Alderman Maloney contended that the hose selected was not a first grade article and stated that he had evidence to show that the same article which the city is now asked to pay 90 cents a foot for had been offered by the same firm at St. Joseph for 70 cents a foot, with a discount of 10 per cent. When the committee on fire and light was authorized to act in the matter Alderman Maloney had from the lowest responsible bidder. He contended that the committee had failed to comply with these instructions and moved structions that it comply with its former instructions. This brought on a wordy war between Alderman Maloney and Aldermen Tinley and Weaver, who took exception to he should have been Maloney's statements. The mayor also took a hand. The action of the committee was finally approved, but Mayor Macrae until this morning without solving the stated emphatically that if on investigation he found Alderman Maloney's statements to be true he would certainly refuse to sign the contract on behalf of the city, in which event the city council would have to pass it over his head by a three-fourths vote.
