There was a period in American history when the senate overshadowed every other part of the government, when, in fact, it bore an importance in public estimation far beyond the functions actually imposed upon it by the constitution. what we are going to do with our foreign most important question that confronts the country today and upon its wise answer will depend to a large extent our future success as an industrial and commercial nation. It is one of the most serious problems with which we have to deal and we must not for a moment flatter ourselves that it can be dealt with carelessly or upon any other than a

sound and sensible business basis. There are certain well-established trade principles that we must recognize

and unless we do this we shall certainly as a consequence lose some of the trade we now enjoy. One of these essential principles was pointed out by Mr. Mc-

That was the view of one of the greatest advocates of protection to American industries and labor that this country has ever had and his counsel, uttered only a few years ago, ought to be still

remembered and honored by the American people. So far as our foreign relations are concerned they are in a political way most satisfactory, but commercially they can be very materially improved and this can be done by following out the McKinley idea, the wisdom of which is universally recognized.

## BEEF TRUST BENEVOLENCE.

report is little less than a vindication upon every point at issue.

With the government acting in such an impartial spirit, the great combinations have little reason to make objections to the tendency to closer supervision of their operations. The packers have not been in so comfortable a position in years as now, and doubtless they would be glad to have

the situation remain just as it is. But that is hardly possible. There are some things that still excite popular suspicion. The profits upon the business do not seem

count for the great personal fortunes to ac that have been drawn from it. Congressman Lorimore referred to some of the great merchants who would not be satisfied with less than 10 per cent profit on their opera-

tions, and probably made nearer 20 or 50. But how is it that at these high figures in the instances quoted, the acquisition of wealth does not progress faster than in the beef business with its 2 per cent of profit? The public makes its deductions from broad, general facts, and it will doubtless take more than the commissioner's report

will probably blow over, as 'similar moods of black inquietude have done in the past ever since the white colonist appeared. Spain is gradually waking up to the conclousness that is is better off than it was before the war, and that to have cut loose

from its troublesome and unprofitable colonial possessions was the most prosperous thing that could have happened to it. Its domestic industries are reviving; its factories at Bilbos and Barcelona and other points are more active than they have ever been before, and there' are everywhere signs of a genuine industrial awakening. such as Spain has not known for many a generation. It harbors no grudge against us on account of the late war and its territorial losses. On the contrary it has come to regard both not as a calamity, but port is substantially correct, what is the as a bleasing in diaguise. It is gratifying government going to do about it? If the that the wounds of war have healed so readily and that the proud and valiant and interesting old nation, set in the front of eral law, can national authority afford to such a glowing historic background, has
