Independent pipe lines owned and controlled by home people. Carrying Kansas and Oklahoma oil to the navigable waters will checkmate the present organized brigand of Wall street oppressors, who are practically stealing the rich products of honest toil in the oil fields by their cutthroat monopoly prices, brought about by their fair prices and false promises to the producers at the commencement of the development of the oil district. Owning its own production and its own pipe lines, the Uncle Sam Refinery maintains a solid lineup for success, and victory is certain.
