STARTS ASSESSMENT WORK

Pullman Valuation to Remain Same as Last Year.

COMPUTING VALUE OF GRAIN MEN

Total Purchases of Year to Be Divided by Twenty-Four as the Average Investment of

(By a Staff Correspondent.) LINCOLN, Neb., May 2 .- (Special.)-Tolay the State Board of Equalization decided to stand by Secretary Bennett's ircular calling for a computation of grain lealers' average capital by taking the total purchases for a year and dividing by twenty-four. The board also listened to the plea of T. A. Polleys, tax com missioner for the Omaha road for a reduction of its assessment from \$8,500 to \$7,000 a mile, and practically concluded to leave the assessment of the Pullman company where it was last year.

This last work was done with open doors, very unusual proceeding for that body. and one indicating a desire to defer a measure to the demands of the public that it be permitted to know that there is no juggling with the figures, and to become acquainted with the method of ombination employed. Mortensen suggested that there was no need to study over the Pullman statement because under the law the company could not be taxed on its franchise. He said he was sorry because he thought the company ought to be increased from 50 to 100 per cent. but that matter would have to await a legislative amendment to the present law He said that he had not made a formal motion, and Galusha offered one, but Searle asked for time to study the statement in order to find out what It meant, asking

the secretary of state if he knew. "No," replied that official, nor would inderstand it in forty years, nor would anyone else. Mortensen pointed out that through the deficiency in the statute, the company's meager statement complied with the legal requirements. The assessment last year was \$93,900.

Rule for Grain Men.

At a hearing granted the representatives of all the large grain purchasing interests of the state, who wanted to advise the board as to the proper method of compuexcellent condition and the streams and ting the average capital, considerable diversity of opinion developed and the board finally intimated that it would stand by Bennett's circular requiring the division of the year's business by twenty-four. Bennett says that as nearly as he can approximate grain men do business about twentyfour weeks out of the year and turn their capital over once a week. He admits that the rule is arbitrary, but says that something must be supplied to make up for the deficiency of the statute. County Assessor Miller of Lancaster county has been assessing grain men's capital on the assumption that a division by twenty would give a fair average.

> To Tax Fraternals. Today State Treasurer Mortensen intro luced a resolution under which the board would instruct assessors to assess the property of fraternal companies except where expressly exempt under the statutes. Secretary of State Galusha, who is an officer of the Ancient Order of United

Both Secretary of State Galusha and Deputy Secretary of State Fred Miller denied that the Polk certificate had been presented to them. The case is purely formal and for its purposes it is stated by those interested in the determination of the question Galusha is willing to stand by the allegation that he refused to receive the focument. The friends of the biennial election bill are already predicting that the court will be obliged to reject the suit be cause the issue is formal and does not in volve a substantial right. On the other hand, it is claimed that the court, because of the great public importance of the questions involved, will assume jurisdiction and

Everyone Should Use Hyomet and Kill the Germs.

No other season of the year is responsible for as many cases of catarrh as the Spring The warm days and cold nights, with their frequent and sudden changes in temper ature, bring the catarrhal "snuffles" nearly everyone.

The germ-killing and health-giving Hymei, when breathed through the pocket nhaler that comes with every outfit, penetrates to the most remote cells of the air passages and respiratory organs It searches out and kills catatrrhal germs in the head, throat and lungs, soothes and heals the irritated mucous membrane, and absolutely drives catarrh from the system. Not Entirely Satisfied

The ruling of the attorney general as to the taxation of collateral is not giving entire satisfaction. A member of the State Board of Equalization said that it would result in decreasing the assessment roll because hitherto the person pledging collateral was required to pay taxes on the full amount and also on the money secured as a loan, while under the new ruling the liability for taxes extends only to the amount by which the collateral exceeds in value the loan. Deputy Attorney General Thompson stated today that this was the only ruling he gould make, since otherwise it would result in double taxation.

Norfolk Buildings Accepted. The State Board of Public Lands and Buildings has finally accepted the new buildings at the Norfolk asylum, over which there has been considerable controversy because of alleged defects in the eilings. The contractor, the Capital City Brick and Tile company of Des Moines, agreed to give \$500 for the construction of a new ceiling, and the board remitted the penalty of \$25 a day for the delay in the completion of the buildings, which would, after allowances had been made for various delays, have amounted to more than \$2,000. It was remitted on the theory, so Secretary of State Galusha says, that the former board in letting the contract had agreed to give the contractor the material in the old buildings and that in consequence he would have a claim against the state for \$10,000. It was this latter claim which aroused the ire of Treasurer Mortensen last fall. The bid of the Nichols Roofing company to repair roofs at the penitentlary for \$700 was accepted.

FLATTSMOUTH-Mrs. I. S. Wooster has returned from an Omaha hospital, where she underwent an operation for the removal of a pin from the thumb bone of her right hand. About fourteen years ago, while washing clothes, Mrs. Wooster's hand came in sudden contact with a pin, which caused a slight flesh wound near the second joint. It was not known until a few days ago that a piece of the pin still remained lodged near the bone, and, fearing blood poisoning, the patient was advised to go to a hospital for the removal of the pin, which has been successfully accomplished. Although so many years have elapsed, the patient experienced no pain in the thumb until this spring.
