TOPEKA, Kan., April 10.-Commissioner of Corporations Garfield announced tonight that the investigation of the Standard Oil company in Kansas would be started at once. The hearings will all be secret, and no intimation of the commissioners' work will be made public until the report is given out by President Roosevelt, Commissioner Garfield today held conferences with Governor Hoch, Attorney General Coleman and United States District Attorney Dean. All the information gained by these officials was placed before him and he regards it as sufficient to start to work on.

In reply to a question Commissioner Garfield said that he had been working on the oil situation for several months. He said:

The early agitation in Kansas interested The early agitation in Kansus interested me, as it is practically a repetition of what we went through in Ohio several years ago. The relations of the production of crude oil to demand is naturally a very important matter in this investigation. The Blandard Oil company seems to have raised the cry of over-production as a defense against the charges and this claim is one of the things that we will go into very carefully. public seems to overlook. The fact that the profits resulting from a price fixed through an agreement are small is not material. The mere fixing of any price or the attempt to fix any price through agree-ment is in violation of the anti-trust law. In the Beef trust inquiry the Martin reso-lution directed the department to make an investigation regarding the profits of the ground covered by the campaign and the proof, or lack of proof, has no relation to a charge of violation of the law. The same things could be true in the case of the Standard.

Mr. Garfield intends visiting the oll fields in Oklahoma, Texas, Colorado and Callfornia before he makes his report.
