Capitol Decoration Scheme. The State Capitol commission has just headed off a clever scheme concocted by a number of persons here by which it was planned that the state should be the victim of a syndicate to exploit the appropriation for decoration of the interior of the state capitol. It was found that a plan had been made for inducing the unission to adopt a general plan for decoration in the capital and to let a contract on competitive bids. Then the successful bidders would sub-let the work to artists and it would be done very cheaply and there would be a comfortable "graft" in the job. Those who were planning to get the contracts were not artists nor were they willing to make an offer coupled county and that formerly he made his with a statement as to just what artist would be secured for the planning of the work. The job will cost something like \$75,000. For some time the capitol comnission had hesitated whether to have the work done in this way or to employ an artist of national reputation and entrust to him the task of working out the decorative scheme in harmony with the original plans for the state capitol. The latter course has been decided upon and the commission is at once the subject of bitter attacks from local promoters of the scheme to have the work done by contract.
