summer of repeated attacks upon and massacres of Armenian Christians by the Kurds and other elements of the Moslem population. These disturbances, attended by frightful atrocities and savage cruelty, resulted in death, suffering and destitution.

The principal object of the visit was for the better protection of American interests there and the timely arrival of Dr. Norton, it is stated, contributed to a peaceful term-Instion. No Americans were known to have been injured.

Dr. Norton says Mush is practically an armed camp, where Armenians are in con-stant terror. He estimates that in the Sassum camp 5.000 lives were lost in last summer's massacres, including 2,171 children. Several thousand refuges who fied to Mush were forced to return to their ruined villages, where the villayet authorities made an allowance of 1 cent a day per capita for food. The question for the moment, he says, is what is to be done to save the surviving population of Sassum, numbering 10,000 or more, from the results of insufficlent protection and insufficient food

He speaks of the American schools and institutions and says the missionaries have much prestige. One salient fact, says the consul, is that the benevolence of citizens of the United States has accomplished more than the efforts of other nations combined in advancing the material, intellectual and moral welfare of the Armenians and other classes in the interior provinces. Tribute is paid to the comparatively small group of American workers. He says the tide of emigration is directed almost exclusively to America, and that there is an increasing number of American citizens who have interests in the disturbed regions.

MONEY IS NEEDED FOR EDUCATION

Schools for Only One-Fifth of Children in Porto Rico.

WASHINGTON, Jan. 22 .-- The annual report of the commissioner of education for Porto Rico, Samuel McCune Lindsay, as made public by the Interior department today, says that at the beginning of the present school year there were approximately 1,200 public schools in operation in Porto Rico, involving the maximum amount that the finances of the insular govern-ment will permit. The report suggests that an increase of taxation is unadvisable. that the receipts from the present taxes will increase somewhat with the growth in value of taxable property and will permit of some slight increase in the school fund.

The report says, however, that the 1.10) schools furnish accommodation for only one-fifth of the population of school age. From \$1,000,000 to \$3,000,000 a year in addition to all insular and local appropriations could be spent profitably on the schools. No money is being spent on educational frills or experiments.

Bee Want Ady are the Best Business Roosters.

Poreign Financial. LONDON, Jan, 2.—The Stock exchange became sluggish with considerable uncasi-ness at the end of the week, resultant on the disturbed condition of affairs in Rus-sia. Continental bourses becoming weak, accompanied by a selling pressure from that quarter, considerably depressed the foreign section here, which recently has been upheld by purchases in Paris and Ber-lin. Despite the fact that a plentiful sup-ply of money is available, for investment, the public is still holding aloof, pending more interest was manifested the last few days in Americane, which were compara-tively bright and firm against adverse con-ditions, the coalers, perhaps, showing most strength. The Reading shares marked a substantial rise on the week, but to the re-ported smallness of available stocks of coal and persistent support in New York. Kaf-firs have been unsettled and weak owing to continental sales and false reports of a strike of Chinese coolies. Foreign Financial.
