human being who has a craving for knowl-edge. Tis advantages will be for those who most need them. The rich men can buy their books, and sometimes do; but I have often feit as I looked upon their selec-tions that they, too, needed the assistance of a trained librarian. Hither the poorest the most obscure, the most neglected child may come and hold converse with the best the greatest, the mest renowned men and women of every age and of every clime. Here, if nowhere else, there shall be no caste, no rich, no poor, no favorites or favoritam-sail will be of an equality. The donor of this library said. "I am a library builder through heredily. My father was one of the three weavers who organized the first library of Dunfermiline. They combined their few volumes and opened, them to less fortunate people.

The weekly report of the state weather and crop service is encouraging as to Iowa

crops, saying;

The past weak was slightly cooler than usual, the daily average temperature being one to two degrees below normal. The state was coplously watered in all parts, which will insure ample fail pasturage and put the soil in good condition for plowing. Some local damage resulted from severe wind squalls, but the aggregate of loss will not be heavy. The bulk of the corn which was prostrated came up quickly, with favorable conditions following the storms.

As a whole the corn crop has done fairly well during the week. The progress of the crop toward maturity has been more uneven than usual in the same localities and in the same fields.
