in the history of the state, for this season of the year, in its adaptability to the needs of the crop season. It has been uniformly hot and dry all the week in every part of the state. The growing corn has been in imminent danger of ruin from an early frost and immense damage could have been ione ten days ago. Now, however, the corn is ripening fast and farmers state that the grain has filled out splendidly the last few days. The corn is fast getting out of the way of possible harm. The report of the weather and crop service next week, will indicate that the estimate on the yield of corn will have to be increased materially to fit changed conditions and that whereas there was prospect up to this week of poor quality as well as low yield now the estimate must run to over 300.000 .-000 bushels for Iowa and the corn to be of to the speakers. good quality. > oil this week the colonial secretary, replying to a question regarding legislation affecting Asiatics, said the imperial gov ernment was agreeable to legislation similar' to that in force in Cape Colony and Natal, but as the trustees of imperial interests, they were unable to sanction legislation which would interfere with the existing rights of Asiatics as regard regarding trading.

The powers at present possessed by the colonial government were sufficient to prevent an influx of undesirable aliens, and it had therefore no intention of introducing legislation for the permanent control of immigration till next session. The govern ment was unable to introduce legislation which would alter the existing conditions regarding trading by Indians already resident in the colony for the reasons set forth in the recent dispatch on the subject from the imperial government. Sir George Farrar thereupon moved:

general tone of the press, as follows: We are now passing through a historical crisis which may innuence the destiny of the Russian empire. As the military situ-ation in the far east becomes more and more complicated an opportunity is offered to our enemies at home, who are always quick to take advantage of any difficulties or reverses experienced by the Russian national government. Therefore we must show hearty co-operation in the hour of trial, repel our enemies abroad and disarm the discontented element at home. In order to accomplish the latter task we must retain all the good, especially the zematvo institutions, which can only develop if al-lowed to work independently. Decentrali-sation must be the aim, and one of the first requests, it is certain, will be liberty of the press and freedom of speech, which are the lighting conductors of public opinion. Real Life.

ROTTERDAM, Sept. 10 .- (Special Cable-Johnson, assistant professor of civil engineering; J. W. Jones and L. S. Klink, asgram to the Bee.)-A sensation has been caused in the town of Cunda, by the resistants in farm crops, and E. . Gardineer, markable death of two lovers.

A young man named Vissers was shortly to have been married to Louise Panuw, a pretty lacemaker, when it was discovered that his father some years ago died in prison for the murder of the young girl's prother.

The girl thereupon refused to marry Vissor, and openly declared her intention of committing suicide. Her parents did not take her threats seriously, but four days ago they discovered her lying senseless on the floor of her room with an empty bot-

SPAIN MAY RAISE COTTON Government Offers Bonus for Textile Plant Raised in that

Country.

(Copyright, 1994, by Press Publishing Co.) WASHINGTON, Sept. 10 .- (New York Herald Service-Special to The Bee.)-Because of high prices caused by American speculation, Spain is soing to try to grow its own cotton supply under a government subsidy. The plan is reported to the Department of Commerce and Labor by Maddin Summers, vice United State consul at Madrid, who says:

It is known that in certain parts of Spain cotton thrives, and in view of this fact the souncil of state has passed, and the king has approved, decrees subsidising the grow-ng of this very important article. Lands used in cotton growing are to be exempted from all taxation and money prizes for bods made of home grown cotton are to a paid.

be paid. I am told by various planters, especially in Andalusia, that a fair crop will be raised this year, and if the venture is successful, as it undoubtedly will be, large portions of land now dedicated to other purposes will be utilized for cotton growing.
