GRAIN AND PRODUCE MARKET

Wheat Quiet, but Loses a Little at Home and Abroad.

JULY WHEAT SLATED FOR AN ADVANCE

Option-Heavy Purchases of Corn-Local Receipts Compare Well.

OMAHA, Feb. 18, 1905. Nothing much doing in wheat today. The market has been overworked for two days and, coming at the end of the week, when the crowd is cautious of being loaded up over hunday, everybody gave the wheat a rest. The may declined Friday from \$1.21 to \$1.10%, and the opening this morning was \$1.10%, from which, for low point, the market reached \$1.10%, The May rained toward the close and ended at \$1.10%. The July did not fluctuate as much as the May, opening at \$1.01%, fropping of to the opening at \$1.042, dropping oft to the eighth and closing again at the half. Foreign markets were wear, Berlin losing 4s. Buda Pesth 5 and Liverpool 5. The extremely large Australian shipments and the talk of heavy world's shipments were the principal causes. The Australian shipments were 2.080,000 busnels, against 1.44.000 the preceding week and 1.218,000 last year.

occord in the east. With this condition movements up and down of from 2 to 3 cents daily are to be expected. There is a less short interest than at the beginning of the week. The foreign speculators have got out of haif of theirs. With the May in such a dangerous condition, eyes are turned to the July and some strong arguments are advanced for being on the long side of it for at least sixty days. No one can, of course, say whether it is to be a new or an old crop future. There is every evidence the May deal will be forced to a successful conclusion. The large market will use all of the wheat and the country will go into the new crop movement with no surplus. This, it is argued, will make the market relatively high until the new winter wheat movement is supplemented by the new spring wheat movement. From this, it is argued, the

NOTICE TO STOCKHOLDERS.

The regular annual meeting of stockholders in The Bee Publishing company will be held on Monday. March 6, 1266, at 4 o'clock p. m. in the office of the Bee Building, corner 17th and Farnam street. By order of the president.

GEORGE B. TZSCHUCK, Sec'y.
F16 diet mase

July will be a good investment. The report of last December showed the winter wheat to have a condition of S per cent against 36 per cent for December, 1993. That was a small crop. The last report also showed a slight decrease in acreage. These things are argued to be builtish and will help the crop scares and damage talk which is to be expected in March and April. The May will have a high range and the crowd will turn to the deferred futures. July, it is argued, will be the favorite, because only the winter wheat crop has to be considered, while with the September there are two. The high price of cash wheat is also figured in as a builtain factor and it is figured the whole situation points to an advance for July in the immediate future.

The corn market has a fairly strong undertone today, but was not very active. The corn clearances were 674,515 bushels. Liverpool was off the on the cheaper American offerings. Armour is thought to have been a heavy buyer of corn during the last few days. In Chicago this morning one commission house bought 500,000 bushels of the May. Wrenn was a large seller around 46%c and 46%c. The primary receipts of corn are 291,000 bushels, against 233,000 last year, and the shipments are 277,000 bushels, against 345,000 last year. The railway blockade is rapidly being cleared out and the cars moved to destinations. Omaha received more cars of corn today than any other market except Chicago, and that market received only 13 more than did the local market.

What the Denver Daily News of Jan. 31, Says of the Rich Strike

on the United Mining and Exploration Company's Modoc Mine-'Fine Vein of Ore Encountered in the Shaft of the

Modoc Property: "Special to The News:--"Central City, Colo., January 30.-While sinking the 210-foot shaft on the Modoc property today, the United Mining and Exploration Company encountered a vein containing a body of ore which assays eight and one-half ounces in gold to the ton. Sinking has been in progress on the Modoc for four months, since the present company has been in charge, but this is the first vein that has been struck. All the other strikes have been deposits and pockets. There is every indication that the vein is continuous, and that the mine will develop into one of the biggest producers in Quartz Hill District."
