A voting trust is created by the stockholders in any corporation putting their stock into the hands of a certain number of trustees who vote for them at the annual meetings, elect the directors and the people of the United States should give up their right of suffrage, and trustee the voting power in the hands of three, five or seven men, who would elect the president, we would have a condition analagous to that and the navy has just finished drubbing existing in a corporation which is under the control of a voting trust.

There are times in the history of nations when the condition of a country becomes such that it is necessary to put all power into the hands of a dictator in order to restore public order. There are times in the history of a corporation when as a first step towards rehabilitation after bankruptcy, it is necessary in the interests of the property and ship to restore order and earning power. As soon as a corporation is put upon its feet the voting trust should cease. Otherwise it becomes only an expedient for the concentration and perpetuation of power. It has been one of the gratifying signs of the times that in the past two years so many voting trusts have been ended and the power of suffrage restored to the stock-

BITS OF WASHINGTON LIFE.

Minor Scenes and Incidents Sketched on the Spot. Manufacturers of rival typesetting ma-

chines are in Washington boosting the temperature around the government printing office and the White House over a contract for new machines. Public Printer Palmer made a contract for seventy-two Lanston machines. When the news of the contract reached the Mergenthaler people they hurried to the White House with a bunch of grievances and prevailed on the president to hold up the contract pending an inquiry. The claim of the Mergenthaler people is that the contract for the Lanston machines was let irregularly and in sup port of this they quote a section of the statute which provides that the foreman of printing and the foreman of binding shall make requisition on the public printer for supplies required and that these shall be issued when so requisitioned. It is alleged that there was no requisition in this case from the foreman of printing for the Lanston machines.

The Lanston people are greatly pleased with their success in getting the contract, and are confident that it cannot be interfered with. They point to the fact that there are now batteries of both the Mergenthaler and the Lanston machines in the government office, and that the Lan ston has secured the big contract on its merits after trial.

On the other hand, the Mergenthaler peo ple insist there was no competition for the contract at all,

General Palmer himself says he is con inced that the Lanston is the better machine for book work, which he wants to put the new machines to. He says he does not fear the result of the investigation, and that the contract was let after severe tests of both machines.

The mature timber on the national forest eserves is to be offered for sale. This nnouncement is in line with the declared purpose of the Department of Agriculture o develop the national forest reserves by The restriction formerly laid on the exportation of timber from the states in which the forest reserves are situated has been removed, and the law now places no limitation on the shipment of timber grown on any forest reserve, except those n Idaho and the Black Hills reserve in

The effect of this change in the law and the declared policy of the Department of Agriculture is that the timber on the rerves may now be cut and disposed of to the highest bidder. On many of the reserves there are great quantities of mature timber, and on some of them the facilities for getting it out at a reasonable cost are excellent. The forest service. which has charge of the administration of the reserves, is anxious to begin the cutting of this mature timber as soon as possible, and it is prepared to consider offers from lumbermen who wish to under-

St. Paul Republican: What a great many farmers have suspected for years is given expression in a suit filed at Blair by T. W. Worral against the Nebraska Grain Dealers' association and thirty-eight other elevator concerns. Mr. Worrall, who admits that he is a sort of Tom Lawson in that he was for many years connected with a "regular" firm of grain buyers, alleges an ironclad combination which even include many of the so-called "farmers' elevators," the purpose being to control absolutely the price of corn, wheat, oats, barley and rye regardless of legitimate conditions which are supposed to govern the markets. He claims that he recently went into the commission business at Omaha independently, soliciting patronage from elevators all over Nebraska without discrimination on account of "irregular ity," which, being interpreted, means independence of the trust. The result of this action was a boycott with damages A voting trust is, therefore, a method of the professional games of ball here is alleged in his petition at \$128,600. Mr. Worrall holds the railroads equally responsible with the Grain trust for these abuses and cites numerous instances where they failed grant elevator privileges without discrimination. The progress of this suit will be watched with great interest. If it results in breaking up the combine and inaugurating an era of actual competition among grain buyers the farmers of Nebraska witi be richer by millions of dollars.
