this point of view. There is a law of Nature and of Nature's God that things slowly evolve from lower planes to higher, a sturdy, steady and dig nified advance toward more perfect thing

in both the physical and Spiritual world The ponderous tread of evolutionary development is fixed by the Infinite and will not be quickened out of natural law by any of man's method.

Therefore, we see many illustrations showing how nature checks too rapid advance. Illinois raises phenomenal crops Thirteer of corn for two or three years. If she iorth on continued to do so every year her farmers would advance in wealth far beyond those of other sections or countries. So Nature

interposes a bar every three or four years and brings on a ."bad year." Here we see the leveling influence at

work. A man is prosperous in his business for a number of years and grows rich. Then Nature sets the "leveling influence" at work on him. Some of the investments lose, he becomes luxurious and lazy. Perhaps it is whiskey, tobacco, coffee, women, gambling, or some other form. The intent and purpose is to level him. Keep him from evolving too far ahead of the masses.
