RUSSIAN OFFICERS FIGHT IN FRONT

The great number of casualties among the Russian officers, and particularly their generals, while no Japanese generals had been hit, is due largely to the different tactics of generalship followed in the armies.

JAPS DIRECT BATTLE BY WIRE

The Russian generalship is more spectacular and perhaps inspires more soldiers with greater courage, but the Japanese is more business like. These generals do not play to the galleries at all. The censorship which they enforce, tends to decrease their interest in all that is reported. Often correspondents are forbidden to mention the names of the leaders in daring and important fights because the names might give the enemy a clue to the identity and therefore to the strength and the characteristics of the organization opposing them.
