

MISS LAURA MORRISON.

TAKEN FROM NATURE. Miss Morrison's Experience.

FROM the pure fountain of nature flows the stream of energy and health, which renews and invigorates our race. In every period of the world's progress man have received their greatest strength and inspiration direct from nature. It is the greatest opportunity and developer of mankind. Not only do we get inspiration from nature, but health as well. To live in the open, in the sunshine, in the fields or woods, drinking pure air into the lungs, is best for those who have the opportunity. For people who are run-down, nervous, suffering from occasional indigestion or dyspepsia, headaches, night-sweats, whose machinery has become worn, it becomes necessary to turn to some tonic or strengthener which will help them to get on their feet and put the body into its proper condition. For centuries it has been known that nature's most valuable health-giving agents are roots, herbs, barks and berries, and some forty years ago Dr. R. V. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y., found a combination of roots, herbs and woods, taken from the fields and woods and made into an alternative ex-

tract, produced results in the system which was satisfactory in almost every case of blood disorder and stomach trouble. This concentrated extract of nature's vitality purifies the blood by putting the stomach into healthy condition, helping the assimilation of food which feeds the blood, and putting the liver into activity. Nervousness and sleeplessness are usually due to the fact that the nerves are not fed on properly nourished blood. Dr. Pierce's Golden Medical Discovery makes pure, rich blood, and thereby all the organs of the body are run smoothly like the machinery which runs in oil. In this way you feel clean, strong and strenuous; you feel braced up, and you are good for a whole lot of physical or mental work. Best of all, the strength and increase in vitality and health are lasting. The trouble with most tonics and medicines which have a large sale for a short time is that they are largely composed of alcohol holding the drugs in solution. This alcohol shrinks up the red blood corpuscles, and so one may feel exhilarated and better for the time being, yet in the end weakened and with vitality decreased. Doctor Pierce's Golden Medical Discovery does not contain alcohol. The proof is easy. Distill it in a glass retort, and see for yourself. Every bottle of Doctor Pierce's Golden Medical Discovery bears the stamp of public approval. For the druggist to offer you something he

We guarantee that Dr. Pierce's Golden Medical Discovery does not contain alcohol, opium, or any harmful drug. It is an alterative extract from the roots of most valuable medicinal plants. Persons making false statements concerning its ingredients will be prosecuted.

claims is "just as good" is to insult your intelligence. What you want is a remedy without alcohol, and one which has stood the test of time. Miss Laura Morrison, Assistant Regent Colorado Division Ladies' Hermitage Association, of 823 East Kiowa Street, Colorado Springs, Col., writes Dr. Pierce as follows: "Your 'Golden Medical Discovery' is the best medicine I know of for impure blood. I had been troubled with this for more than ten years and once or twice every year, and whenever my blood would become overheated I would break out all over my body. My face would look so bad that I felt embarrassed before my friends. I took sarsaparilla, elixirs, powders and pills, but nothing cured me until I took your 'Golden Medical Discovery.' It eliminated all the poison from my system, cleansed the clogged-up pores, toned up the digestive organs and made me feel young and in splendid health. I have had no trouble whatever for the past year, my skin is as smooth as a child's, all due to your famous remedy." A pin prick and a drop of blood on a glass slide will tell whether your blood is in a healthy condition or not. Every healthy man should have five million red blood corpuscles to every square millimeter of blood. If there are too many white blood corpuscles the person is said to be anemic and run down. A chemical test of the blood is the only human body will tell whether the kidneys are in good health or not. These tests of health are conducted by expert physicians and chemists every day. Such examinations are made without cost. This is only a very small part of the work of the staff of physicians and surgeons under the direction of Dr. R. V. Pierce, of Buffalo, N. Y., the founder and director of the Invalids' Hotel and Surgical Institute in that city. To build up the body that has been weakened by an attack of grip, pneumonia or typhoid, write Dr. R. V. Pierce for advice, giving all your symptoms, and he will give you the best medical advice possible to suit your case, and without cost. For those who are weakened by the after effects of a bad cold, cough or grip caught during the winter, nothing will increase the number of red blood corpuscles and eradicate poison from the blood so quickly as Dr. Pierce's Golden Medical Discovery. Although we know the germs of consumption and grip are in the air we breathe in rooms, street cars, shops, in fact everywhere, yet scientists have not been able to fight these bacteria very well. The best thing we can possibly do individually at present is to keep ourselves in such a state of health as to enable us to fight the bacteria with our own vitality. The blood through our veins and arteries should contain healthy, red blood corpuscles, which are capable of warding off the attack of these germs if they get into our systems. Dr. Pierce's Golden Medical Discovery is just what is needed for such persons and it has received the praise of thousands of people throughout the United States.

INVENTION TO FORGE STEEL

New Method About to Be Introduced at Union Pacific Shops. OFFICIALS ARE ENTHUSIASTIC OVER IT. Say It Will Revolutionize System Now in Vogue by Railroads and Work Great Saving to Them.

Union Pacific officials are interested in a new and remarkable invention that promises to revolutionize the present methods of forging steel. The new process makes a forge unnecessary and with it breaks may be mended anywhere they happen to occur. At the shops in this city a general process is being talked of and if subsequent experiments are as successful as those made a few days ago one of the greatest problems of overcoming breakdowns has been solved. The experiments already made have been highly interesting and satisfactory and have been watched by General Manager A. L. Mohler, W. B. McKee, superintendent of motive power and machinery, and other officials of the road. The experiments have so far been conducted with the utmost secrecy and only those immediately interested besides the inventor have been admitted. The new process is the invention of an eastern man. It consists of a powder resembling sand or a coarse quality of smokeless powder. The material is placed in a funnel-shaped retort and lighted with an ordinary fuse. It ignites immediately and generates steam rapidly. In twenty-five seconds by the watch the steaming mass was ready for use upon the occasion of the recent experiment.

Makes Steel Solid. It was allowed to run out through the funnel of the retort upon a broken piece of steel and when the mass had cooled and the metal was washed free of the residue, an apparently solid piece of steel lay upon the operating table. The experiment was tried with other broken parts of steel and iron with the same result. The heat generated by the igniting gases of the mysterious powder was enormous but most remarkable was the rapidity with which the heat was generated. It is claimed by the inventor that two pieces of metal forced together in this manner are 50 per cent as strong as a solid piece of steel. This is stronger than broken parts forced together by the usual methods. Another and more thorough experiment is to be made on Friday with an entire locomotive. The frame is cracked and the experiment, it is said, will expose the material to the severest test that it can be put to. In the experiments on Tuesday morning a surprisingly small amount of the powder was used. Two hundred or two hundred and fifty pounds of the four-inch steel. A Union Pacific official said: "The experiments, so far as they have been made, are remarkable. With this powder we could repair a broken part without dismantling the engine. The inventor claims that a piece of forged steel is 50 per cent as strong as solid steel and that with a band it is fully as solid. The experiments rather justify the assertion. The possibilities of the invention, if subsequent experiments prove as successful as the present ones, are unlimited. It will enable an engineer to repair a break anywhere along the road as well as though the locomotive had been repaired in the shops." Will Not Reduce Force. "Will it have a tendency to reduce the working force of the shops?" "No; hardly that, but it would enable us to make repairs more speedily and put back into use engines which now have to wait two or three weeks sometimes before a break of this kind can be repaired. There is no limit to the possibilities of the invention, both in repair work and in the manufacture of new pieces." "Is there not a dangerous side to such a powerful composition?" "Well, it wouldn't be good material to get in the hands of a bank burglar perhaps. It would obviate the necessity of blowing the vault to pieces with dynamite, for in a few seconds he could melt down the bars which fasten the safe doors. In the hands of dangerous men it is a dangerous invention undoubtedly, but then dangerous characters will always prevent the use of inventions which work to the good of mankind."

Underwear for Women and Children.

Did you ever take the trouble to compare our underwear prices with those of other stores? To the woman who hasn't, a whole series of new economies is possible, a saving on every one of her undergarments—and if she be a mother, economies on the children's underwear.

- It's easy to figure out how much you save on these few items given here
25c LADIES' UNDERWEAR, good quality, heavy Egyptian cotton derby ribbed underwear, ecru color and white—nicely trimmed and perfectly cut—regular 45c quality, at 25c.
45c LADIES' UNDERWEAR, extra heavy derby ribbed and flat fleece lined underwear, in natural and ecru, also good quality combination suits, prettily cut and trimmed—75c values, at 45c.
90c LADIES' extra fine quality ribbed Sea Island cotton combination silk, trimmed front and full silk taped necks, perfectly shaped and finished—regular \$1.50 values, at 90c.
\$1.90 LADIES' fine quality, jersey ribbed merino suits, 3/4 wool and natural and white, beautifully finished with silk and silk taped neck, cut full size, regular \$1.50 values, at \$1.90.
Children's Underwear.
25c Children's jersey ribbed, cotton fleece, ed, shirts and pants, in natural and ecru, sizes 1 to 8—25c.
45c Children's fine quality heavy jersey combination suits, natural gray, open front or Oneita style—at 45c.

"Halliday's Rheumatism Cure"

Cures when others fail. Rheumatism hangs on, so stubbornly, that most remedies fail to do more than give temporary relief. The cause of rheumatism is the presence of urea or uric acid in the blood and the deposits of this dangerous poison in the muscles and joints produces inflammation. This is why liniments only relieve, but do not cure rheumatism. It is inside and must be driven out. Halliday's Rheumatism Cure will drive out rheumatism, both acute and chronic, in all its forms, from the system. The cure is permanent. A cure guaranteed or your money back. Price 50c. BEATON DRUG CO., 15TH AND FARNAM STS., OMAHA, NEB. AGENTS

LAWYERS PUT IN FOR LIBRARY

Omaha Attorneys Propose to Establish One in Creighton College.

PLAN TO SUPPLANT MILLARD BILL

Federal Official Pronounces Letter Inexpedient and Explains How It Came to Be Introduced in Senate.

Regarding the bill introduced in the Senate Wednesday by Senator Millard appropriating \$10,000 for the establishment of a law library at the federal building in Omaha for the use of the United States circuit court, a federal official said: "The proposition grows out of a discussion had by a number of Omaha attorneys some months ago relative to the proposed removal of the law library in the New York Life building." This proceeding was stopped, you will remember, by injunction proceedings. The question then came up to make an effort to have the United States make some sort of an appropriation for the establishment of a law library, or at least furnish one of the vacant rooms in the federal building for the purpose, a custom which is not unusual where vacant rooms in public buildings are available. Senator Millard took an interest in the matter and this bill is the result. I question, however, whether it would be expedient for the government to go into the law library business. There would be no end to it. At any event, Senator Millard's bill will have the effect of attracting interest toward the proposition.

SCAVENGER SALE PROCEEDS

Returns to City Thus Far Amount to Forty-One Thousand Dollars.

EXCLUSIVE OF BIG SUM OF BACK TAXES

These Proceeds Will Be Devoted to Helping Out City Funds that Have Been Depleted.

With the payment of \$23,544 Wednesday by County Treasurer Fink, the total receipts of the city from the scavenger tax sales were brought up to \$41,298 to date, the difference having been received in two payments during November. This amount is exclusive of a sum several times as great in back regular and special taxes paid over by property owners to escape action under the scavenger law. Under the last arrangement made by the city council the tax sale money will be devoted to helping out the city funds that have been depleted through the remainder of the year. Inasmuch as the proportion realized on special taxes must be put into the special improvement funds, only about two-thirds of the \$23,544 last received will be available for the general fund, and consequently a receipt of current salaries and expenses. The amount, together with other receipts, may be large enough to carry the city through until January, it is thought. Meanwhile the \$11,000 borrowed from the funding bond fund is waiting to be paid back. To reimburse fund. The percentage of taxes for special improvements, such as paving, sewerage and sidewalks, which the city has lost by reason of litigation on the grounds of faulty procedure by the authorities is shown by an ordinance just introduced providing for the issue of \$24,000 renewal bonds, to run twenty years at 4 per cent. These bonds will be sold for the purpose of reimbursing the district improvement funds which are short because of current salaries and expenses. In looking up the books to see how much of the district improvement bonds will fall due during 1905, the treasurer's office found the amount to be \$60,000, for which only about \$30,000 is collected on and hand ready to pay. To take up the bonds it is necessary to procure the additional money, and the only way prescribed is to issue renewal bonds. The latter bonds, in turn, will have to be paid by the city at large, showing how the system of contesting special taxes works out. It has been and still is the procedure to issue bonds for district improvements to pay the contractors, as it requires an indefinite time for the taxes to be collected under the special levies, and even when all are in the sum is met, owing to those that have been knocked out by the courts. The money is borrowed at rates from 4 to 5 per cent, while that held in the funds draws interest at no more than 2 per cent.

WANTS POSSESSION OF LOT

One with a claim of damages which W. Farnam Smith claims to have suffered at the hands of Robert Price and Marie Price, but he does not want the \$100,000 so much as he wants the possession of a portion of tax lot in this city, which he says belongs to him and which he claims of which the Prices have been for two years in possession. He has filed his petition with the clerk of the district court asking that possession be granted and the amount of damages asked awarded.

ENGLISH AND SLABAUGH GO

Old and New County Attorney Will Attend Conference Called by Prout.

Both County Attorney James P. English and County Attorney Elect, W. W. Slabaugh will attend the meeting of county attorneys called by Attorney General Prout. Mr. English received notice of the meeting this morning with an invitation to be present. Mr. Slabaugh, though not in office, will also go down to meet the other attorneys. The notice received by Mr. English does not contain any further details of the conference than the fact it is to discuss ways and means of opposing injunction suits on the part of railway companies to prevent the collection of taxes.

LOCAL BREVITIES.

The Ladies' Aid society of Lowe Avenue Presbyterian church will hold its annual bazaar and supper at the church this evening. Burglars secured fifteen boxes of cigars Wednesday night at the saloon of B. M. Smith, 232 South Sixteenth street, by passing entrance through a rear window. Burglars are reported to have raised a window at the residence of Oscar Shalberg, 90 South Thirty-first street, and to have stolen an overcoat and a gold watch. Chief of Police Donahue has returned from Douglas county to do a general oiling of the penitentiaries at both places and the Arkansas institution is a place of much interest. The women of the First Baptist church will hold a social at the church at 8 o'clock this evening. During the afternoon and evening they will have a sale of useful and fancy articles. The English Oil and Gas company has been incorporated in the office of the clerk of Douglas county to do a general oil producing business in Omaha and in Coffeewille, Kan. The incorporators are Arthur E. English, Paul A. English, Otto E. English, John S. Hyman and George H. Snelling. The capital stock is to be \$100,000. Clifford M. Anthony, Charles E. Anthony and George W. Curtis are plaintiffs in a suit against Mary E. Hall, Fred E. Hall and Lucretia W. Smith. The amount in contention is \$1,000, for which the defendants are said February 4, 1904, to have made their notes and to have given a mortgage as security on real estate in Hillside addition. A foreclosure is asked. Shimer & Chase have incorporated themselves to the extent of \$100,000. The incorporators are C. C. Shimer, Arthur Chase, George J. Morris and John S. Piemme. These, with the assistance of M. W. Shimer and F. A. Chase, constitute the board of directors. The business to be carried on in future will not be very much different from that which the firm transacted before its incorporation. George W. Sapp will not at once get his \$200 from Christie Bros. of South Omaha. After considering the matter since Wednesday morning he has decided to sue Christie Bros. after being sent back once with additional information on the accident. The plaintiff was injured in a runaway accident, which he claimed was due to inefficient harness and an old wagon furnished by defendants.

OPEN EVENINGS.

CALL this an extra long jacket—or a short sacque. You'll be equally right for its partly both.

There's more fit to it than to most sacques—and it is just that much more trim. More saving than is possible in a jacket—therefore more freedom. It is useful—warm—comfortable—without sacrifice of style. Like most Gordon Garments, this one comes in many good furs. Most people seem to like it best in Astrakhan—a most attractive skin for almost any garment. The prices begin as low as \$30.00. Gordon Furs are carefully selected by men who know; they are cleaned, stretched and put together in our own light, airy factory. Not a detail is skimmed, inside or out. That's one reason they're as well known in New York as in St. Paul.
