Ministers Take a Hand.

The Ministerial association this morning refused to endorse the municipal prohibition ticket, but as a substitute to this proposition voted to circulate a petition in an effort to secure 2,550 signers pledging themselves for no-license candidates. After the required number of signatures are secured the prohibition nominees are expected to resign and new men to run on no-license platform will be selected at a mass meeting.

This bill was prepared by the state as-sociation asking for sidetracks to be built to elevators off the right-of-way, when within four feet. The intention being to get around the supreme court ruling that you cannot condemn public property for a private purpose under the right of eminent domain. We simply ask them for a side-track when we have to build the elevator-within four feet of their right-of-way, be-lieving that this bill would be constitu-tional. If the railroad company so desired

Food Authority

Joseph, Mo.

A FAMOUS ENGLISH PHYSICIAN (WHO RE-QUESTS THAT HIS NAME BE WITHHELD FROM PUBLICATION) SAYS OF

Grape-Nuts "In cases of slow digestion, lack of stomach tone, and debility, this food is invaluable."

Now for the reason:

The great bulk of human food is starch in some form-bread, pastry, potatoes, rice, cereals such as oats, wheat, rye, barley, etc.

This class of food supplies "energy" if it be properly digested, but there's the rub. Starch and sugar in food are digested by the liver and intestines. When these organs are overworked or become weak, then the food is not entirely digested and lies in the warm moisture of the body until it decays, producing gas, and therefore disturbance and incipient disease of the liver and intestines and frequently appendicitis.

To meet this trouble Grape-Nuts food was invented. In it the starch part of wheat and barley is transformed by long soaking, warmth, and time into sugar-just the same method as the body employs in digestion. Hence when one eats Grape-Nuts he eats a pre-digested food, ready for immediate digestion and assimilation, supplying the body with the needed food elements in a Auble and delicious form.

The London "Lancet" says:

"The features worthy of note in our analysis are the excellent proportion of protein, mineral matters, and soluble carbohydrates per cent. The mineral matter was rich in phosphoric acid. 'Grape-Nuts' is described as a brain and nerve food, whatever that may mean. Our analysis, at any rate, shows that it is a nutritive of high order, since it contains the constituents of a complete food in very satisfactory and rich proportion and in an easily assimilable state."

The food is naturally pre-digested by heat, moisture, and time. The diastase is thus produced, and the transformation of starch into sugar accomplished.

A prefect food for persons with weak intestinal digestion and who need, but cannot fully digest, ordinary bread and starchy food.

For athletes, brain-workers, or the weakest babe.

(For infants, pour hot water over three or four teaspoonfuls of the food. Use that water with a trifle of the food dissolved in it.)

"There's a reason."

Miss Jessie Mover gave a Cramb humorous recitation, and then followed one of the most pleasing addresses ever delivered before the members of the association. It was by Dr. Charles Fordyce, dean of Wesleyan university, Lincoln, and was on the subject "That Boy; the Problem of the Age."

No less than five business houses have been entered and goods abstracted in the night time since the Hagenmaster burglary, which occurred on the evening of March 9. Our people are getting somewhat aroused over the matter and if a tragedy is enacted here citizens will not be surprised. Different theories have been advanced in regard to the matter, the generally accepted one being that it is someone well acquainted with the lay of the land.
