COUNCIL BLUFFS

MORE PAVING IS PLANNED | the day complications arose and his condi-

City Council to Initiate Movement at Meeting Tonight.

WORK CANNOT BE UNDERTAKEN THIS YEAR

idea is to Let Contracts and Have Everything in Readiness for Work Early in the Spring.

The city council at its adjourned regular meeting tonight is expected to take preliminary action toward ordering a number of streets paved. While it is too late to attempt any more paving this year the aldermen are anxious to have matters in such shape that work can be commenced early next spring as soon as the weather is

It is stated that the aldermen have decided upon ordering the following streets West Broadway from Thirteenth to Twentieth street, Madison avenue from First street to Kapel avenue, Fletcher avenue from Oakland avenue to North Second street, Ninth street from First avenue to Eighth avenue, Third avenue from Eighth street to Ninth street, Fourth avenue from Eighth street to Ninth street, alloy north of courthouse from Pearl street to Ninth street, alley between Main and Sixth street from Fifth avenue to Eighth

In view of the protest of the property owners on Scott street from Washington avenue to the north end of the street the city council has decided to cut this paving out of the list.

One More Week of Revival. The revival meetings in the tabernacle at the corner of First avenue and Seventh street, which were originally planned to close last night, will be continued for one more week. This Evangelist Williams consented to do at the request of the Pastors' association, under the auspices of which the meetings are being held. In order to continue here another week Mr. Williams had to postpone his meetings at Pipestone Minn., to which place he will go from

CHATTEL LOANS

FIGHT AGAINST AMENDMENT

Opposition Developing to Plan for Biennial Elections in Iowa.

REPUBLICANS EXPECT BIG MAJORITY

State Committee Estimates Roosevelt WIII Carry State by 100,000-Prediction that Dawson Will Defeat Wade.

(From a Staff Correspondent.) DES MOINES, Oct. 23 .- (Special.)-In the closing days of the state campaign in lowa some little interest has been aroused over the sudden effort developed to defeat the biennial elections amendment. This amendment was carried by the voters four years ago with over 20,000 majority. It was found that the legislature had failed to observe all the technicalities in getting it before the people and a new referendum was necessary. Now it is before the people again. Four different general assemblies have distinctly approved the measure and the people have once voted in its favor. It was generally assumed that the amendment would be adopted this time with very little opposition, but quite recently it has developed that there is an organized movement to defeat it. Secretary Shaw, who made two speeches in the state, fresh from Washington, sounded the keynote of opposition by indicating that it was due to the off-year elections in Iowa that Iowa has such prominence in national affairs and such an excellent congressional delegathe southern part of the state, have ommenced an attack upon the amendment and there is now fear that it will be beaten.

A great deal of The 4-months-old daughter of Mr. and Mrs. H. G. McGee, 215 Third street, fell Saturday evening and suffered a fracture of the arm. the opposition to the amendment appears to be personal and directed against those who are thus to be continued in office.

The Ladies' Aid society of St. Paul's Episcopal church will meet this afternoon at the residence of Mrs. S. W. Besley, 135 Grant street. Arguments on the Amendment. The strongest point made against the amendment is that the annual elections are an educational affair and are necessary, if the people are to be kept well informed on politics. This is combatted by the experience in other states near Iowa where the biennial election system has been tried, and especially in Minnesota. The friends of the measure point to the fact that thirty-three states have adopted the biennial plan and not one shows any desire to return to it. It is estimated that the saving to the people of the state in elec-Mrs. Anna McCarty is visiting her sister, Mrs. Aspenwall, on Benton street. The fire department was called at 5:30 o'clock last evening to the restaurant conducted by George Smith at 2029 Ninth avenue, near the Union Pacific transfer depot. An unruly gasoline stove caused an inciplent blaze which was extinguished without much trouble or damage. So far as learned there is no systematic work being done for the amendment, since nearly all of those who would be affected by it are indifferent as to results. The Miss Nora Creamer, formerly of this city but more recently of Omaha, was married last Wednesday to Russel P. Browne, foreman of the Frank Neihus ranch in Keya Paha county, Nebraska. Mrs. Browne's mother and many relatives are residents of Council Bluffs. fact that a movement has been started to defeat it in the closing days of the campaign would indicate there is danger of its defeat.

Some effort has been made to make to appear that the amendment would have nething to do with the senatorship; but this is an error, as the present legislature annot under any circumstances elect a new United States senator, and the succession to Senator Dolliver will be decided by a legislature yet to be elected, whether the mendment carries or not.

Closing Up the Campaign. During the coming week a great effort will be made to have a good many good meetings in the state. Secretary Leslie M. Shaw has been induced to come into the state again for five speeches and he will close at his home in Denison. Senator Spooner of Wisconsin has been invited to make one speech in the state, at Cedar Rapids, and it will be the occasion for a In accordance with instructions received from district headquarters at St. Paul the time for filing applications by those desiring to take the annual examination in this city for postal cierks and carriers has been extended from October 17 to November 7. The examination will be held at the postoffice building on November 16. big rally. Governor VanSant of Minnesota will deliver an address in Des Moines to close the campaign. Governor Cummins has a number of meetings in the eastern part of the state to assist in the election of A. F. Dawson, the republican candidate, against Judge Wade. Senator Dolliver The new law requiring reports of births and deaths to be made to the city physician instead of to the city clerk has gone into effect. City Physician Tinley has received his records and blanks for this purpose. It becomes the duty of the city physician under the new law also to issue burial permits instead of the city clerk doing so as heretofore. The city physician will make monthly reports to the Board of Health. overs nearly the entire state with his elo quence in the next ten days and speaks in all the best places. The state committee has about twenty other speakers who are being used in the state and many repub-

lican rallies are planned. The One Iowa Fight.

Car No. 201, one of the large closed motors on the Omaha line, jumped the track at Seventh street and Broadway yesterday afternoon and seriously interfered with the service between the two cities for over an hour. The accident was caused by the breaking of what is known as the gear casing, which after the car had been placed back on the rails prevented it from being driven forward, athough it could be moved backward. After the "breakdown gang" had worked on the car for about an hour it was finally got to the car barns. place in the state where there is a real campaign, the belief now prevails in repubcan circles that Albert F. Dawson will be elected over Judge M. J. Wade, democrat, as the campaign made in behalf of Dawson is the best which has been made for many years in that part of the state. His election will make the delegation in congress from Iowa solidly republican again. Judge Wade and his friends, however, have been very active and claim to be confident of success in the district, so that there will be the utmost interest in the election returns MURDER FOLLOWS ARGUMENT from the district.

Big Majority is Expected. The republican state con ident of at least 100,000 majority for Roose velt and Fairbanks in Iows, and the managers hope for 125,000 majority. The highest majority on record was that for Governor Cummins last year of about 80,000 on a not very large vote. The vote will be about little church near Mill Creek, on the Big 100.000 larger in the aggregate than last Sandy river today, one man who had lis- year in lows, and this will leave many thousands who have not yet cast their was fatally stabbed. Association Elects a New Board of Directors at Annual Meeting.

REPORT SHOWS SPLENDID SUCCESS

aluable Compilation of Papers or Mining and Mill Practice is Issued and First Edition About Exhausted,

DEADWOOD, S. D., Oct. 23,-(Special.)-On Wednesday last the annual meeting of the Black Hills Mining Men's association was held in Deadwood. Among other business was the election of a new board of directors, which resulted as follows: John Blatchford of Terry, Dr. Freeman of Lead, Dr. R. L. Slagle of Rapid City, F. R. Baldwin of Maitland, John Gray of Terraville Joseph Pilcher of Custer City, John Blatt of Lead, George V. Ayres of Deadwood. The report of the secretary shows that the ssociation is in a splendid condition financially and in point of membership; that during the year it has expended several thousand dollars in advertising the mineral deavor to promote the interests of mining and throw around the business such protection as will tend to make a safe and legitimate one, especially where it concerns mining properties here. A few weeks ago there was issued by the association a paper covered book of 150 pages containing all of the papers which had been read before its mining and mill practice in the Black Hills. It is one of the most valuable works undertaken by the association, as the articles contained in the book are from the pens of men who have made the subjects which they have taken a life study, and so highly is it regarded by mining and mill men that the first edition of 5,000 copies has about been exhausted.

Gilt-Edge Maid Plant. It is now stated that the 125-ton mill of the Gilt-Edge Maid company on Strawberry gulch will be placed in commission within the next three weeks, most all of the machinery having been placed in position and will be started up on a preliminary run for the purpose of adjusting the ma-chinery within a few days. The company is now engaged in putting in a dam or Ophir gulch, which will be used by the company as the source of its water supply, the supply at that point being sufficient to furnish a much larger plant than the one under course of construction. Arrange-ments for handling the ore are such that it will reach the plant at a very small cost. It will be taken from the mine on a level with the upper part of the mill, passed througs a Missouri crusher and then through a set of Gates rolls, and then elevated into storage bins, from whence it will pass into a Trent Chilian mill, and after being crushed in a cyanide solution will again be elevated and passed through three sets of cones, separating the slimes from the sands, each being conveyed to separate tanks and then given the ordinary cyanide treatment. The mill is most conveniently arranged, not only for the treatment of the ore after it is received, but with regard to getting it from the mine; it has been built along scientific lines and will contain all of the latest innovations in evanidation. Work in the mine has disclosed a large vertical ledge of ore, which has been already opened up to the best advantage, and which will carry values of \$6, although some very rich ore is occasionally met with in the working.

Resume Work on Shamrock. Work has been resumed on the Shamrock mine, on Big Strawberry, after that property has laid idle for the last year. Two shifts of miners are sinking a shaft through the quartite and drifting on that formation into a good shoot of silicious ore, which will run from \$4 to \$16 a ton. From this mine there has been shipped a large amount of silver-lead ore, some of which has gone as high as 200 ounces, besides carrying gold values. During developme work there has been taken out a carload of this character of ore, which will be shipped to the Omaha smelter for treatment. The owners of this property, three Lead men will endeavor to open up the mine so that daily shipment of silicious ores can be made to local treatment plants and occasional shipments of sliver-lead ore to eastern gmelters. Adjoining the Shamrock is the Puritan company's ground, on which a new mill was placed in operation s week or so ago. The new plant is giving the best of satisfaction and will make its first cleanup the latter part of this mouth. Besides the Shamrock the Maitland and The republican state committee has dated Imperial companies are making shipments of high-grade smelting ores to eastern treatment plants. The Horseshoe and Golden Reward companies also make ship ments to the east, so the rumors that the hig smetter of the latter company will again be blown in do not occasion much surprise among mining men.

Dizzy Sinking to Quarteite. After prospecting for several months with diamond drill the management of the

ore of an excellent grade would be struck when that formation had been reached. The shaft has now reached a depth of 115 feet and is making excellent progress, the shaft being equipped with a steam hoist and other machinery calculated to facilitate mining at a depth. Situated in one of the best producing districts in the Hills, and with good indications to work from, the Dizzy should prove in time to be a winner. On the property of the Omaha company which adjoins that of the Dizzy, sinking to and filled a number of open cuts which had quartzite has also begun, and the shaft has reached a considerable depth, a horse whim teing used in sinking. This company is partly controlled by the same men who are interested in the Dizzy. Prospecting with the diamond drill in this vicinity has demonstrated that on the quartrite there are shoots of ore of excellent grade, and many ompanies owning ground there have already made preparations to sink, so this winter mining operations in this particu-

lar district will be active. New Electric Drill. The Goldstake Mining and Milling company is preparing to install a new kind of Maitland. Considerable interest will attach to this departure by the Goldstake, as the electric drill in the past has not given on ore early in the coming year. Work o the best of satisfaction, especially when operated in wer ground, short circulting being frequent and delays in consequence being numerous and expensive. The new drill ordered by this company will be operated by individual motors, attached to the dril! itself, this arrangement, it is claimed, giving a distinctive advantage over the old style of machine. The company has built its power house and laid the foundations for machinery which will be installed, and which could arrive and be in operation within the next thirty days, when a thorough test of the new machines will be made. Prospect work on the ground of this company has opened up a number of ores carry values sufficient to warrant the excellent ore bodies and is being prosecuted erection of a treatment plant upon it. The

with vigor. T. W. Thompson of Whitewood, owner of work is thoroughly testing the mine, havthe Clinton chims in the Bald Mountain ing taken hundreds of samples from the

MINING IN THE BLACK HILLS Dizzy Mining company, whose ground is lo-district, has bonded the property for a good various workings and assaying them, as cated on Alsobottom creek, about three sum to eastern parties. The Clinton is one miles north of Maitland, concluded to sink of the first claims from which rich silicious to quartzite borings from the drill, prov- ores was taken in the early days of the ing to the satisfaction of the officials that district and has been on the producing list for a number of years. It is well de veloped and the ore shoots of average rich ness. This property adjoins the Buton another prolific producer of silicious ores. Aurisone to Start Up. GALENA, S. D., Oct. 23.-(Special.)

Work will be resumed on the property of the Aurizone Mining company, located about a mile and a half north of Galena. Last spring during the heavy rains a landslide covered the portals to the tunnels been started by the company. It is the intention to reopen these workings at once, at work cleaning them out. The company

owns 200 acres of land in the Bare Butte

district and on a number of claims has

opened up some good veins and shoots of Work of building the railroad which wil connect the 100-stamp mill of the Branch Mint with the mines of that company is progressing rapidly and should be finished n a few weeks. The grading for the roadbed has been completed and the contract for the stone work and timbers for the bridges and culverts has been awarded. delivery of machinery having already be gun and the mill will probably be running

opening up the ore bodies is continuing with good results and the company is now The dead: ssured of a good supply when its plant is ready to start up. This property is one of the best known in the district and has produced some very rich free milling ore. Oro Fine Finds Ore.

On the Oro Fine, which is owned by th Golden Reward Mining company, two shift of miners are employed, and, it is said they are taking out some excellent ore This is a good property, two large vertical cutting through it, on which there ha been done in the past a vast amount o work, the development proving that its Golden Reward company in its present

well as sampling extensively adjoining and abutting properties. It is said that the will, should its investigations company prove satisfactory, make arrangements to treat its ore and open up work on the property on an extensive scale.

Daly and associates have received the patent for their ground, and will soon make arrangements to put a force of men at work on it, opening it up in a thorough manner. This is a good property and its showing of ore, for what work has been done upon it, as good as there is on any property in the vicinity.

Annual assassment work has called a umber of non-resident mine owners into the district, and the result is that times are liveller at the present time than they have seen for months. Development work and the starting of milling plants in the district have aroused a greater interest in mining here than for several years and the prospects never looked so bright for the Bare Butte district taking its place among he foremost producers of the Black Hills.
