Water Works Case

PAPILLION, Neb., June 15 .- (Special.)-At the last meeting of the Town board of Springfield, Tobe Nicholson presented a bill of \$1.252.76 as a balance due him on the waterworks plant. He alleges that according to his specifications a contract was to have been entered into within ten days after the bid was accepted, and on that account he ordered material for the construction of the plant at once. The bonds not being sold, the contract was not made for several months, necessitating him shipping the material back. During this period he asserts prices increased on material so much that he lost an equal amount to the above figure on the deal when he was compelled to re-buy. The board states that Nicholson accepted the job subject to the sale of the bonds, and that if he made any purchase beforehand he should be the loser. They threw his claim out. Citizens say the board may sue Nicholson on his bond on account of the plant being unsatisfactory.
