Corn and Outs Firm-Damage Reports Keep Coming-Minneapolis Market soft-Commercial and Financtal News-Statistics.

Uni.Aria. Aug. 18, 1904.
Grain traders were ravored with a great two-sided market tris morning, the opening and the min-merning being decicedly sold on wheat, with ravough avength between times to enable holders of the cereal to get a good price and the longs liquidate at a profit. There were the mean humber of dope messages and they ran the gamue of good and bed news, with rather a preference for the inter. It was a case of the fold story from some paople and better than expected elsewhere. The middle cust got in on the wires this morning with or good and bad news, with rather a prezence for the stater. It was a case on the old story from some pasple and better than expected elsewhere. The middle cest sou in on the wires this morning with pleas for rain as an assistant to a better corn crop. Wheat, however, in its action of the day was influenced more by pursupposition than by anything size—that is, as to future business. The weak spains of the last lew days and the persistent attempts of the big commission houses to make their long knee of wheat set outselfs order to induce more commissions when they get in again—have been effective in inducing the pears to increase their short makes. The fact that weather conditions were generally ideal this morning was an inducement to additional bear raids, when some good buying was noticed, and then some good buying was noticed, and the high of the season the twenty minutes of the season the twenty minutes of the season the twenty minutes of the season the fairly steady close at \$60 net loss on ptember, \$60 net loss on ptember \$60 net season the fairly steady close at \$60 net loss on ptember \$60 net season the fairly steady close at \$60 net loss on ptember \$60 net season the fairly steady close of the day was attended in many rust and other damage stories, poors of exhaustion of huying power in arious markets and uneasiness as to the ourse of trade net season the season the season that may have exhausted buying power had her salt

Pestures of the Trading and Closing

Prices on Board of Trade.

Prices on Board of Trade.

CHICAGO, Aug. Il.—Weakness, induced by continued marketing of wheat which wary traders feared to carry over Bunday, was the latest phase of a nervous market today. The price of September fell in consequence &c from the highest point of the day, closing %6%0 under yesterday's final figures. Corn is down \$40%0; cats finished %0 off; provisions are unchanged to loc higher.

September wheat touched 2%0. The strength was only fleeting, however. The new values proved too tempting to the holders of long lines, to whom the crop damage news has become less terrifying and in the condicting nature of which they scented danger if their holdings were carried over Hunday. A complete reversal of sentiment followed their realising movement and before the market steadled again bentember had loss all of its previous gain and was back at the lowest figure of the opening range, \$1.00. A partial recovery occurred in the last half hour, when the bulls took hold again, September rallying to \$1.00%91.00% at the close. The tone at the finish, however, was weak. Clearances of wheat and fidur were equal to \$71.00 bushels against \$21.400 bushels a year ago. Minneapoils, Duluth and Chicago reported receipts of 37 cars, against 28 last week and 166 a year ago.

Corn was influenced largely by the action of wheat. September opened %60%0 to \$50%0 can market followed the same general trend as wheat and corn. September started a sinde to %c lower at 35% to \$50,000 head. September was at 31%0 to \$50,000 head. September was at 31%0. Local receipts were 353 cars.

Frovisions were quiet and prices showed little change until near the close, when scattered buying by pit shorts and a bearcity of offerings combined to lift prices somewhat. September pork gained for at \$1.50. Lard closed 2%0 higher at \$5.7%. Ribs were unchanged at \$7.55. Estimated receipts for Monday: Wheat, 117 cars; corn. 38 cars; oats, 327 cars; hogs, 55,000 head.

United States Steel is Again the Buoyant Feature.

Trame is Iron and Steel Plays a Large and Important Part in the Day's Traffice.

NEW YORK, Aug. 15—The strength in today's stock market was marked, but was largely in sympathy with the active movement in a few prominent stocks. The most important radiating center was United States Steel preferred, which rose aggressively above 60 on an urgent demand in which an uncovered short interest was believed to play an important part. This stock was influenced by reports that the disputed trade over the price of steel billets had been settled and the danger of a disruption of that and other pools thus avoided. It was rumored that this had been effected by the purchase of the Toungstown plant of the Republic from and Steel company, but there was no verification of this rumor, Pennsylvania and its subsidiary stocks and the soft coal group felt the sympathetic benefit of the movement in United States Steel preferred especially swing to the large part played in their traffic by two and steel and the mate. cially owing to the large part played in their traffic by iron and steel and the material for their production, in the early market there was some evidence of realizing in the Pacifics and this caused some heattation in the general list. The occasional pressure of profit taking on Mertopolitan securities had the same effect. When Southern Pacific broke through its restraint and rose above 55 the whole market took on a more assured tone. Union Pacific did not move in company with its subsidiary stock and the western stocks generally were inclined to hang back, except Atchison, which came forward vigorously to 51. The bank statement was of small influence. The surplus reserve now stands at such a high level that the degree of locrease is of little moment. Total sales of bonds, par value, \$1,05500.

The stock speculation of the week has been more active and has shown greater activity. Crop prospects have held the chief attention of operators. The action of the whoat market itself was attributed in large part to excess of speculation and to technical conditions in the immediate supply available in the market. The most favorable auguries were drawn from the government report on the corn and cotton crops.

Present conditions in those crops are felt. fally owing to the large part played in heir traffic by iron and steel and the mate-

government report on the corn and cotton crops.

Present conditions in those crops are felt to warrant an assumption of a bumper yield for both and this assumption is likely to form the estimate of those crops so long as no deleterious effects upon them are reported in the daily news.

The low stocks of cotton the world over on account of the discouragement to buyers of recent high prices point to an active coming to the replenished stocks. In the case of corn the threatened shortage of wheat in Europe and the small exportable surplus promised here indicated a largely increased demand for corn for foreign account with corresponding benefits in the sale of our large crop. Fears of a disruption of pools for maintaining prices of finished products have been the unfavorable factor growing from the terms of conversion into steel bliets by the Republic Steel company. Labor conditions continue unsettled and are the cause of an undercurrent of uneasiness in the stock market. Conditions in the exchange market have howered near the solutions to be took the pool of and other the control of the pool of the course of an undercurrent of uneasiness in the stock market. Conditions in the exchange market have howered near the should of the course of the pool of the course of the cou market. Conditions in the exchange market have hovered near the gold export point and engagements for shipment to London have been several times made and then cancelled. Railroad earnings as reported show an average improvement and the Harriman lines have been the subject of special activity and strength, apparently based on the good June net earnings.

The demand for bends has somewhat revived this week and prices have generally advanced the seven and prices have generally advanced. United States old is have advanced in an all during the week.

WOMAN AS A LIFE SAVER Society Belle Assigned to United States Station at Long Beach,

on Long Island. NEW YORK, Aug. 18 .- Well known in New York society, accomplished, wealthy, pretty and a graduate of an exclusive seminary, Miss Norma Hamilton of 65 Central Park West, enjoys the added distinction of being the first woman regularly enrolled in the volunteer life saving service of the United States. She has been assigned to the station at Long Beach, I. I.

Miss Hamilton is 19 years old, stands five feet four and weighs 110 pounds. She graduated from The Castle, Miss Mason's school for young women, at Tarrytown. N. Y., last year.

Her daring in battling the waves has attracted attention at Narragansett Pier and other seashore resorts where she has been with her parents. A year ago last spring her mother, Mrs. Lillian G. Hamilton, now a widow, bought, a summer home on the Merrick road near Lynbrook, L. I. All of last season and this year they have been dally visitors at Long Beach.

Recently Miss Hamilton was invited to join the life saving corps, and with the consent of her mother tried the examination under Inspector Brown and obtained a rating of 100 per cent in deep sea diving. swimming against the breakers and taking out the cutamaran without help.

Miss Hamilton, asked where she had learned to swim, replied: "In the Rangeley inkes, Maine, in chasing frogs when I was a wee girl. Papa and mamma used to spend their summers there, and I was in the water all the time. Our summer cottage was on an island."
