at the Close. RAIN IN NORTHWEST: WHEAT STRONG Moleture in Kansas Weakens Corn-

Winnipeg-What State Reports Say of Rust. OMAHA, July 27, 1996.

Corner in Wheat Reported at

OMAHA, July 27, 1995.

It was an erratic market in wheat. The opening was 1614c higher, but the demand was poor and prices dropped off until they were considerably below yesterday. It began raining in the northwest, boosting prices in Minneapolis, and the other markets followed. The close snowed a substantial gain over yesterday. July mushed at 804c. September at 884087c and December at 874088c.

Rain in Kausas, where they have set up the sry weather howl for a week, weakened The sry weather how for a week, weakened the corn market. Good acceptances at country points was a contributing factor. July closed at 54%c, old July at 54%c, September at 53%c, old September at 55%c, old S

Cats took a tumble along with corn. July was 1940. September 2840 and December 280.

Spot corn on the Omaha market was down 40 from yesterday, 2040 being asked for No. 2 white. The spot market is 30 lower than it was last Friday.

Liverpool cabled wheat firmer on reported damage to Russian crop. Spot corn was firm and futures dull. Wheat closed 40 4d higher and corn 4d lower.

A corner in July wheat is on at Winnipes. Wednesday evening prices had advanced there 7c in four days. The trade has it that Valentine was buying in Chicago and selling September wheat in Minneapolis yesterday.

pes. Wednesday evening prices had advanced there is in four days. The trade has it that Valentine was buying in Chicago and selling September wheat in Minneapolis yesterday.

Rankin, at Chicago, to the Adams Grain company, at Omaha, says: "The first movement of wheat is about over and elevator people have been unable to buy any cash wheat at anything like prices in the pit. I believe the future markets will have to advance 85% a bushel to come up to prices paid at country points or they will get no whest delivered."

The North Dakota crop buietin says reports regarding black rust are conflicting, but it does not seem to be widespread or to have done any particular damage so far. The South Dakota builetin says: "Spring wheat is showing some black rust in scattered localities in middle and northern counties east of the Missouri river. It seems to be confined mostly to the leaves, but is doing no material damage yet. There is considerable complaint of smut and a little of blight."

Chicago cash handlers of corn had larger acceptances of corn from the west yesterday, especially from Nebraska, one house buying 100,000 bushels. Increased offerings are due to a falling off at the western and southern demand. The head of a large cash house said: "May corn looks like a pretty fair purchase to me. Our cable indicates that they are needing rain very badly in Hungary and Roumania."

'If this crop should be hurt it will make a big demand for corn from this country and they might make a miss in Argentina."

Liverpool states that offerings of Argentina corn are limited and business is transacted mostly on consignments. Smaller shipments are expected by September and estimates of the size of the last crop are being reduced.

CHICAGO. July 27.—An official forecast of rain for Minnesota and the Dakotas had a strengthening influence on the wheat market here today. At the close September wheat was up be. Corn is off bub. Oats are down be. Provisions are busic higher. The wheat market opened him, with September up bubs. To the initial firmness. Another factor was a fair advance at Liverpool. As a result of weather bureal predictions of rain temperary throughout Afinnesota and the Dakotas an active demand developed from commission houses and caused prices to advance above the opening level, September touching 515c. Toward the end of the first hour, however, the market became quite weak. A snarp break in corn was partly responsible for quite liberal profit taking in wheat and started wheat prices downward. In addition crop news from wheat in the northwest, white conflicting, furnished much encouragement to bears, many advices asserting that black rust had done little

started wheat prices downward. In addition crop news from wheat in the northwest, while conflicting, furnished much encouragement to bears, many advices asserting that black rust had done little damage thus far. On the reaction September sold off to 85%. The weakness was shortlived. Shorts soon began to buy freely again. The close was firm, with September at 85%, 6787. Clearances of wheat and flour were equal to 15,000 bu. Minneapolis, Duluth and Chicago reported receipts of 414 cars, against 221 cars last week and 206 cars a year ago.

Heavy liquidation by prominent longs caused weakness in the corn market. Ideal weather for the growing crop was the main bearish factor. Reports regarding the progress of the new crop were generally extremely favorable. A decline of ic to 14c in the price of cash corn had a weakening effect on option prices. Prospects of a liberal increase in movement favored the bears. Late in the session a partial recovery of the early lossess occurred on buying by shorts. The close was fairly steady. September opened a shade lower at 53%c, sold between 53%c and 53%c and closed at 53c. Local receipts were 208 cars, with 70 of contract grade.

Weakness of corn resulted in renewed liquidation of oats. In consequence the market was inclined to weakness. Weit weather in the harvesting districts partly offset the effect of the break in corn. September opened 16%c higher at 25%c 25%c. sold off to 25%c and closed at 25%c. Local receipts were 195 cars.

Provisions were firm, under a fair demand from packers and shorts. The yellow fever situation was considered to be well in check and this fact tended to strengthen values in the provisions pit. At the close September pork was up 10c at \$13.19. Lard was up 74,510c at \$7.50. Ribs were 567-5c higher at \$7.52,477.95.

Estimated receipts for tomorrow: Wheat, 157 cars; corn, 219 cars; oats, 221 cars; hogs, 6,000 head.

The leading futures ranged as follows:

8,000 head. The leading futures ranged as follows:

Foreign Exchange Reacts Sharply and Russian Bonds Rise at · Paris on Prospect of Peace.

NEW YORK, July 27.—Something like an imitation of activity appeared at times in the stock market today, but notwithstanding this appearance the total of sales for the day reveals small increase in the actual volume of the market. The rapid movement of special stocks of secondary importance was what gave color to the special stocks of secondary importance was what gave color to the special in too small extent and that the increase in the list as a whole was at no time wholly overcome. With the notable exception of the Eric stocks, which were subjected to the profit taking, which has proved inevitable in all recent cases on the publication of good fews, prices advanced slowly; but while the Erics themselves were backward, the placing of the second preferred stock on the dividend list by yesterday's declaration of a full year's dividend was undoubtedly a prime factor in encouraging the professional attempt to initiate a movement for a rise. When the action of the Eric directors is considered as a supplement to the increased dividends on Reading, Baltimore & Ohio and Amaigamated Copper and the retention for Illinois Central of what has been called an extra disbursement and designed to celebrate a notable occasion for the company there is presented quite a comprehensive array of evidence of confidence existing among managers in the stability of the conditions which have lifted the profits of operations so as to enable increased disbursement to stockholders. While some of the western railroads shared in the day's strength, stocks of the southern and eastern trunk lines were the conspicuous features of strength, these companies are comparatively mactive and so subject to more effect from manipulation or suddenly executed orders.

Foreign exchange reacted sharply, in spite of the hardening of London discounts, and some attention was paid to reports of peace prospects and especially to the rise of Russian bonds in Paris. The taking of NEW YORK, July 27 -- Something like an

SHEEF-Although there was a little bet-ter feeling on killers teday the general condition of the sheep market was the same as it has been for several days. There same as it has been for several days. There were only seventeen cars on sale, but the small receipts did not tend to make the trade any better. The feeder end of the offerings was picked up in fair season at good stendy prices, there being a considerable demand for this class of stuff. The fait stuff, however, was in poor demand and evoked little interest on the part of buyers, although they did hid, which was more than they would do yesterday. Trading was very slow and draggy and there was very little done till well along in the foremon. The quality of the receipts was not very good and choice kinds, had they been here, probably would have brought steady prices. Sales today on what was sold early looked a shade lower. here, probably would have prices. Sales today on what was sold early prices. Sales today on what was sold early looked a shade lower.
