Up Three Cents a Bushel.

OPENING WEAK, BUT TURN CAME QUICKLY

Omaha About the Only Market to Follow Chienge-Corn and Oats Point Higher -- Commercial and Financial News.

OMAHA, Aug. II, 18%.

Nearly every one expected that the grain markets, and especially wheat values, would open lower this morning, and they were not surprised. The government crop report was expected to be the governing influence for the opening, and it was. The snowing, however, was not considered especially good by the careful students of statistics, and it did not take them long to pick out the salient points—a reduction in the estimated wheat crop of 5,00,000 bushels as compared with the showing of July 1, and a loss in the winter wheat crop of 50,00,000 bushels. More than this, the statement of percentage of wheat crop condition was considerably below the estimates that had been made of the figures that would be shown. Few expected under 50 per cent of a crop from the estimates, and the figures—37 per cent—were below expectations. An effect to any favorable news to be extracted from the report was found in the plethors of rust and hard line stories from the northwest. They were as persistent and as numerous as ever and they do not appear to be coming from bucket shop people, either.

Chicage plainly indicated its position within an hour after the opening, when it took the market right away from the bears and turned it the other way, with sufficient strength and stamina back of the movement to regain all of the carlier loss as well as the declines sustained yesterday after the noon hour.

Kansas City, St. Louis, Minneapolis, Duluth and New York did not foliow Chicago's lead immediately, but they showed a disposition in that direction later on. Omaha followed Chicago immediately. There were quite a number of bids for futures, but few sellers. The quality of the wheat arriving in Omaha is an evidence of poor crops. Much of it is No. 3 and not a little rune to a poor No. 4 and no grade. The berry is small. There is an urgent demand for good wheat, and the better the grade the nigher the prices.

Another interesting liem from the government report is shown in the fact that

her the prices nother interesting item from the gov-ment report is shown in the fact that re are 4.34,000 bushels of cats in farm-hands, as compared with 73.130,000 shels a year ago, a decrease of 31.750,000 bets. bushels a year ago, a decrease of 11,750,000 bushels. The advances were not only sharp, but persistent, and while the outside figures were not maintained, the recessions were unimportant in any grain, and the closing was decidedly strong. The high prices are tempting to farmers, but they also inspire a belief in still higher figures. When No. 3 wheat is selling at 20 and 33 cents in Omaha the farmers and the clevator men appear to be tempting fats in holding for still higher prices. Omaha is divided as to the future, some taking the side of \$1.25 wheat and others predicting a break before long.

gossip of the day are interesting. Jones is unusually silent.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing

Features of the Trading and Closing
Prices on Board of Trade.

CHICAGO, Aug. II.—Wheat prices broke the record for the present crop teday by a soaring of the top. The motive was the government report, which, without taking into account rust damage within tendays, estimated the yield of winter and spring wheat at 47.00.000 bushels, as premised a month ago. At the close Beptember, as compared with yeaterday y linal figures, showed a net gain of Fig. Corn is up ic. Oats are ke up. Provisions vary from 2½c higher to 26 lower.

The wheat market, keyed up to the highest pitch of nervousness, seemed to need enly the official declaration of the deficit indicated by the government report as a cause for a parcaysm of bullishness. Beptember values suffered 151½c under the opening pressure, the first trades being at Swentl. Of The stimulus of the government report became at once apparent, although the culmination of its inducance did not come until the last hour of trading. Successive gains in the price of September were reported, with the demand becoming more and more general as offerings became lisher. When the 11.02 mark had been passed the desire to possess wheat seemed to scise upon all alike. Individuals who had been inclined to bearishness became frantle at this, while others who had sold short appeared to have become nearly panic-stricken. Almost a shear fump to \$1.04½ was the result. September receded to \$1.03½, but closed strong at \$1.03½. Clearances of wheat and flour were equal to \$7.000 bushels. Minneapolis, Duluth and Chicago reported receipts of 285 cars, against \$25 last week and 185 a year ago.

Corn was active and except at the immediate start strong. The opening for September showed a loss of \$600 de at \$250 des cars, against \$25 last week and 180 a year ago.

Corn was active and except at the immediate start strong. The opening for September showed a loss of \$600 des proported receipts of corn were \$200 cars.

Corn was active and declining to \$4500 on the wheat bulge and declining to \$4500 on the wheat

Market Shows Considerable Animation and Strength.

**GOVERNMENT CROP REPORT AN INFLUENCE** 

Frantle Condition of Wheat a Factor Which Tends to Unsettle Market and Counterset Good Effects.

NEW YORK, Aug. 11.—There was a period of great strength and animation in the stock market toony while the first litterpretation of the government crop report was the dominant indicate on sentiment. The conndence with which the buying of stocks was conducted was materially impaired later in the day. The wild upshort of prices in the wheat market was a serious unsettlement to the optimistic views deduced from the favorite crop report. The strength of the corn market also caused grave misgivings. The reactions occause or selling to take profits on the rise was a drag on the market, United States Steel preferred showed a very slight response at times to the strength of the market, and its late drop helped much to unsettle the market. The engagement of gold for shipment to London had rather less than its usual sentiment as an influence against the market, the week's receipt of gold had on account of Japanese and Australian arrivel at San Francisco been fiberal, and the morning's cables reported the shipment of \$1,750,000 on the way from Australia. The movement in Southern Pacific and Union Pacific, and the character of the buying in them, were especially imposing. But the grain and cotton carriers enjoyed a good demand for all sections of the crop region. Northwestern made a special response to the favorable annual report. The rise of a point in Reading was not very effective in helping the other coal and trunk lines, and the industrials which were complication yesterday fell into the background. After the grain markets had closed for the day it was found feasible to rally the stock market, led by Southern Pacific, which rose within a shade of \$5. Some of the grain carriers also recovered to about the poet, but the closing was irregular and at only partial recoveries from the reaction. Bonds were quite active and strong. Total sales, par value, \$3,80,000 United stress old se advanced 1% and the new is coupon in percent of the southern pacific, which rose within a shade of \$5. Some of the south of the percent of the

on the wheat bulge and declining to 54%.

the closing figure. Local revelpts of corn were 279 cars.

Oats, like other grains, opened lower, but also like the others the lowest prices were at the beginning. The later strength was chiefly sympathetic. September closed firm at 34%c. %c under the top, having sold up from 32%c, a loss of 4c at the start. Local receipts were 279 cars.

Frovisions were dull and weak. Heavy receipts of hogs had a depressing effect. September pork at the close was down loc at 111.5. Lard is off 2%c at \$5.70. Rfbs closed 5c lower at \$7.52%.

Estimated receipts for tomorrow: Wheat \$2 cars; corn, 177 cars; cats, 194 cars; hogs, 18.009 head.
