Corn Takes Back Sent and is Weak on Decrease in Export Demand -Onta Lower, with Moderate Request.

OMAHA, June 28, 1966.

The interest of the trade centered in wheat today and corn was a side issue. Rain in Minnesota and the Dakotas and in the Canadian northwest was responsible for the higher opening of wheat with a big number of trades. July was steady most of the session around 91%c, the closing quotation. September showed its greatest strength before noon, when it stood at 87%c, or 1%c shove yesterday. It closed at 87%c. December finished at 88%c55%c.

Corn save way to wheat in volume of trading. It was weak on account of the falling off of the export demand. July closed at 85%c, old July at 56%c. September at 56%c, old September at 56%c. December at 16%c on did December at 51%c.

Outs were lower in July and September, with moderate demand. December gained %c, July closed at 25%c, September at 31%c

Bartlett, Frazier & Carrington wired to Sunderland & Updike: "Wheat men in the northwest seem determined to ruin the next crop with rust. They are looking for it in every state in which spring wheat is raised and report promptly any damage they can possibly find, but with such unanimous feeling the probability is they will entines the public and it looks as if they would send wheat higher.

Broomhall cabled from Liverpool that wheat was strong on reports of rust and unfavorable climatic conditions in the northwest. It opened '4d higher and closed 140% higher. There was a good demand for cargoes off coast. Fears of manipulation in Chicago caused higher opening of corn and further advances were scored. There was a poor spot demand. The close was 3,673d higher.

Minneapolis wired that the state weather

was 4.674d higher.

Minneapolis wired that the state weather and crop report this week says: "The temperatures were low most of the week in most parts of the state, with light frosts in northern and central portions on June 22. The lowlands are very wet and all meadows are flooded. Crops on these soils are either suffering considerably from the excess of moisture or they are already drowned out."
