Jobbers and Mannfacturers Report October Business Better Than a Year Ago.

FUTURE OUTLOOK ALSO MORE PROMISING

Sugar Advanced Five Cents and Coffee histier, Cotton Goods Firm with Heavy Export Demand, Steel Higher Than Last Year.

Although figures for the amount of busi-Although figures for the amount of business transcted by Omaha Jobbers and mandinacturers during the month of October are not complete, still there is no doubt expressed out what more goods have been some this month than during the corresponding period of last year. Owing to the exceptionany nine outlook for tutule business retailers have taken hold much more freely than usual, and those who earlier in the season were very cautous have recely than usual, and those who earlier in the season were very cauthous have changed their factics, so that the total amount of business transacted during October has been a pleasant surprise to Omaha houses. Retailers, both in Omaha and out through tributary territory, have also been enjoying liberal patronage, so that aithough machants bought freely, it is evident that they have not overestimated their wants. There seems to be no doubt in the minds of retailers but what business will continue brisk throughout the winter and spring, as there should be a better demand after crops begin to move more freely than there has been up to the present time.

present time,
Advance ousiness with Omaha houses is
also coming in better than was the case a
year ago. This is also explained by the also coming in better than was the case a year ago. This is also explained by the confidence in the present tavorable conditions being permanent. Traveling men are naturally much encouraged with the way merchants are taking hold of spring lines, and they expect to break the record they established last fall by a wide margin. The markets are in a good, healthy condition on practically all lines. The only disturbing element in the price situation seems to be the demoralized condition of freight rates on certain commodities, but that affects only a few items.

Collections continue very satisfactory, and while a few bad accounts have been reported, merchants as a general thing are stronger financially than ever before.

Sharp Advance in Sugar.

Sharp Advance in Sugar.

Wholesale grocers report the demand for their line of goods as being entirely satisfactory and fully up to expectations. The market is also in good snape, and in the case of sugar an advance or 5 cents was announced on Friday, alecting all grades. The raw market is also a little nigher than it was a week algo, and the outlook is for a good, healthy market for some time to come. No material change in the freight rate situation has taken place since last report. The dincrent interests have been unable to reach a satisfactory agreement, and while local houses a week ago were looking for a quick settlement, they how fear that it will be some time before rates will be restored to a normal basis. Sharp Advance in Sugar. The collee market is also in a very strong position, and in fact, prices have been marked up 20 to 35 points during the last few days. Desirable grades are becoming quite scarce, and particularly is that true of Santos and the Every indication at the

of Santos and tho. Every indication at the present time points to higher prices in the near future. Reports received direct from the primary markets show that the growing crop has been considerably damaged and that the yield will be much less than the 1995 and 1995 crops.

The cheese market is about the same as it was a week ago. Stocks of October made goods are getting well cleaned up and it is thought that the make will be 15 to 29 per cent lighter than it was a year ago. Some of the lactories, in fact, closed down last week.

In the canned goods line the market on tomatoes seems to be attracting considertomatoes seems to be attracting consider-able attention, and recent advices indicate that many well posted buyers are of the opinion that the bottom of the market has been reached, and therefore they are liberal buyers. This in itself will naturally have

buyers. This in itself will naturally have a tendency to strengthen the market eventually, if not in the near future.

Canned corn is holding its own, and while heavy deliveries are being made, there is not much buying interest. The general impression, though, is that all the available supply will be wanted at considerably higner prices long before the next crop comes on the market. The demand for canned fruits is still much smaller than it was a year ago.

was a year ago.

The dried fruit market is in good condition and peaches continue to advance on the Pacific coast, but the spot market has not responded to this advance. Raspberries have been marked up 2 cents per pound and according to reports from New York sales were quickly made at the advance. It is also claimed that but little stock is available at any price. Evaporated apples are being offered at low prices, and in the face of the high prices asked for peaches, it is figured that a large business is sure to be done in apples.

Ten Thousand Cases for China.

Ten Thousand Cases for China.

One of the inest important developments in the cotton goods market last week was the development of a large export demand. One concern reported a sale of 10,000 cases of canton fiannels for shipment to China and a large business was also done on drills for the same foreign markets. When this increased foreign demand is taken into consideration along with the lively home trade in prospect, well posted buyers say they do not see how there can be any reductions in prices ruling on cotton goods for some time to come. Jobbers throughout the country are also reported as carrying very light stocks, and when the time comes when their wants will have to be supplied a firmer market may be looked for.

So far as the trade situation with local houses is concerned, there are no complaints offered. Orders last week, both direct and through traveling salesmen, were unusually large for the time to year and heavier.

offered. Orders last week, both direct and through traveling salesmen, were unusually large for the time of year and heavier than for some time past. There were also quite a few buyers in the city. Orders for immediate shipments were, of course, not very liberal, but owing to the number the amount of business in the aggregate was large. The demand extended to all departments and local stocks of underwear, blankets, cloaks and many other lines have been greatly reduced and without cutting prices, which sometimes becomes necessary at this season of the year. Advance orders for spring are also coming in freely and present indications are that jobbers will take more advance orders for spring lines than ever before. Reports from the country are to the effect that retailers are enjoying a nice business, which undoubtedly accounts in a large measure for their willingness to place early orders.

Advance in Steel Goods.

Advance in Steel Goods.

Next month local hardware jobbers will start their men out in search of advance orders on spring lines, and when they quote prices on steel goods the trade will ind that prices are from 5 to 7½ per cent higher than those quoted a year ago. For some little time jobbers have been predicting higher prices on steel goods, and when they received their quotations on spring lines they found that their predictions had come true. There has been no change as yet in wire and nails, but an advance would cause no great surprise. There is a strong impression among well posted buyers that the upward tendency of the steel market has not reached the limit by a long ways, and they are predicting that the man who has a good line of steel goods bought before the first of the year will find that he has made a good profit on them. Advance in Steel Goods.

find that he has made a good profit on them.

There is nothing particularly new in the market for other staple lines, but still there is a feeling of firmness on all goods and indications are that values will be well maintained for some time to come.

The demand for staple and seasonable lines is still very large with Omaha houses and more goods have been sold this month than during October of last year. Jobbers are naturally pleased with the way business has kept up, but they expect a still greater demand after election, as they have found a good many merchants who wanted to carry light stocks until after election, and as the demand is heavy in the country they will have to buy liberal stocks.

Feel Need of Colder Weather.

Leather goods jobbers say that they are beginning to feel the need of a little colder weather and a snow storm in reality is what is needed to make trade in their line brisk. The tendency always is for people to wear their summer footwear as late in the fall as possible, and it usually taken a cold snap or a fall of snow to make trade very brisk. Retailers have had a fairly good demand so far, but the trade has been nothing like what it will be after the first touch of winter weather. None, however, is complaining, as business in the aggregate has been entirely satisfactory.

Advance orders for spring are still both Advance orders for spring are still both Advance orders for spring are still both immerius and liberal, and enless something happens to change the situation traveling men will sell more goods than they did last year. All merchants ask is a mormal winter, and with that they can usell all their present stocks and will then be in shape to carry liberal lines of spring and summer goods.

There is nothing new in the rubber goods situation. Jobbers though, are setting ready for a flood of orders to follow the first cold wave and snow storm.

Prices on Board of Trade.

CHICAGO, Oct. 23.—Peaceful settlement of the north sea incident was the main influence in a weak wheat market here today. At the close December wheat was off 1%c and May 14.61%c. Corn showed a loss of 1%c and oats %c. Provisions are practically unchanged.

In the wheat pit here the speech of the British premier regarding Anglo-Russian aftairs seemed to effectually dispel all apprehension of hostilities between Great Britain and Russia. The market was further influenced by the bearish action of foreign markets. As a result lower prices prevailed here throughout the entire session. At the opening December was down %61%c at \$1.13%61.13%. From the start there was heavy liquidation and also large evening up sales over Sunday. The low point on December for the day was reached at \$1.12 and on May at \$1.11. The market closed practically at the bottom, final quotations on December being at \$1.12. May closed at \$1.11%. Clearances of wheat and flour were equal to \$1.700 bu. Primary receipts were 1,231,000 bu., compared with 1.22.600 bu a year ago. Minneapolis, Duluth and Chicago reported receipts of 890 cars, against 726 cars last week and 1,025 cars a year ago.

In sympathy with the decline in wheat and as a result of easier cables and ideal weak throughout the entire session. There was heavy selling by commission houses and the demand came largely from scalpers. December opened \(\frac{100}{200} \) cars a goa and declosed at \(\frac{100}{200} \) busy compared with the decline in wheat and as a result of easier cables and ideal weak throughout the corn market ruled weak throughout the corn market ruled was heavy selling by commission houses and the demand came largely from scalpers. December opened \(\frac{100}{200} \) care and closed at \(\frac{100}{200} \) care were weak as a result of the selling pressure on the other grains. Trading was very light and mostly of a local character. December opened \(\frac{100}{200} \) care for first and closed at \(\frac{100}{200} \) and \(\frac{100}{2 Features of the Trading and Closing Prices on Board of Trade.
