Corn Prospects.

YEAR'S BUSINESS TO BREAK RECORDS

Cottons Keep Advancing and Lines tre Senree-Coffee Attracts Interest-Still No Run of Sockeye Salmon Reported.

Omaha jobbers see in the large wheat crop and the good prospects for corn, ladications that their fall and winter trade will be the largest they have ever experienced. The farrests already seem to have planty of money and the first six months of the year, have order the record for trade. July shows a marked improvement over the same month of last

Trade is very active with the grocers and the dry goods people, and as bents the season, quiet with the hardware and shoe dealers. Good fall orders are being sold by the dry goods johbers. In hardware there is a large demand for seasonable goods, although the summer is well advanced. Naturally lawn mowers have had their day, but other hot weather articles are still selling. In all lines the dealers are gratified with the collections.

Cotton Prices Up. Local dry goods jobbers are kept very busy filling advance orders. Some delay in delivery by the manufacturers is still occasioning a difficulty in filling orders promptly. The scarcity of all descriptions of cotton goods makes the market strong. Mary advances have been made during the past week. Goods are on a basis fully 19 per cent higher than they were two months ago, and on the average 5 per cent higher than they were at the opening of the months ago, and on the average 5 per cent higher than they were at the opening of the present month. In the last thirty days the prices on brown and bleached cottons have advanced to to 12½c. All the new values that have been announced on gray goods, bleached cottons and heavy coarse cloths are being rigidly maintained. No advance in American prints has yet been made, although a general change in those lines and competing ones is looked for.

Numbers of buyers have reached the

Sugar and Coffee,

The sugar market remains unsettled. Prices are lower than a week ago. The condition has been brought about partly by lower prices on the raw material and partly by the lower freight rates which have been in effect for the last few days. Jobbers look for a better feeling as soon as rates are adjusted, as the trade is on the eve of a heavy consuming period. They would not be surprised to see prices higher.

higher.

Cheese is firm, with an actual advance of the con all grades. The demand has been unusually heavy, a fact caused no doubt by the harvest. It is expected that present prices will be maintained for some time

owing to the scarcity of coffee sevens have advanced \(\frac{1}{2} \) of in a week. The movement of the crop has been disappointing so far and this years' business has not fairly started. Only four vessels are on the way from Brazil, when ordinarily at this time there are three or four times that many. If the movement doesn't start in two weeks it is predicted that there will be exciting times in coffee and higher prices. The Brazil markets are slightly easier, but the prices are still too high to permit of buying on a cost and freight basis. Toward the latter part of the week there were reports that offers of Brazilian coffee had been made in Europe at slightly lower figures.

The general tone of the salmon market is decidedly firmer on account of the continued reports of "no run" of sockeye salmon in Puget sound. Jobbers are showing a disposition to accept the possibility of a small pack of sockeyes, and are turning their attention to Red Alaskas. A few salmon have made their appearance in the straits, but as the season is three weeks late even with a heavy run the packers would not be able to make the pack estimated earlier in the season. There is a would not be able to make the pack esti-mated earlier in the season. There is a marked firmness on spot chinooks, particu-larly flats and halves, due to the certainty of a short pack on the Columbia river. Spot sockeye talls and flats are very scarce. No reports regarding the Alaska pack have come in, but this does not cause any un-casiness.

Gallon apples are in a very strong posi-Gallon apples are in a very strong post-tion, owing to the small amount of goods available at the present time and because of the poor outlook for apples this fall.

Tomatoes, both spot and futures, are alrmly held. The disposition now is for an advance of 24c a dozen more and the job-ters are looking for a still further advance, owing to decreased acreage in the cast and a very unfavorable crop outlook. Advices from Utah convey the information that the growing crop has been damaged by blight, from Utah convey the information that the growing crop has been damaged by blight, some advices say fully 60 per cent. But with their carry-over it is entirely probable that the packers have enough to care for their trade. Canned peaches are firm, but no great interest is noted. Pears are very firm and apricots steady.

California Bried Fruit.

Evaporated apples continue to advance under an active demand, coupled with the positive information that the crop will furnish less than 50 per cent of the quantity available last fall. The market is a little easier on evaporated apricots, because of the near approach of low-priced goods. Dried peaches on the coast are held at prices a triffe higher than those quoted last week. The extreme hot weather continued for more than a week in California and for seven days the mercury stood at 100 in the shade. It resulted in cooking the apricots on the trees and caused the fruit to ripen very rapidly. Orchardists were unable to cure the fruit and consequently there will be a shrinkage in the output of dried fruits, at least those of first-class. This will undoubtedly make it necessary to advance prices in strictly high grade goods, but there will be much more low grade goods to offer than is the usual thing. Frunes have advanced, both spot and futures. California Dried Fruit.

Prunes have advanced, both spot and futures.

Telegrams from the coast confirmed the earlier reports that the ruisin packers are bidding the high figure of 3½c for raisins in the sweatbox. So far no large buying has been done at that figure. The advices are taken to confirm reports that a strong competition in packing quarters exists. The outlook for the 15% crop is reported favorable for a normal yield.

Rice is unchanged and the demand is good. No change in the conditions governing the growing crop are reported.

The oatmeal market is strong, but there have been no changes in price for the week. Syrup is unchanged.

Regarding lima beans, a large New York dealer says: "The stock of lima beans on the coast is now practically cleaned up. There may be about 3,000 bags scattered around through the bean district, but this amounts to nothing. Last year at this time the carryover was 10,000 bags. Conditions for the new crop are favorable and the acreage is large. The crop will be late, however, and there will be no September shipment."

Canned beans are likely to be higher. Bad

shipment."
Canned beans are likely to be higher. Bad weather in Michigan and other bean-growing districts will curtail the crop.

CONDITION OF OMAHA'S TRADE A WATE STORES INC. 2 White, MORE STOCKS AND BONDS

CHICAGO GRAIN AND PROVISIONS Jobbers Pleased with Wheat Crop and Features of the Trading and Closing Large Volume of Realizing Sales Thrown Prices on Board of Trade.

CHICAGO, July 22.—A hot wave fore-casted for the northwest caused a strong finish in the wheat market here today. At the close the September option was up MC%c. Corn is down MC%c. Oats are prooficely unchanged. Provisions are 7%9

providedly unchanged. Provisions are providedly unchanged. Provisions are 74.9 for lower.

The wheat market showed greatest strength just before the close. At the opening the market was quite irregular, initial quotations on September being achigher to be lower at Sayagouac. While cables were considerably higher the market lacked the sustaining influence of any definite news regarding alleged damage to spring wheat throughout the Dakotas and Minnesota. The absence of any fresh damage reports from that territory had a tendency to induce fairly active profit taking. As a result prices reacted about leduring the first half hour, September deciding to 80c. Later reports were received partially contradicting the sensational advices of yesterday and this tended to hold prices at a lower level. In addition the continuation of a liberal movement gave bears further encouragement total primary receipts today being 1.04.000 bushels compared with only 500.000 bushels a year ago. Just before the close prices experienced a sharp rally, September advancing to 90%c. The market closed strong and active with September at 90%g005c. Clearances of wheat and flour were equal to 25,000 bushels. Minneapolis, Duluth and Chicago reported receipts of 200 cars a year ago.

Trading in the corn pit was fairly active.

chicago reported receipts of acc cars a year ago.

Trading in the corn pit was fairly active. Sentiment throughout the day was rather bearish as a result of the easier tone of wheat. General news from the country was favorable to the bears, the new crop being reported in satisfactory condition. Local receipts were larger than estimated yesterday and this helped to degrees values. The market closed easy. September opened to higher to the lower at 55140 to 5540, sold between 35436515c and closed at 5514655c. Local receipts were 240 cars, with 55 cars of contract grade.

Early weakness of wheat started profit taking in the oats market, resulting in some reaction in values. An easier tone governed throughout the entire session. September opened a shade higher to 14594c to lower at 2514cc, sold off to 254c and closed at 2514cc, sold off to 254c and closed at 2514cc. Local receipts were 137 cars.

Provisions were weak under persistent

competing ones is looked for.

Numbers of buyers have reached the market and a few large fall bills have been sold. Collections are good.

Shoe dealers do not have much to say during their quiet season. They are busy shipping out their fall orders and are satisfied with the prospects for future business. Some light orders for summer goods are coming in from retailers who purchased small stocks in the spring. Leather holds high, but the last week has shown no real advances, although there is a tendency to withdraw concessions aircody made.

Sagar and Coffee.

it really is when compared with a week ago.
Feeding cattle of good quality and weights appear to be in a little better demand, but they would naturally show some weakness in sympathy with the decline of beef steers. On the other hand common kinds of stockers and feeders are hard to get rid of and it seems like they have been lower every day this week. Taking all kinds into consideration the feeder market is just about 10%15c lower than it was a week ago. FRUITS AND MELONS.

BHEEP—The market this morning was practically bare of supplies as usual on the last day of the week. As regards the trade for the week there is not much that can be added to what was said yesterday. The sheep market at all points has suffered a severe break, due apparently to the heavy failing off in the demand for mutton consequent upon the hot weather that has prevailed in the large consuming centers of the country. Packers have found it impossible to force mutton into consumption in anything like usual quantities, which means that they have not been in a position to buy freely of either sheep or lambs. At all market points both sheep and lambs have been coming faster than they were wanted. There could be only one outcome to such a state of affairs and that was the break in the market.

At this point the decline for the week

head; sheep steady; good to prime lambs in light supply and steady; common and me-dium grades extremely slow and a fraction lower; sheep, \$3.00@4.75; lambs, \$5.00@7.00; dressed mutton, slow, 7@cc per lb; dressed lambs, \$4.00[2]%c. HOGS—Heccipts, 1,004 head; none on sale and feeling firm.

Wool Market.

BOSTON, July 22.—WOOL—The Commercial Bulletin says of the market. The volume of business done has been most satisfactory, all wools on hand being generally active. The tone of the market is as strong as ever and the successful opening of the finer grades of goods at New York has rendered the position more stable. Belegions are well broken up. Oregon, Wyoning, Utah, Idaho and fleece wools having had a lively movement. All sales have been at full prices and in some cases the highest values of the year have been received. Australian wools have also been active. The shipments of wool from Boston to date from December 29, 1904 according to good authority, are 133.67.35 pounds, against 115.450.27 pounds at the same time last year. The receipts to date are 20, 676.460 pounds, against 23.501.260 pounds for the same period hast year.

LONDON, July 22.—WOOL—The arrivals of wool for the fifth series of auction sales amount to 28.703 bales, inclinding 2.500 forwarded direct to spinners. The imports this week were: New South Wales, 2.111 bales; Queensland, 224 bales; Victoria, 39 bales; New Zealand, 2.267 bales; Victoria, 39 bales; New Zealand, 2.267 bales; Cape of Good Hope and Natal, 1.725 bales; Marseilles, 1.757 bales; Boston, 26 bales; Various, 345 bales.

bushels, compared with 530,000 bushels a year ago.

From the Inter Ocean: "The corn trade has figured it out that the Armour interest has 6,000,000 bushels of July corn bought through various commission houses, the trade being handled in such a roundabout way that it has been difficult to locate the real source from whence the orders came. This is supposed to include the large line of corn taken in for the Pringle house this month for Ames-Brooks. If the theory of the trade is right, there may be a surprise in the next ten days."
