WEATHER OF THE GRAIN BELT Light Rains North and Heavy South-Fair in Central.

Fair in Central,

OMAHA, May 22, 1995.

Light rains fell in the extreme upper Mississippi and Missouri valleys within the past twenty-four hours and are falling in western North Dakota and eastern Montana, this morning. Heavy rains are reported in the lower Missouri and lower Mississippi valleys and guif states. The weather is generally fair in the central portions, and is generally clear in the mountain districts.

The weather is slightly warmer in the central valleys, but is cool in the western sections, with heavy to killing frosts in Utah, Nevada, Idaho and western Montana. Omaha record of temperature and precipitation compared with the corresponding day of the past three years:

CHICAGO GRAIN AND PROVISIONS

Prices on Board of Trade.

CHICAGO May 2)—Covering by frantic shorts today caused a sensational advance of 6 cents a bushel in the price of corn for May dilivery and 4 cents in the price of May wheat. Rumor of an attempt to corner all corn for May delivery was the main reason for the sharp buige in the price of corn. Part of the advance was lost on profit taking At the close May corn was up 45c. May wheat is up an even it. July outs are up 15c. Provisions are a shade to be lower.

**NEW YORK, May 22—The tone of speculative sentiment underwent an abrupt fransition during the course of loday's trading in stocks. Defined rumors of a financial institution in trouble circulated at the course of the course of loday's trading in stocks. Defined rumors of a financial institution in trouble circulated at the day. The influence of receive on account of the strength shown during the morning. Last week a heavy liquidation and the apparent rehewal of it in the close ling hours saturately left interestation of yery neavy seiling to be faced. The good resistance offered by the market this morning to the market this morning to the market this morning to the commitments on the long side of the commitments on the long side of the commitments on the long side of the offered commitments on the long side of the commitments of the long side of the long side of the commitments of the long side of the long side of the commitments of the long side o week of the new Northern Pacific directorate may be accepted as the definite conclusion of any harmony plans that may have been in contemplation and any accompanying hopes of the high values to be developed in all nortwestern stocks by a comprehensive plan to conserve all interests. There is a disposition to account for the persistent and determined liquidation as being due largely to the retirement of holdings acquired at one or another stage of the attempted settlement in the northwest. Another important sentimental into the attempted settlement in the northwest. Another important sentimental influence was the renewed weakness of the
United States Steel stock. Reassuring assertions from authorities in the trade of
the light importance to be attached to the
present luli in that trade are of little effect
on sentiment in face of the practical weakness of these stocks in the market and the
prevalence of doubts of the stability of
the iron and steel trade brings into quention the whole business outlook. Raliroad
traffic officials admit some falling off in
business on account of crop uncertainties
and the strength of wheat today on the
weather in the southwest augmented this
influence. Some of the weakness of special stocks were attributed to the renewed
campaign by advertising methods in favor
of selling stocks. There was the usual
short covering on the day's decline, but
pressure was renewed and the closing was
casy.

Bonds were weak. Total sales, par value.

Dry Goods Market. NEW YORK May 22—DRY GOODS—The market is easy and buyers are evidently not interested except for nearby deliveries and in small lots. Prices, however, are very firm and the tendency on many lines is toward radically higher quotations. These, however, the buyer is inclined to combat and although he is paying asking prices to secure deliveries he does not do it willingly and fears that the future may show a lower level
