ST. PETERSBURG, June 5 .- The Rus sian government has shown that it has not weakened in this hour of disaster. According to the Russ the result of th abors of the Bouligan commission, which has now been printed and submitted to the commissioners, does not embody a definite plan for the organization and functions of a new governmental body, but rather a collection and classification of the necessary data for the formation of an assembly, giving alternative views of the various points in dispute and leaving the final decision in the hands of the ministers. The material gathered by the commission has been grouped under six heads: First, historical survey of the forms assumed popular representation in Russia from the fifth to the sixth century; second, conideration of the effect of the summoning of a popular assembly on the country under present circumstances; third, the extent to which suffrage shall be granted, whether in universal, educational or property qualifeations, and whether classes and occupations should be represented; fourth, the extent of the assembly's right to interpolate ministers; fifth, the extent of the asembly's 'rights over the budget; and lastly, what provinces of government should ba removed to the competency of the as sembly.

Thus nothing regarding the "imperial fouma" has been predetermined, Minister Bouligan reserving the right to give his pinion to his co-ministers.
