The letter of Miss Merkley, whose picture is printed above, proves beyond question that thousands of cases of inflammation ci the ovaries and womb are annually cured by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM :- Gradual loss of strength and nerve force told me something was radically wrong with me. I had severe shooting pains with me. I had severe shooting pains through the pelvic organs, cramps and extreme irritation compelled me to seek medical advice. The doctor said that I had ovarian trouble and ulceration, and advised an operation. I atrongly objected to this and decided to try Lydia E. Pinkham's Vegetable Compound. I soon found that my judgment was correct, and that all the good things said about this medicine were true, and day by day I felt less pain and increased appetite. The ulceration soon healed, and the other complications disappeared, and in eleven weeks I was once more strong and vigorous and perfectly well.

On Thursday evening, about 10 p'clock, the team of William Laffin and the buggy of W. A. Crandall of Overton were stolen, and Friday morning W. A. Crandall and F. S. Bunnell started in search of them, believing them to have been taken by two boys from the Reform school at Kearney who were said to have escaped. After getting on the trail of the stolen property. they learned that it was in the possession of a party giving the name of John G. After learning the identity of the man who had taken the team and buggy, Crandall and Bunnell continued their pursuit, forth of Ansley, just as Rhodes was entering Big canon, between Ansley and Sargeant.

As the pursuers approached Rhodes and his wife abandoned the team and took refuge in a patch of tall sunflowers and opened fire on Crandall and Bunnell, using a shotgun and a revolver. The shots missed their mark and Crandall and Bunnell took possession of the deserted team, driving out of range of the guns,

While they were driving from danger Rhodes and his wife left the cover and took a team and farm wagon from a boy who was driving along the road. They proceeded with this until they overtook a man driving a better team attached to a wagon, and forced him to make a trade. A short time after that they came upon a man driving a faster team attached to a buggy, and again traded horses without the consent of the owner.

By this time the immediate community was aroused and a posse was organized to chase the thief. At 6 o'clock last night it was reported here that they had Rhodes surrounded in a pasture near West Union, but later it was said that he had escaped. Rhodes is about five feet ten inches tall, smooth shaven except for a week's growth of beard, which, with his hair, is sandy. He is slightly pock-marked.

KANSAS CITY, Sept. 5 .- Thomas E. Waton, populist candidate for president of the United States, was the principal speaker at a Labor day picule here today. Previous to the speech making nearly 10,000 workingmen passed in parade through the down town streets.

Mr. Watson began by announcing that he was 48 years old today.

He said in part: What is the labor question? In plain English it is this: The workman in every field of industry, no matter what that may be, the workman whose toll produces the vast annual increase in the nation's wealth, asks why it is that the men who produce the most of this wealth should enjoy the least of it, while the men whose toll produces the least of it should by subtle contrivance of law and of business do enjoy the most of it. In other words, the man who makes it all thinks that he ought to have a fair share of that which he makes.

"The laborer has the right to complain that so much of the weight of taxation falls upon him, the poorer man, when the greater weight of the burden should be borne by the richer man, who is more able to bear it and who enjoys to a greater extent the benefits of government. Labor has just cause to complain that the hours of work are too long. The la-
