LOUISVILLE, Ky., Feb. 9.-While conditions resulting from the long continued rain and sleet storm show a slight improvement in the southwest today, there is no betterment of the situation from the Mississippi to the Atlantic coast. The telephone companies in this vast area have been practically out of business since last Saturday night. The telegraph companies' lines are in but little better condition and messages are being sent by trains between cities where communication is interrupted. The

of the General Federation of Women's Clubs:

It is apparent that we cannot undertake to publish routine reports of individual club activity.

A general organ published once a month cannot hope to compete with the daily papers in the matter of local intelligence, nor would it be desirable to do so if we could. We regard the daily and weekly press as the greatest ally of the clubs. It is indispensable to the success of the club movement, both local and general, and therefore must always be encouraged to give club intelligence whenever it is possible." The Bulletin thus outlines its policy of representing in a large way the entire club movement. This is precisely the Intent of a general organ, and the policy carried out, the magazine will become a necessity to every active club in the country.

This appeal for masculine attention meets with heartiest approval: "We ought to remember that it is the busy American man who needs awakening on all our civic and social subjects, even more than do the women. Stop and ask yourself how many periodicals does your husband read which treat in any serious way the problems which we are treating in every number, and practically in almost every page of the magazine you are now reading. The fact is, there are but few such publications of any kind, even when we enumerate the entire number. What wonder if the American man is the easy victim of his political director, who wisely employs every advantage which paper and ink can lay before him and sees to it that no day passes in which the alturing bait is not temptingly held up, as if party leaders and party spolls were the only objects in life worth living for? As an antidote to all this, what are we doing to meet the untiring efforts of self-seeking influences? How long will it take to convince the women and to arrest the attention of the men, at such a rate of progress as this?"

WHAT THE BOOK IS: It is a book that should be read carefully by every American, no matter what his party affiliations may be. Nowhere else can be found expounded the faith and tenets which our fellow countrymen have decided to regard as American, pure and simple, and nowhere else can be found so convincing an exposition of our duties and rights as American citizens. Leslie's Weekly says: "It is worthy of a place in the library of every household." (The book is published by Robert G. Cooke, New York).
