suggestion of establishing a colonial de-partment will call forth all the opposition to "imperialism" that has been pent up to some extent or which has lain dormant while other questions have absorbed the public mind. But it has become apparent that under some name-colonial or insulara new department of the government, with a cabinet officer at its head, must be created. The detached possessions of the United States in the Pacific and Atlantic oceans, and in the strip of land connecting hose oceans, are of sufficient importance partments were given to the new departto engross all the attention of one man and ment. Bureaus which had nothing to do would keep him very busy if he attend d with the collection and administration of to them properly. With the exception of the revenues of the government, such as Hawaii, Porto Rico and Guam, the least the life saving service, the immigration important of the island possessions, they service, the steamboat inspection service are now under the War department. This and the statistical service, were placed unentails too heavy a burden upon one man, ' der this department, and with satisfactory who would have enough to do by taking results. The secretary of the treasury was care of all the business that naturally falls relieved of a large amount of work which to the head of the department which administers the affairs of the army and all that pertains to it.

the close of the Spanish war the United States was in possession of Cuba, Porto Rico and the Philippines, and naturally administered the governments of departments are necessary. No one man these islands through the army, which had can attend to all the important business taken possession of the islands. They were of a growing department, especially if ruled by the military until civil govern- the business of that department continues ments were established. During this period to expand. Nearly every department was there was built up in the War department a bureau through which the affairs of the selands were conducted, and it has been there were no bureaus of either the War guite natural to continue this machinery in or Navy departments that could have been operation and continue the control of the transferred, nor was there any desire to islands and the bureau of insular affairs take from either of these departments any under the secretary of war. The islands of their functions. But the growth of the must be under some cabinet officer, and why remove them from the War depart-and the building and administration of the ment? is the question asked, and which cannot be answered save to say that if they a separate department. are territories they should be placed under the Interior department, as has been done with Hawail and Porto Rico.

The construction of the Panama canal has also been placed under the control of the War department; not that it belonged there more than under any other department, but it had to go somewhere, and the president preferred that it should be under Secretary Taft rather than any other cabinet officer. The Canal commission is administered through the bureau of insular ffairs. Here we have the Philippine government and the isthmian canal, two of the greatest and most important fields of operation engaging the attention and onergy of the people of the United States, department. If a cabinet officer should the great civilian work that some cabinet give all his time and attention to these creat questions he would be fully occupied. yet he must also manage the affairs of the army, with all the increased duties which the best man for the place. The last dehave occurred since the War department was created.

Question of Name.

A colonial department, or an insular de- lowest in importance by any means. No partment, if that would be less harsh to one would think of saying that the Departears that are sensitive to the imperialistic ment of Commerce and Labor was of less word "colony," seems to be necessary. Of importance than the Agriculture, Interior, ourse, the canal is not "insular," but for Justice, or even the Postoffice departments. administrative purposes in the War de- If there should be a department of colonies partment it is such now. Of course, a to control the island possessions and the

as any bureau could be. But there were reasons for leaving out the Interstate Commerce commission. That body was supposed to be a quasi-judicial body, sub tent to no one and ought not to be subordinate to a cabinet officer, and in its opinions and orders it was not even sub-

ordinate to the president. The Department of Commerce and Labor was made a "catch all." Bureaus necessary to the government which had been attached haphazard to other dehad nothing whatever to do with the collection and expanding the money of the government.

old December at 30%c. Oats closed with July at 31%c, September at 2%c and December at 30%c. Liverpool closed 1%d higher on wheat and %d higher on corn. Minneapolis has been the center of the rust excitement. The speculative and ele-vator interests were buying there yesterday and the shorts were stampeded. Prices ad-vanced 5%c. The big shorts there have been covering for two days and the buil leaders are said to have increased their holdings. Friday night prices were up 13%c from the week's low point. Chicago had advanced %c from the work's low point. Chicago had advanced %c from the week's low point. Chicago had advanced %c from the week's low point. Chicago had advanced %c from the week's low point. Chicago had advanced %c from the week's low point. Chicago had advanced %c from the week's low point. Chicago had stransfer the state of the low point of Monday, and the July September spread, which showed a disposition to narrow early in the week and was 2%c, had widened to 3%c at Friday's close. The Inter Ocean, which has been investi-gating black rust, reports on its own ac-count, says today: "Developments in the black rust scare in the spring wheat soc-tions of the northwest were highly sensa-tional and greatly exaggerated yesterday. The great combination of builish interesse at Minneapolis, who are said to be loaded with high priced wheat, are flooding the county with the wildest kind of reports about black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that there is black rust. There is no doubt that the Growing Needs of the Country. As the country grows and the business increases it will be found that additional Panama canal would seem to necessitate

The Philippines and the canal are far removed from the army. There is no relation between them. The reorganization of the Canal commission, giving all the power to three civilians, was a step toward divorcing the canal from the mili-The whole tendency is toward a tary. nonmilitary administration and control. The canal is under the War department for convenience and because the president wanted a man like William H. Taft to have immediate control of its affairs. For a similar reason Taft was made secretary of war. A man was wanted who could administer the Philippines. Taft was not made secretary of war because he was a great warrior or was an expert in army matters, but because he had experience in nistered through a bureau of the War the Philippines and was well fitted for spring, 88c. Omaha Cash Prices

When Corn is down surged. Units are practically unchanged. Provisions are Test like lower. The wheat market showed greatest strength just before the close. At the opening the market was quite irregular, initial quotations on September being the tables were considerably higher the mar-ket lacked the sustaining influence of any definite news regarding alleged damage to spring wheat throughout the Dakotas and Minnesota. The absence of any fresh dam-age reports from that territory had a ten-dency to induce fairly active profit tak-ing the first half hour. September de-clining the first half hour. September de-clining to first half hour. September de-clining to first half hour. September de-clining to first half hour sensitional ad-vices of yesterday and this tended to hold prices at a lower level. In addition the continuation of a Hheral movement gave bears further encouragement, total pri-mary receipts today being 1.048,000 bushels compared with only 520,600 bushels a year ago. Just before the close prices experi-enced a sharp rally. September advancing to 90%c. The market closed strong and active with September at 90%gB%c. Clear-ances of wheat and four were equal to 22,000 bushels. Minneapolis, Duluth and Chicago reported receipts of 302 cars against 176 cars hast week and 270 cars a year ago.

Chicago reported receipts of 302 cars against 175 cars hast week and 270 cars a Year ago. Trading in the corn pit was fairly active. Sentiment throughout the day was rather bearish as a result of the easier tone of wheat. General news from the country was favorable to the bears, the new crop being reported in astisfactory condition. Local receipts were larger than estimated yesterday and this helped to depress values. The market closed easy. September opened by higher to be lower at 5546 55%c, sold between 554555%c and closed at 554565%c. Local receipts were 200 cars. With 55 cars of contract grade. Early weakness of wheat started profit taking in the oats market, resulting in some reaction in values. An easier tone prevalled throughout the entire session. September opened a shade higher to 'a@isc and closed at 25%c. Local receipts were 137 cars. Provisions were weak under persistent Provisions were weak under persistent Provisions were weak under persistent selling by commission houses. Confirmation of yellow fever at New Orleans was one of the weakening influences. A decline of 10c in the price of live hogs was an addi-tional bearish factor. At the close Sep-tember pork was off 10c at \$12,\$7½. Lard was down 7½@Floc at \$7.12½. Ribs were 10c lower at \$7.77½. Estimated receipts for Monday: Wheat, 131 cars; corn. 275 cars; oats, 149 cars; hogs, 2000 head.

WORKED A PIPE DREAM

Woman Fabricates a Story of Coming Marriages and Gets a Large

Wardrobe.

An Indianapolis girl conjured up a remarkable fabrication of stories, sensationally and pathetically reciting the

and then, after having accomplished her

partment_of Commerce and Labor was created, and a new department to be called Islands and Canals" might be provided.

the question of name is a matter of detail. What is apparent is that the Philip- public. pines and Panama canal are out of place in the War department. Neither are under military control nor have aught to do with war. They would as properly be under the control of the Navy department as the War department had it not been for a train of natural circumstances. The construction of the canal and the administration of the has been established and acknowledged in the Philippines. The army has less to do than it had during the pioneer days of the west, when Indians were on the warpath. Consequently, there is not the least necessity for keeping the management of the Philippines under the war secretary. At present there is no other place for them to go-that is, no practical place. Besides, a change of administration from one department of the government to another is not made unless for good reason and by authority of congress. The authority of congress would be in an act creating a department of colonies and placing the government of such possessions as are not expected to become states under its jurisdicion, and also making the Canal Zone a colony in the method of its government. Such a department would be one of the most important in the government, much more important than the War department with the Philippines and canal removed from its jurisdiction.

While there are strong reasons for creating a new department and better administration would no doubt result from so doing, yet it would be difficult to bring it about. In the first place, the support of of Justice well known until he was transthe president and secretary of war would ferred to the State department. In the Mcbe necessary, and in the next there would be serious opposition in congress to adding another department to the nine cabinet places now in existence. At the same time the subject is being discussed and urged in some influential quarters. Ten years ago neither the Philippines nor the canal were features of our government. Today they are the most important features, and both have been added to a department of the government which was already fully occupied with important business.

Creating New Department. Departments of the government with a cabinet officer have been created from time to time as the growth of the country one kind or another have been created as separate organizations, but it has been found necessary in time to attach them to some department so that this business may be taken direct to the president when occasion demanded. Some bureaus have been allowed to remain independent. even when the latest cabinet position was created, but for the most part every new pureau created by congress has been attached to some department in order that it may be controlled by a man of sufficient importance to be a member of the president's official family.

The interest of the United States in agriculture was first vested in a commission and was administered as a bureau of subordinate proportions. But it grew tear was waking, and various means were em by year. Bureaus and divisions were t eated. It was a vast machine and the determination was reached to make it a department of the government with a cabinet officer. No doubt the men in con- of the case is that she remembers the greas representing agricultural districts incidents of her girlhood up to the time were glad to do this for the benefit of that she fell into the trance. Her body their constituents and to add some dignity is fairly well nourished, but her hair has to the great industry which is the founda- turned white. On being shown a mirror tion of all prosperity.

The last department to be created, Com- clared that the image it reflected was not merce and Labor, was at first designed to her own. be only Commerce, but the new department was to include the long established bureau of labor, and the labor representa- it in the For Exchange column of The Bee tives made it quite plain that they would want ad page.

importance. For years to come the Philippines and the canal will be great factors in the history and politics of the American re-

Creation of Cabinet Offices. The first department created in the government was that of Foreigh Affairs. This was later changed to Department of State. but retained its place as the premiership of the cabinet. The next to be created was the War department and then the Treasury. The latter department has always ranked the War department and it is aranked was unsettled by the wheat ball of the state of Philippines are both civil functions. Peace The latter department has always ranked the War department, and in the provision for the presidential succession the treasury follows the State department. Possibly the Treasury department took second place because Alexander Hamilton was the secretary. It was a case of where McGregor sits being the head of the table. Naturally Washiagton, having been for eight years commander-in-chief of the army, was his own war secretary, and the man holding that portfolio would not make it take a front rank. But with Jefferson as secretary of state and Hamilton secretary of the treasury, it was certain that these departments would take a front rank from the first. For eight years these men made the State and Treasury the two important deState and Treasury the two important detary. It was a case of where McGregor sits first. For eight years these internant de-State and Treasury the two important de-CORN-Receipts, 113,950 bu.; exports, 39, CORN-Receipts, 113,950 bu.; exports, 39,

Although in these times the ability of cabinet officers does not change the rank of the position, it does change the importance of the place in the administration. Thus it happened that Whitney made the Navy department prominent in the first Cleveland administration. Blaine naturally made the State department prominent in the Harrison administration. During Cleveland's

second term Olney made the Department Kinley and Roosevelt administrations Root made the War department the foremost position in the cabinet and Taft has kept it there. It is thus apparent that a man of ability can make his own place in the administration, regardless of the rank of his cabinet position. If it should happen that a colonial department was created and a man like Root or Taft placed at the head of it, such a department would be the last place only at social functions and in the rosters. Such a department would require the best man to be obtained and he would make himself a figure even if precedent and the law should place him below all others.

and its business demanded. Bureaus of SPANISH SLEEPER AWAKENS

16.00

sent herself a telegram announcing that, her lover had been killed by a fall from a horse. It has now developed that Miss Jones' love affair had no existence except in her own fervid imagination. The truth was finally wrung from Miss Jones, after she had been subjected to a most severe cross-examination by the very men she had implicated in the affair by the use of their names. So trying was the

ordeal that Miss Jones' mother, Mrs. Frank Arbuckle, swooned in the midst of the questioning and was revived only after an hour's arduous work. A state of collapse followed, and early this morning she was

again unconscious. With her mother unconscious on the floor and the other members of her family mploring her to tell the truth, Miss Jones sobbingly confessed that the story of her contemplated wedding was manufactured by herself; that she had bought her own engagement ring and even written, with her own hand, the telegram telling of her 6,978 sweetheart's tragic death.

Continued questioning, much the same as hat to which a witness on cross-examination is subjected, began to have its effect on Miss Jones. She showed signs of wavering, and just then her mother swooned. This wrung the truth from the young woman.

First of all she admitted that the wedding story was a pure fabrication. She said she wanted more and nicer dresses, and that she had created the wedding myth in order to induce her parents to buy her expensive dresses. She told them she had met a man named Benjamin, from St. Louis, who was a high official of the Canadian ratiroad, and that he was going to call. Miss Jones afterward explained that she had got Benjamin's address from a railroad folder, which Benjamin had left in her employer's office.

As time progressed and her parents insisted on knowing more about her St. Louis admirer, Miss Jones told of numerous telegrams and letters she had received, both from him and from his mother. nally she announced that the wedding way set for June 14, and she produced a handsome diamond ring, which she said was a

betrothal gift from her sweetheart. To make her story good, she carried home a picture, which she said had been sent her. This was Constantine's picture, which had come into her possession. The wedding ring had been purchased with her own money. These facts were admitted between sobs as Miss Jones continued her

story. As the day for the wedding approached Miss Jones commenced to plan to get away from the event. Then it was that she conceived the ruse of her flance's death. She wrote a telegram saying: "Clyde was killed while riding his horse," and sent it to herself by a messenger boy .-- Indianapolis News.
