The Civic Improvement club, which will hereafter be known as the Omaha Improvement league, at the meeting held last evening in the rooms of the park board in city hall, is about to undertake a campaign against what is called the growing evil of billboards, and this not with the idea of wholly removing them, but for the purpose of regulating their construction and the character of the signs and pictures that are or may be displayed on them.

While the committee that has the matter in charge is not yet ready to report a definite plan of action with the recommendaof the changes that should be made, question, all of which indicated that the league will oppose the boards that are known as double-deckers; those that are raised from the ground and those that exhibit pictures that are considered offensive to good taste. The report states that the Omaha street railway system as a whole is as good as will be found anywhere in ertain features of the service admit of some improvement. Extensions to Riverwas commended as being good to the extent now in practice, but the committee believes the system could be extended so as to admit of transfers being secured to certain parts of the city on lines in addition to those on which transfers are now allowed. The lack, of proper ventilation of the cars is attributed to the failure of employes to do their duty, as also the failure of employes to be uniformly courteous to the traveling public. The report states that some employes are disregardful of the rules of the company in the matter of treating passengers with due consideration. Attention was called to the practice of some employes not holding their title of monsigneur and was conferred for will pour in from all over Nebraska and cars at transfer points until passengers distinguished services in the cause of parts of lows in numbers that will surhave time to change from one car to another.
