WASHINGTON, July 8.-China's req to be represented in the Washington of ference on the ground that it is vitally in terested in its proceedings, has been received by the president and informally transmitted to the belligerents. Whether the president has received the formal replies cannot be learned, but it can be that while Russia is inclined to favor the suggestion, Japan will not consent to it. Japan has already made public its assurance that Manchuric is to be restored to China. That is one of the principles for which it says it has been fight-Japan regards itself as fully onpable of executing this promise without the assistance of China and in view of China's inability before the war to cope with Russia in Manchuria, the Tokio government is unable to see what possible assistance a Chinese representative would be in the Washington conference. Moreover, the Japanese have all along taken the position that when peace negotiations were egun they would be conducted directly with Russia. It is altogether unlikely that the Washington government will press the claim of China and the official view here fails to sympathize with the idea.

Probability of an Armistice. The last week has seen few developments in the plans for the negotiations. Negotiations for an armistice are not expected to be concluded until after the plenipotentiaries meet. It is pointed out again that the beginning of the rainy season in the war zone removes the necessity for the imiediate signing of an armistice. Little doubt is fe, however, that this will be the first subject discussed by the plenipotentifries and probably their initial act will be the signing of a protocol providing for the cessation of hostilities for a limited

BERLIN, July 9.-(Special Cablegram to The Bee.)-It is a popular delusion that the STATEMENT OF POSTMASTER GENERAL German emperor is a very rich man. Inasmuch as the matter of money and of wealth is purely relative if the kaiser should be placed in financial comparison and competition with some of the kings of Europe or some of the American captains of industry he would be called a poor man. For, he has the greatest difficulty in making both ends meet. It is true that he has an annual income of approximately £1,000,000, but it should be remembered that he has tastes luxuriant and expensive as well as unique. People generally imagine that he receives a salary in his capacity as German emperor just as the president of the United States receives a salary of \$50,000 yearly. As a matter of fact Emperor Wil-liam does not receive one farthing in his capacity as German emperor, but fulfills the duties of this honorary position free of charge to the federation of German states. The kaiser draws his income first as king

Many of the facts regarding the poverty the emperor's resources were brought tht in connection with the recent marof the crown prince. funds during the past year. Though Emperor William receives no income as emperor of Germany, his income as king of Prussia amounts to about \$4,000,-000 per annum. The emperor of Russia re-ceives an annual allowance of approximately \$5,000,000 and the emperor of Austria an annual allowance of more than \$4,000,000. Both of these monarchs receive additional allowances for certain definite purposes, and both of them own vast landed estates far superior in acreage to the German emperor's possessions. The Associated Press representative inspected the Kniaz Potemkine after the withdrawal of the Roumanian guard. Despite the efforts of the Roumanians to get things in shipshape everything aboard the battleship was still in a state of wild disorder. The officers' cabins were stripped of everything of any value and bloodstains were everywhere. There was sufficient ammunition aboard the Kniaz Potenkine to have enabled the mutineers to make a desperate resistance.
