other horrible symptoms that make Scrotula so dreaded and dangerous. Write us fully about your case. Medical advice will cost you nothing.

THE SWIFT SPECIFIC GO., ATLANTA, GA.

The Burlington's St. Louis Flyer carries the hand. somest of chair cars (seats free); it is the only train from Omaha stopping at Washington avenue, the botel and business district of St. Louis, in addition to the Unionstation; on the return this train leaves St. Louis at the desirable hour of 9:00 p. m.

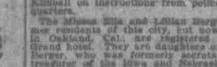

Call on me for special World's Fair folders, for berths, tickets and for any information or assistance inconnection with your trip.
