days notice and would not be a proper thing to do.

The Price Current says the winter wheat plant has well maintained its condition through the lard winter. Except in scattering places, it is protected with snow and the weather has done little damage. This is contrary to the belief in some quarters. The Minneapolls mills last week turned out the same amount of four they did the week before, the number of burrels being 28,0%. The amount for the same week of last year was 15,4%. Mills are reported to have ground more than they sold. The reports of dull cash demand in Minneapolls are said to be work on the part of the millers to widen the difference between the May and the spot wheat. The millers are said to be taking out of store and avoiding the tables for the purpose of creating a depression. The northwestern cars. Including Chicago, are heavier again today, being 242 against 230 last week and 241 last year. The Minneapolls stocks have declined 550,000 bushels in five days. Kansas City and St. Louis shipped 155,000 bushels for the week, and also the southwest, making the prospect for a fair decrease in the visible Monday. The primary recipits are 205,000 bushels, against 42,000 bushels hast year.

The cash corn and speculative markets were lively today, with the May reaching 454, by noon, the highest point in some days. The July Wednesday was 454c at the high point; today it was 464c by noon. The cown acceptances at Chicago were the larges in ten days and the cash advanced 54c. One hundred thousand bushels were bought to go east, part of it at 45c over the Chicago May. The clearances are 241,000 bushels. St. Louis continues to send out buillish advices. One house says 50c is being paid for corn laid down at the startons. Every farmer is reported as in the position where he must soon buy corn. It is said to be scarcer than any time since the spring of 182. Peoria reports it has shipped 180,000 bushels,

Strength of corn caused some firmness in the oats market. Trading was fairly active early in the day, but later the market was inclined to drag. May opened unchanged to a shade lower at 30xg to 20xg 20xg. Sold up to 30xg 20xg and closed at 32xg to 20xg 20xg. Sold up to 30xg 20xg and closed at 32xg to 20xg 20xg. For an an an electric was affected also by the report of the departure on a long trip of an influential party of speculative operators. Another influence was the stiffening of the tension of gold exports to France. The cancellation of a part of orders of gold bars which were to be sent out today led to a strong receivery in the exchange market here, to a fall in sterling at Parts accompanied by a stiffening of the discount rate in London. There were renewed inquiries for gold for export. Official intimations that an additional Japanese loan was to be negotiated.

there was buying of stocks here for London account.
The early advance in Pennsylvania and Ontario & Western, the strength of Illinois Central and a renewed rise in the local tractions about exhaust the list of important strong stocks. Some of the Influence of depression was due to discussion of the cost to the railroads of the war in export grain rates. The proposition at Albany to tax stock transfers and the introduction of orporation organizing were influences in the same direction. The discouragement of the buying demand permitted the early gains to be generally wiped out and the market closed easy at about the lowest. The jump of 11½ in Great Northern preferred was without effect in the late market.

most striking features of the recent market is the seeming disappearance of stocks and their failure to come out except at a substantial cultancement in the price.

The pause in the demand today was most apparent, but its couses were obscure. Although the admission to the Atchison directorate of Union Pacific interests is regarded as giving a measure of credit to many rumors of railroad deals, the stocks affected hang back. The same was true of the United States Steel stocks on the conditions reported in that trade, for which a leading authority uses the emphatic term "astounding." That is to say, with production at the high record rate it is still below the rate of consumption as shown by the decline in the stocks on hand during January. The failure to respond by this character arouses the fear on the part of operators that other important developments, which have been rumored, may fail to move prices upon their announcement, come and the part of operators that other important developments, which have been rumored, may fail to move prices upon their announcement, come and the part of the part 55 % 56 % 110 % 102 % 106 121 % 51 % 51 % 52 % 54 % 54 %

hest grades, but vest calves showed very little change.

The market on good heavy feeders held steady, but the common and light cattle were slow and a little lower. The reported storm coming from the west had a tendency to make speculators cautious about getting many cattle or hand that they could not readily dispose of, which explains the weakness on the commoner cattle. there was very little change noticeable in ruling prices.

The cow market was uneven. In some cases steady prices were paid while in others salesmen thought they had to take a dime less than they sold similar cattle for yesterday. The market yesterday though, was uneven, so that it is rather hard to make comparisons. As a general thing, though, the market on desirable grades was not much different today from yesterday average. Trading was fairly active on anything at all good and considering the late arrival of trains the bulk of the offerings was disposed of in fairly good scason.

There was some tendency to pound the market on bulls except in the case of the hest grades, but veal calves showed very little change.

The market on good heavy feeders held steady, but the common and light cattle to were slow and a little lower. The retained at the common grown the west had a tendency to make speculators cautifus tendency to make tendency to
