Spearfish Company Plans Improvements to

Its Cyanide Plant.

WORK ON GILT EDGE IS RESUMED New Method of Handling the Slime is Proven Satisfactory in Tests Which Have Been Re-

cently Made.

DEADWOOD, April 2-(Special.)-The many is arranging to place a new set of finishing roots in its cyanide mill. This ew set of rolls is rendered necessary in order that the ore discovered on a lowe level may be treated satisfactorily. This ore is less porous and harder than that which the company has been working on, and it is necessary to crush it much finer, which renders the treatment more complete and thorough and has lessened the capacity of the plant, so in order that the capacity may not be interfered with the new ils will be introduced. Ore is being taken from both the upper and lower levels to supply the mill and the company is making very satisfactory progress.

Operations which were suspended several weeks ago in the Gilt Edge-Maid mill were resumed on Sunday morning. During the time that the plant has been idle a number of important changes have been made, and the company hopes that this will be but the beginning of a long run before and this will be crushed and run through another shutdown. After running for a time when the mill was first started it was seen that some alteration would have to be made in the method of handling the slimes, and this has, it is believed. been satisfactorily accomplished, for tests made of the present system seem to have proven its efficiency. At the mine holsting machinery has been established, an upraise having been made for that purpose, so that the company is in a better position to handle its ore quickly and cheaply than before.

The Queen of the Hills Gold Mining and Milling company has increased its holdings near Deadwood by the purchase of three claims from E. P. Farnham, the Pride No. 3, Pride No. 4 and Pride No. 5, situated adjoining the original holdings of the company on Whistler guich. This now gives the Queen of the Hills an acreage of 160 acres, on which much development work has been done. It is the intention of the company to begin so soon as th weather settles development of its ground on a more extensive scale, and it is said that all arrangements to this end have been made. President McClure of the company, who has been in the Hills for several weeks, looking after its affairs, left for the east last Tuesday, and before going stated that the mill, upon which work was started some time ago, would be completed just so soon as men and material could be got on the ground.

From Hidden Treasure to Big Four. P. T. Baird has resigned as foreman of the Hidden Treasure Gold Mining company and will take charge of the operations of the Big Four company when it starts up early in April. When work is again started on the Big Four sinking will be resumed in the main shaft, which is now down 179 feet, and has been idle about a year. Mr. Baird had charge of the work while the shaft was being sunk, and also did considerable drifting from the 170-foot level before the fire of last winter destroyed the hoist and air compressor plant. Operations are being continued on the Hidden Treasure property, Nate Hart, one of the heaviest owners in the property, assuming

the management. At a meeting of the Puritan Gold Mining company, held in Deadwood on Wednesday the last the general manager was instructed and authorized to take immediate steps for the installation of a cyanide retreatment plant at the company's milling plant at Strawberry. The present plant of the and company consists of a twenty-stamp mill and concentrating tables, in which the company has been treating its ore to save principally the silver and lead values it was known to contain, not paying much attention to the gold values, but since it has been proven that the gold values are worth more than the sliver and lead combined the old tailings heap that has accumulated from the operation of the mill considered as so much waste will be both carry free gold in large quantities.

Finds Two Rich Veins. In the crosscut drift from the 100-foot ... a 735 am a 8:20 pm from the shaft. In its course two free Mr. Frank B. Lyons, who has been an a 3:20 pm milling veins of ore were cut, one showing employe of the house since the Fifty-fourth b 3:48 pm b 1:30 pm a width of twenty feet and the other a congress, and who received the unanimous width of fifty-seven. The ore which has nomination for the office, will undoubtedly been encountered in the Cambrian formation shows good values and the shoot is proving to be a large one. It is said that the management contemplates the erection do a friend a favor he does not hesitate of a treatment plant on the ground this

> LEAD, S. D., April 2.-(Swectal.)-Checks for the double dividend which the Homestake Mining company began paying in March were received in Lead on Thursday and many thousands of dollars were distributed among its people. There are a large number of small shareholders in the company living in Lead, their holdings avernging about 150 shares, and the 50 per cent dividend every month is something that they look forward to. Many improvements have been made in the mine and mill by the company during the last year am or more, and today it is one of the most complete factories for the manufacture of gold that there is in the world, for manufacturing is the proper word, its operations being on so large a scale that another

term would not properly apply. Superintendent Wade of the Globe Mining company has left for the east for the purpose, it is said, of purchasing machinery for the new mill which the company is building on its property a short distance south of Lead. The mill building has been practically completed, but it has not yet been decided what sort of a plant to purchase and it is for this reason that Superintendent Wade has gone east. At the present time but one shift of miners work is confined to blacking out ore. On the 500-foot level there is a large quantity a 6:00 am of ore in sight, and even now it would be possible to supply a plant of 100 tons WEBSTER DEPOT-15TH & WEBSTER daily capacity without much trouble. Cyanidation is probably the process which will be fixed on for the treatment of the ore, which will, it is said, be first treated in a Chilian mill. The Globe company is well equipped for deep mining, having a to the fame of that state. In some quarcomplete hoist, air compressor, uses air tors here the matter has been taken seridrills and lights its working by electricity. Gasoline is used to generate power and

> Will Ship Clara Belle Ore. CUSTER CITY, S. D., April 3.-(Special.) -Eastern stockholders in the Clara Belle property have been in Custer City for the dent Herbert of the company, and the re- ness, and as a class sailormen are the sult of the talk has been that several most superstitious people to be found anytons of the ore taken from the main where. If a ship were christened with oil shaft, which is now down 200 feet, will be they would swear that it was bent on shipped to Denver for a test run. On the sliding into the arms of 'Davy Jones' the ground is a two-stamp Tremaine mill, first time a squall hit it and the sailorwhich for a time treated ore taken from a men would be powerless to keep it affort drift on the 200-foot level, but the process | Personally, I do not believe that the gov

MINING IN THE BLACK HILLS shaft continued and the vein at the pres- after the Sunflower state with set and even than where worked near the surface. A test run of the ore will also be made at the company's plant shortly and if satisfactory a more complete mill will be

erected: KEYSTONE, S. D., April 2-(Special.) Placer mining on Rapid river will soon begin in earnest, A. L. Richards, who is perating for an eastern company, has started a large force of men at work on the ditch, which will furnish water for the Richards placer ground along that stream. last summer were very profitable, making handsome returns for the money invested. Spearfish Gold Mining and Reduction com- Two miles of the ditch has already been completed and another mile has been surveyed and is now being graded. This ditch is eight feet wide at the bottom and, where flumed, is four feet high, and where turned into the creek will have a fall of 100 feet. It is estimated that it will require four years to hydraulic the bars oming under the ditch, and when that work has been completed it is said that the company will continue the litch almost to Rapid City, where it will establish a plant for the generation of electricity and hen distribute the power to surrounding towns and camps.

Machinery for Canton Mine. On the first of the week a sixty-horse power botter, sinking pump, feed pump steam hoist, Blake ore crusher, ore feeder amaigamating plates and other machinery was delivered at the Canton mine at H0 City and is being erected at the mine There is about 2,000 tons of ore on the dump Huntington mill. This ore was taken out during development work, and it will be used in a test run. Much of the values in the Canton ore is found in a free state but a great deal of them are saved from the concentrates. The ore returns very

high assays. Sinking is being continued on the proprty of the Dakota-Calumet, and as mathine drills are in use it is going down pretty fast. The workings have now reached a depth of about 100 feet, the shaft ing sunk between two well defined ledges which show on the surface, and when the required depth shall have been reached drifting will be started to tap both ledges if it should be found that they do not come

ogether before. ROCHFORD, S. D., April 2.-(Special.)-Operations on the property of the Golden Vest Mining company, located a short distance from Rochford, will begin the last of the present week, and the mill, it is said be started on ore taken from the mine, provided that the water ditch which fur nishes the power can be kept open. The mine is in a fair state of development, having on it a shaft eighty feet deep and about 500 feet of tunnel work. The ore is free milling and will be treated in a Chillan mill capable of handling 100 tons day. Some time ago a test was made of the ore in a mill of the same make, only much smaller, and it is claimed that the run proved that this kind of a mill was practicable and that it would save the alues in the ore. Power will be furnished by a water ditch two miles in length.

SAME OFFICERS FOR HOUSE "Hog Combine" Will Hold Sway Again in Extra Session of Congress.

(From a Staff Correspondent.)

WASHINGTON, April 2 .- (Special.)-Now that it is definitely announced that the president will call an extra session of congress early in October, the old-time membeen quietly dropping into Washington os-tensibly to look after the interests of their constituents, but really to hold conferences over the organization of the official force of any change in the officers of the house ful enough to resist all attacks. The "hog speech. combine" as the combination of state dele gations is known, which has rendered the existing organization possible, is still intact. Made up as it is of the delegations from Illinois, Pennsylvania, New York, Ohio, Michigan, New Jersey and Wisconsin, with a total vote of 131, five more than a majority of the republican caucus, it is plainly futile for any outsider to break and the dump which heretofore had been of course, will have the speakership. Penninto that powerful combination. Illinois, sylvania will name the clerk of the house worked over, as repeated tests show that and there is no other thought than that the veteran Major McDowell, former member of congress, and who has filled the position since the Fifty-fourth congress level of the Minnesota Mines company on will again occupy his accustomed place Deadwood gulch the face is now 200 feet New York will name the doorkeeper and be retained by the New York delegation. Mr. Lyons has made a most efficient officer He is polite and courteous and if he can to go to the front. As doorkeeper he has a number of "fat" places under him and these are eagerly sought for. He has distributed these places with much discernment over the country and in consequence has a strong following outside of the "combine" which has run the house, so far as the officers are concerned, since the Fifty-

fourth congress. Ohio will keep Captain McElroy ,a civil war veteran and long time politician, in the postmastership. New Jersey is thoroughly well satisfied with W. J. Browning who has been chief clerk since the Fiftyfourth congress, and Representative Harry Loudenslager political adviser. Mr. Brown ing is probably the most generally liked man in the lower house. He is exceedingly affable, easily approached and is "business" from the ground up. It is doubted if the office of chief clerk has ever been filled by a man who has given more universal satisfaction than Mr. Browning. His duties are multifarious in character. He not only carries important messages to the senate, which is really but a minor feature of his work, but makes purchases for everything about the south side of the capitol. He buys every piece of furniture for every room set aside for representative purpose. He buys every typewriter and the coal, and in fact everything which is not looked upon as permanent in character. He handles hundreds of thousands of dollars annually and during the years he has filled the position of chief clerk has not lost a dollar, a record of which he may justly be proud.

It was announced in eastern newspaper the other day that the governor of Kansas had announced his intention of having the new battleship Kansas christened the crude petroleum that has recently added ously and an official of the Navy department, speaking of the governor's intention the system which the company has put to use oil instead of wine, said: in has given the very best of satisfaction absurd to talk of christening a new battle ship with oil instead of champagne. No sailor man would think that it had ever been properly launched were the usual custom omitted. In fact, I doubt if could get a body of 'Jack tars' to sall it ast week or more consulting with Presi- it. The launching of a ship is serious busi-

the Navy department would refuse the request if made. The old 'seadogs' who are at the head of the various bureaus of the Navy department know the superstitions of sallormen better than anybody and they never would think of sending a ship into the arms of 'old ocean' christened with oil instead of wine. I look upon the sugges tion that oil be used as a huge joke growing out of the action of the Kansas legislature to erect an oil refinery of its own in that state and forcing the Standard Oil This company owns four miles of bars and people to look elsewhere for its market. In many quarters the suspicion exist In many quarters the suspicion exists that the United States Brewing association is giving support to the movement to impose a duty on coffee and several members of congress stand ready to insist that If such a duty is to be enacted it shall be accompanied by an increase in the internal revenue tax on beer. They point out that the profit on beer is so great that when the additional \$1 per barrel tax was imposed during the Spanish war the price of beer to the retailer was scarcely affected, while to the consumer it remained the same, in other words, they claim that when the tax was repealed it merely transferred \$30,000,-000 annually from the United States treasury into the pockets of the brewers. The time has now come, they say, to reduce certain customs duties and to have a general readjustment of the tariff and internal revenue laws, and in the shakeup to increase the tax on beer at least 50 cents : barrel, which will add \$15,000,000 annually to our revenues. There is more or less talk of increasing the tax on alcohol, but

it is discouraged as various commissioners

are inclined to believe that an increase in the tax on it will meet with general approval. At the annual dinner of the Five o'clock club, a famous dining club of the Quaker City held the other evening, a number of exceedingly funny things occurred. The Five o'clockers are anything but serious minded folk and they endeavor in a quiet way to make their guests feel perfectly at home by interrupting the speakers and holding conversations with them to the enjoyment of everybody but the speaker, Senator Gamble of South Dakota was one of the distinguished present. It was Mr. Gamble's first appearance in the club life of Philadelphia and he knew little or nothing of the ways of these easterners who get humor out of every wind that blows. Mr. Gamble mounted his legs to tell them something about South Dakota, incidentally remarking that the state which he represents in the senate is richer per capita B. than any other state in the union; that it was remarkable for its mines, its scenery and its general intelligence.

'Yes, and remarkable, too, for the number of its divorcees," said a red-headed fellow sitting across the table from him.

"Yes, and a great many of our clients come from Philadelphia," replied the senator. He had made good and was allowed to finish his speech without any more interruption.

Senator "Tom" Carter of Montana was there, as was ex-Senator Thurston of Nebraska, Weather Bureau Moore, Director of the Census North, Steamboat Inspector Uhler, Frank P. Sargent, chief of the bureau of immigration; Dr. Harvey Wiley, of pure food fame, and other department chiefs from Washington. When Thurston arose to talk the little red-headed fellow bers of the house of representatives have said, "You sin't going to reproduce your

of the Fifty-ninth congress. So far as feathers out of the "eagle's tail" when the can be ascertained there is little likelihood persistent red-headed cuss said, "You sing piles all the week, so that each day's offer. better than you talk, John," and Thurston and the existing organization seems power- was compelled to sing the rest of his

M'CRACKAN TALKS TO THRONG Christian Science Leader Tells of

Serene Sense of Security Felt by Believers.

W. D. McCrackan, one of the American leaders of Christian Science doctrine, loctured Sunday afternoon to probably 1,500 people at the Auditorium. While a majority of the listeners were women, there was a substantial sprinkling of men Children were in the audience, too, but not

Premising that the study of Christianity. and thus of Christian Science, properly begins with the study of God, Mr. Mc-Cracken asked, What is God? Answering his own question, he said it is just coming to be recognized that the mental, moral and physical health of man is affected favorably or adversely according as God is understood to be Spirit and Love, as the scriptures declare Him, or supposed to be a God of wrath and variableness, as the human mind has too often imagined Him. Christian Scientists, he said, do not believe in a God of this kind. Knowing that God is not limited by human attributes at all, they have a screne sense of security knowing that He is the infinite source of supply, that man has perpetual access to an ever flowing fountain, and no worry nor anxiety obtrudes itself upon their con-

Speaking of the works of Christ, Mr. Mc-Crackan said: "Christian Science emphasizes with special insistence that Jesus' promises and injunctions were meant for all men and for all time, and were not intended to be confined to a particular set of men known as his disciples and apostles, nor to a limited period of time, vaguely

nign or malignant, and it is significant

spoken so clearly and tenderly to this age. need not say that all I have been able to tell you about Christian Science is derived from a study of the illumined works of this good woman. Born in New Hampshire, of New England parents, she was well educated in her youth, early displaying exceptional capabilities; that she was specially spiritually endowed; and that | 5 the whole trend of her life has been marked by a search for God and the desire to ex-

press Him, and Him only. "As a result of this search she made her discovery of Christian Science, and since then her activity has been principally directed toward the promulgation and preservation of Christian Science. In the course of this labor she has written works which have illumined the scriptures for a vast multitude of earnest men and women. She has emphasized the cardinal point in the history of primitive Christianity, namely, the spiritual healing, which, during successive centuries, was seemingly allowed to lapse and become obsolete."

For the week receipts have been very light, there being a falling off as compared with last week amounting to about 3,000 head and to about 5,000 head as compared with the same week of last year.

plies all the week, so that each day's offerings met with ready sale. The more desirable grades were, of course, sought after the most and showed the greatest improvement, but still even the common and part fat kinds are selling considerably better than they were a week ago. Taking everything into consideration this has been about the most satisfactory week in the cattle market so far this season. Good to choice steers are quotable from \$5 to \$5.80, fair to good from \$4.60 to \$5 and the shorter fed and commoner kinds from \$4.50 down.

The cow market has also been active and

and commoner kinds from \$4.50 down. The cow market has also been active and stronger all the week on the more desirable grades and such kinds may safely be quoted \$635c higher than they were the latter part of last week. The demand for the common and medium grades, however, has been rather limited, with packers apparently indifferent as to whether they got such kinds or not, so that it was impossible for salesmen to advance prices on those kinds to any extent. There is, however, some slight improvement over the prices some slight improvement over the prices ruling a week ago. Good to choice cows and helfers may be quoted from \$3.46 to \$4.50 and something prime would bring more than that. Fair to good grades go from \$2.90 to \$3.25 and common to fair from \$1.90 to \$3.75.

The market on bulls is also a trifle better than it was a year ago. The commoner grades sell mostly from \$2.25 to \$3 and the better grades from \$3 to \$4. Veal calves have responded to the advance on other classes of cattle and choice yeals are now

ling up to \$6. he stocker and feeder market has been The stocker and feeder market has been rather irregular this week owing to the fact that the demand from the country has been uncertain. The choicer kinds can probably be quoted about steady, but aside from that the market has been slow and prices are unevenly lower for the week. Good to choice cattle are quotable from \$4 to \$4.65, fair to good \$3.50 to \$4 and common stuff from \$5.50 down. Representative sales:

550 2 50 8 1096 4 00 593 3 15 27 1062 4 05 1040 3 25 COWS AND HEIFERS. 940 4 30 BULLS. 1.....1100 3 10 CALVES. STOCKERS AND FEEDERS.

nor to a limited period of time, vaguely designated as the early Christian era.

"We feel that our view of the matter is proved correct by His promise: 'He that believeth in Me, the works that I do shall he do also; and greater works than these shall he do.'"

Of the healing of disease the speaker said it is not likely that, at this late day, there could be found anybody who has not at least heard of a case of physical healing through Christian Science. "There is no limit to the power of Truth. It asks not whether the case be acute or chronic, benign or malignant, and it is significant that many, if not most of the case is significant that many, if not most of the case is significant.

nign or malignant, and it is significant that many, if not most of the cases healed by Christian Science are those which have been pronounced incurable by the physicians."

In closing, Mr. McCrackan paid an earnest tribute to Mrs. Eddy as "That noble woman, the discoverer and founder of Christian Science, through whom God has spoken so clearly and tenderly to this see. f last year there is a decrease of about to any great extent this week, but clos-ing prices are a trifle higher than those in force at the close of the week, which makes this the high day of the year to date. Wheat Loses Again, but Enmored Gates Will Fut it Up.

TIME FOR DROUTH DAMAGE NEWS TO CROP

Chicago Men Have Out a Long Line of May Corn-Receipts to Drop Sharply Next Week with Higher Bate.

OMAHA, April 1, 1988. Although the tip is out that there will be shornly something doing in the May wheat nothing was noticeable in its action today, and it rather lost ground than adwheat nothing was noticeable in its action today, and it rather lost ground than advanced. The range was from \$1.134 to \$1.124, against \$1.105 and \$1.134. Friday. The July lost a cent from Friday, the high and low being \$84c and \$1.34. Friday. The July lost a cent from Friday, the high and low being \$84c and \$1.40. Liverpeol closed with a loss of from Me to '80. Paris declined 10 centimes and Berlin '80. At the close Friday night the May was \$6 from the high point for the crop and the July was 145c below, the spread letween the two being 25c, or the largest of the crop. The Idea seems general that Gates and his crowd are about to do something and the market continues very nervous. The Wall street holdings in Chicago are 18,00,000 bushels and over \$000,000 bushels in New York, where they bought 20,000 bushels in New York, where they bought line out is believed not to exceed \$00,000 bushels in New York, where they bought in Milwaukee at a profit of 5c, who was required Friday to put up a margin of 19c. There is continued talk of a slump in northwestern wheat receipts and many well posted men have gone on record as believing April will see he more wheat coming into Minneapolis. The zimneapolis contract stocks of wheat amount to 4.25c. 000 bushels, a decline of \$5,000 bushels. The oright weather is preparing the crowd to bear drouth damage stories. Kansas leads oday, and it anced. The CHICAGO LIVE STOCK MARKET Cattle Strong to Ten Cents Higher-CHICAGO, April 1.—CATTLE—Receipts. 200 head; market strong to 10c higher; good to prime steers, \$5.40\overline{9}.40; poor to medium, \$4.25\overline{9}5.25; stockers and feeders, \$3.00\overline{9}5.00; cows, \$2.75\overline{9}4.75; heifers, \$3.00\overline{3}5.25; canners, \$1.60\overline{9}2.50; bulls, \$2.75\overline{9}4.25; calves, \$3.0006 15. HOGS-Receipts, 2,000 head; estimated Monday 35,000 head; market shade higher; mixed and butchers, \$5.2025.374; good to choice heavy, \$5.3025.40; rough heavy, \$5.15 \$5.25; light, \$5.1025.30; bulk of sales, \$5.25@ contract stocks of wheat amount to 4,302, 000 bushels, a decline of 55,000 bushels. The bright weather is preparing the crowd to hear drouth damage stories. Kansas leads out today with the first crop damage talk since the winter killing and the Hessiah fly were introduced, and it is now said liarper, Summer and Sedwich counties will not raise more than a haif crop, and Kay county. Oklahoma, is also bad. Minneapolis has worked 230,000 burrels of flour for the Orient this week, mostly red dog. Two million bushels of cats and barley have been sold by the country in three or four weeks to Japan. The primary wheat receipts are 312,000 bushels, against 643,000 bushels, and the shipments are 186,000 bushels, against 567,000 bushels. The Australian shipments are 1,388,000 bushels, against 1,154,000 bushels last week, and 1,128,000 bushels as and less was Decombed est. 5.35.
SHEEP AND LAMBS—Receipts, 2,000 head; market steady; good to choice wethers, \$5,256% 25; fair to choice mixed, \$4,500 5.30; western sheep, \$5,0006.25; western lambs, \$6,000 7.85; native lambs, \$5,5007.50. Kansas City Live Stock Market.

Kansas City, April 1.—Cattle—Receipts, 100 head; market unchanged; choice export and dressed heef steers, \$5.40\tilde{0}6.10; fair to good, \$4.25\tilde{0}5.25; western fed steers, \$4.50\tilde{0}6.00; stockers and feeders, \$0.0\tilde{0}5.00; southern steers, \$3.75\tilde{0}6.00; southern cows, \$2.50\tilde{0}4.00; native cows, \$2.25\tilde{0}4.50; native heifers, \$3.25\tilde{0}6.25; bulls, \$2.60\tilde{0}4.25; calves, \$2.50\tilde{0}6.00; receipts for the week, \$0.800 head. Hooss—Receipts, \$3.00 head. market ic higher; top, \$5.37\tilde{0}5; bulk of sales, \$5.20\tilde{0}6.35; heavy, \$5.30\tilde{0}6.37\tilde{0}5; packers, \$5.25\tilde{0}6.35; pigs and lights, \$4.35\tilde{0}6.25; receipts for the week, \$4.800 head.

bushels, and the shipments are 136,000 bushels, against 567,000 bushels. The Australian shipments are 1,385,000 bushels against 1,154,000 bushels last week and 1,125,000 bushels. Broomhall estimates the world's shipments of which at a 1,560,000 bushels. The corn clearances are 200,000 bushels, of which New Orleans sends out 611,000 bushels. The speculative market was a little släck, the May ranging from 47% to 40%c, against 47%c to 41c Friday. The cables gave the market no support. The cash market is generally stronger today. Chicago took all the corn offered at from ½c to 1c up, No. 3 selling at 46½c and 47c to the amount of 200,000 bushels. Of this 75,000 bushels was for eastern domestic shipments and the rest for export. The corn trade is talking of the large holdings of Bartlett-Frazier-Patton combination, which is estimated at between 12,000,000 and 15,000,000 bushels. The Chicago estimated receipts for Monday are 338 cars, which includes Sunday also and are from the Northwestern, being Nebraska grain. The last of the low rate corn is not in yet, as Chicago receives 212 cars. Kansas City, 47; St. Louis, 44, and Omaha, 91. The figures are Being watched with interest and it is expected the receipts will dwindle to a very low point in a few days. The primary receipts are 567,000 bushels, against 535,000 bushels, against 530,000 bushels, and the shipments are 652,000 bushels, against 530,000 bushels.
