This company will open an office this morning in the commission district and will take care of all orders until Its new location shall have been opened. Mr. Dinning said he expects the firm will be in active operation again within a fort-

Mullin & Co., commission mer chants, will reopen this morning at 1207 Howard street; Bingham & Sons, also commission dealers, will be established tem porarily two doors east of the new Mullin location, while Marsh & Marsh will receive orders for the present across the street from the old location.

The Porter-Ryerson-Hochler company has not decided just yet what it will do

in the way of a new location. Several streams of water were kept on the smoking debris yesterday. The water was delivered by lines of hose attached to the new Glazier monitor nozzles bought last year and used for the first time with effect at this fire. By the use of these nozzles three firemen are relieved for each stream of water used, thus enabling the tired fire fighters to turn in after the fire had been extinguished and nothing left but the smoking rulns to cool.

The bill provides that irrigation districts may condemn irrigation ditches owned by private parties and by paying the appraised value of the same take possession of them. It is endorsed by a large number of Scotts Bluff farmers, who have signified their desire to appear before the genate committee and fight for the measure. It will, should it become law, knock out the irrigation project of H. G. Leavitt and turn his interest in the Farmers' Canal company over to the farmers. This company contemplates the construc tion of more than 100 miles of trrigation ditches. The bill provides also that the irrigation districts may issue bonds to pay for the property thus condemned.

The backers of the bill claim that Leavitt and others own about half of the land which will be benefited by the irrigation ditches, and they fear that he intends to farming to which they most seriously object. By all the farmers being intereste in the ditches and being part of the districts they claim there will be less friction over rights and less litigation. The constant problems of life is to try to cultivate breadth without shallowness, just as we want to try to cultivate depth. It seems to me our good fortune that men have been able to combine for ever in doing the Lord's work in charity toward their brethren if we do it with certain differences in the nonessentials. The forces of evil are strong and mighty in this century and in this country, as they are in other countries, as they have been in all the past centuries, and the people who sincerely wish to do the Lord's work with ample opportunity for all their labor in fighting the common enemy and in assuming toward their fellows of a different confession attitude of generous rivalry in the effort to see how the most good can be done to our see how the most good can be done to our see how the most good can be done to our see how the most good can be done to our the probable whereabouts of Johann Hoch, titude of generous rivalry in the effort to the German who is said to have had a see how the most good can be done to our people as a whole.

Strikers They Are Aiding Enemies of Country. ST. PETERSBURG, Jan. 29.-The holy synod has addressed the following circular to the orthodox with reference to recent

events:

At the moment when all should have stood united for the protection of the fatherland, strikes broke out in the capital and other towns, incited by enemies at home and abroad; tens of thousands of orthodox gave up work, determined forcibly to obtain rights which they alleged had been trampled under foot. Many peaceful citizens were deprived of bread and many of their comrades usclessly forfeited their lives. Those who led them astray had in their midst a criminal pricet who impudently disdained his sacred vow and is now before the ecclesiastical court. He was not ashamed to give into the hands of the workmen he had deceived the holy cross and pictures and the church banners which he had forcibly taken from a chapel, in order, under the protection of the sacred relics so dear to the faithful, to lead men to disturbance and some even to death. The most grievous fact is that the disturbances were caused and brought by Russian enemies and that considerable sums of money were received to create civil war, and by drawing men from their work to prevent the due dispatch of land and sea forces to the far east and supplying the active army with all its needs. Russia's enemies are striving to shake down its pillars of orthodoxy and autocracy without which Russia would come to ruin.

What a grief it is that orthoox people events:

should rise against the lawful power, against one another, against their brothers who are fighting in the far cust and against the emperor and empress, who are endeavoring to alleviate the sufferings of the wounded. What a grief it is that orthdox people

The circular concludes with abjuring the people to render assistance t othe authori ties. It says:

Let the clergy admonish their flocks to keep the peace. Let those in power seek the truth and defend the oppressed. Let the rich do good and let the workers obey God's commands and beware of false counsellors, who are the associates or are in the pay of the enemy and desirious of bringing Russia to ruin.

BERLIN, Jan. 29 .- Dr. Theodore Barth. editor of the Nation, speaking of the meeting of literateurs and artists held here Saturday night to formulate plans to secure the release of Maxim Gorky, the Russian author who is confined in a fortress at St. Petersburg, said he hoped the editors, writers and cultivated persons America would petition the Russian government in Gorky's behalf.
