CONDITION OF OMAHA'S TRADE

Business for the Week Satisfactory to Jobbers.

COUNTRY DEALERS AFTER FALL GOODS

They Are Pleased with Crops—Sugar and Coffee Are Articles of Interest to Grocers—Cotton Holds Strong.

Trade continues with Omaha jobbers as it has all the time thus far this year, each week's business being larger than for the same period of last year. Country merchants in town for fall goods say that this prosperous condition will continue through the year. A good wheat crop has been harvested, on which good prices are offered, and the outlook for corn is fine.

Sugar holds the center of the stage with the wholesale grocers. Coffee is also attracting considerable attention. With the dry goods people the main feature is the high price of cotton, and such a scarcity of goods that it is hard to insure prompt deliveries. Hardware and leather are quiet. In hardware circles, it is said that an advance in pig tin probably will make tin goods higher at retail this fall.

Omaha shoe manufacturers are lamenting the price they have to pay for leather. Sole leather is exactly 50 per cent higher than it was last year. Local houses are in the midst of their fall shipments and will not be through shipping for six weeks. The traveling salesmen are all on their vacations. They will resume work about the middle of August for a short trip, and will then take another rest until time to start the campaign for winter goods.

Sugar Is Unchanged.

For a wonder, sugar has remained unchanged in price through the week, though jobbers expect a change at any minute. There was a rate cut last week from the seaboard to Missouri river points, and it is probable that the cut will be extended to points west of the river. The freight rate war between the Atlantic terminals and the gulf roads has had a demoralizing effect on the market. Stocks are low and the jobbers are afraid to buy any large quantity of sugar, thinking it possible that prices may sink lower.

Roasted coffees are up ½ cent, and all coffees are strong. Sevens are 8¼ cents a pound now and firm at that figure. The crop movement so far at Rio and Santos has been comparatively small. The Brazil markets are steady and a few firm offers are being made on too high a basis to attract buyers.

In cheese the tone is very strong on fancy grades and firm on other grades. Dealers are taking so many large sizes for storage purposes that supplies in first hands have been greatly reduced. Heated stock is causing some complaint and prices for such are merely the result of negotiation.

Run of Salmon Begins.

The run of sockeye salmon, twenty-five days overdue, has begun on Puget sound. The fish have appeared in the straits of Fuca in large numbers. It is considered somewhat uncertain whether the appearance of the fish is a "spurt" or the advance guard of the great body of salmon. On this account news from the straits will be anxiously awaited. It is believed that this late appearance of the run will operate against a pack of 800 cases. Some even estimate that not more than 200,000 cases will be the pack this season, this estimate being based on the capacity of the canneries during the curtailed period of operation. Allowing two weeks before the present run can reach the traps in the sound, it will be August 10 before the pack can begin in earnest. As the duration of the run is problematical, the uncertainty is a considerable factor to be reckoned with. Thus far the news has had no effect on prices. There is a heavy demand for salmon, especially Red Alaska.

The demand is good for all kinds of fish, but especially for family whitefish, though there has been no change in prices. The catch so far has been only about 50 per cent of what it was last year. Much higher prices prevail in Holland herring than last year. The catch this season is short and no fish will be offered until about the middle of September. The old stock is just about cleaned up. Telegrams from Gloucester report a free arrival there and at Boston of fresh mackerel. Salt mackerel is steady. Norway 3's are a little firmer and there is a fair demand for the Halifax fish. Codfish is firm.

"Drawn" Cans Unsatisfactory.

The sardine trade is very active. The trade generally is expressing disapproval of the lightweight "drawn" cans, the full weight sardine cans having given satisfaction in all instances. The low prices on these "drawn" cans have made such a heavy sale that the company packing them has been flooded with orders and has been forced to withdraw from the market.

Canned tomatoes have been gradually marked up until now they are 15 cents a dozen above the lowest point. In Maryland there has been very hot weather for ten days and the tomato crop is suffering. Canners anticipate an active market next fall, with the foreknowledge of the lightest buying of futures in many years. The new packing season for tomatoes opened in Baltimore last week in a quiet way. The late advances in prices are well sustained. Canned corn is without material change.

The demand for California canned goods has been heavy, peaches particularly being in great demand. A large number of packers have refused to accept orders for peaches alone, and very few are offered at any price. The hot weather this year caused a large pack of low grade goods.

Dried Fruits Active.

Almost everything in the line of dried fruits for fall delivery has been on the boom for the last few weeks. Peaches were the first to interest buyers and under a continuous demand and consequent excitement, choice and standards advanced 1½ cents a pound from opening prices. Apricots are up with peaches and very few are offered at all. The market can be fairly represented as ¾ cents a pound above opening prices. The outlook for prunes is not as encouraging as it was some time ago. The demand has been heavy, and the market has advanced ½ cent on Santa Clara and ¼ cents on Italians. Spot raisins are firm and stocks are light. There has been a merger of the growing and packing interests on the Pacific coast and its development is being watched closely. Spot evaporated apples continue higher and the advance in the last ten days amounts to ½@¾ cents a pound. The advance in spot raisins for the same period has been nearly as much.

The fancy goods trade has been unusually heavy. Sardines, French peas and mushrooms have been in good demand.

A steady and quiet market prevails in rice and the trade is on a hand to mouth basis. Japans are in good request. The growing crops in Texas and Louisiana are doing well.

Movement of Dry Goods.

House trade with the Omaha dry goods jobbers has begun in earnest. This, taken with the advance order business, is making all houses busy. The distribution extends to all departments. Sales of underwear, blankets, hosiery, dress goods and all seasonable lines have been larger than at any time heretofore. Collections have been satisfactory.

Cotton goods continue to hold strong. The expected advance on American prints has not been made yet, but if an advance in blues is not made soon, many people will be mistaken. They are held at the lowest price in five years. All the cotton goods are marked up and the raw cotton still holds at about 11 cents. Bleached and brown goods are scarce. In working the level of cotton goods to its present height mills have been assisted by the enormous demand that has come from export quarters. Had it not been for the steady and profitable work that the mills had in coarse cotton goods, it is admitted that prices could not have been put up, or having been momentarily advanced, they could not have been maintained. As it is now, mills assert that prices will not go down below today's level for several months at least. The question of delivery is becoming more serious than that of the price, as the manufacturers are so rushed that they are slow in getting the goods to the jobbers.

Situation in Hardware.

Hardware trade in this section is just a little quiet at this time, as many salesmen are off the road taking their annual vacations and recuperating for the fall campaign. However, there are a large number of orders coming in by mail for shipment by freight and express.

There is a loud call just at present for harvesting tools. The trade this year on steel goods, scythes, etc., has been quite satisfactory as regards quantity, but the margin of profit has been very small to the jobber.

Stove boards, elbows, coal hods, sheet iron, meat choppers and stuffers, buck saws, cross-cut saws, lanterns and axes that were sold early are now going forward to customers, as they like to get them in while the weather is dry, so they will be sure of their not being damaged in transit.

Jobbers are looking forward to a large trade the balance of the summer and fall.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, July 29.—Alleged lack of damage by rust caused weakness in the wheat market here today. At the close September delivery was off ⅛c. Corn is up ⅛c. Oats are down ⅛c. Provisions are practically unchanged.

Weakness in the wheat market developed during the last half of the day. Early in the session the market was quite firm on a fair demand from commission houses. At the opening September was ⅛c higher to ⅛c lower at 85@85⅛c. With only light offerings the price gradually advanced to 86⅛c. Numerous reports from the northwest telling of the condition of the spring sown crop were received, but these advices were very conflicting. One of the reports, however, attracted special attention and was the chief cause of heavy liquidation late in the session. This report was from a Chicago expert, who is inspecting the wheat fields of North Dakota. "Scarcely a trace of black rust and but a moderate amount of leaf rust" was the substance of a dispatch from this authority. Reports of continued heavy primary receipts helped to dislodge large quantities of long wheat. Total arrivals for the week were over 7,000,000 bushels, compared with 4,500,000 bushels the corresponding week last year. The market became extremely weak during the last hour, September declining to 84⅝c. The close was practically at the lowest point of the day, final quotations on September being at 84⅝c. Clearances of wheat and flour were equal to 22,500 bushels. Primary receipts were 1,064,000 bushels, compared with 674,100 bushels a year ago. Minneapolis, Duluth and Chicago reported receipts of 566 cars, against 214 cars last week and 292 cars a year ago.

Corn, notwithstanding the break in wheat prices, held remarkably steady. Prominent bulls were active purchasers of corn during the greater part of the session. Pit traders also were inclined to favor the bull side. The market closed firm. September opened ⅛c higher to ⅛c lower at 52¼c to 52⅛c, sold up to 52⅝c and closed at 52⅝c. Local receipts were 288 cars, with 105 of contract grade.

A depressing effect on the oats market resulted from the weakness of wheat. Increasing receipts of new oats were an additional bearish factor. Furthermore, the grading showed some improvement. The market closed at the lowest point of the day. September opened unchanged at 28c, sold between 27⅞c and 28⅛c and closed at 27⅞c. Local receipts were 319 cars.

Provisions were steady on fair support from packers. The spread of yellow fever in the south was a weakening influence. At the close September pork was up 2½c at $13.17½. Lard and ribs were each off 2½c at $7.25 and $7.95, respectively.

Estimated receipts for Monday: Wheat, 326 cars; corn, 267 cars; oats, 371 cars; hogs, 34,000 head.

NEW YORK STOCKS AND BONDS

Revival of Speculative Interest of Friday is Fully Maintained.

VOLUME OF BUSINESS IS GOOD

Market Shows to Limited Extent Desire to Take Profits in a Few of the Leaders.

NEW YORK, July 29.—Yesterday's revival of speculative animation on the Stock exchange was fully maintained, although there was a good volume of business and some striking gains were recorded. The market showed the effect to some extent of the desire to take profits on the week's gains and the principal active stocks were not inclined to advance with vigor. The news of the day was not important and was of no apparent effect upon the prices. The net result of the week's operations on the surplus reserves of the banks was small, but this was due to the offsetting effect of some large changes in individual items.

The $18,480,700 expansion in loans was attributed largely to the taking over of loans by the banks from the trust companies, an operation that always develops when the call loan rate offers no greater profit than the rate paid by banks to trust companies on their deposits. It is surmised, also, that the stirring of speculative interest in the stock market has resulted in some increase of borrowing for that account. The gain in cash of $5,942,700 was much larger than expected and operated to conserve the margin of the surplus. Weekly reports of the mercantile agencies helped to foster the cheerful feeling over the business outlook which has grown up in Wall street. A feature of the day was the new record price for Delaware, Lackawanna & Western at 410, accompanied by rumors of another intended extra dividend on that stock. The irregular tone of the market continued up to the closing.

Bonds were steady. Total sales, par value, $1,660,000.

Foreign Financial.

LONDON, July 29.—Money and discounts were momentarily easier and the Stock exchange had a generally cheerful tone today. Some sections were particularly strong. The attendance was small and business light. Consols showed an improved condition and home rails were sustained by hopes of good dividends. Americans opened firm, though uneven and were mostly over parity, but inactive. However, they maintained a general cheerfulness, especially in the case of grangers. Coalers closed quiet. Canadians were advanced by the hopes of a good harvest. Foreigners were slightly easier, though Japanese were fairly supported. Japanese imperial 6s of 1904 were quoted at 104.

PARIS, July 29.—The Bourse today was firm throughout. Russian imperial 4s were quoted at $8.44 and Russian bonds of 1904 at 502.

BERLIN, July 29.—The general tendency of the Bourse today was firm.

Wool Market.

BOSTON, July 29.—WOOL—The Commercial Bulletin says of the wool market: A heavy business, principally in territory wools, has been transacted this week. Wool has been rapidly sold and selections are becoming smaller. Prices are hardening and steadily tending against buyers. The goods market has quickly responded to the high values of wool and all manufacturers are elated over the strong position in which their business is established. The foreign markets continue very strong. The next series of the London auction sales are slated for September 19. The shipments of wool from Boston to date from December 29, 1904, are 136,742,222 pounds, against 120,822,333 pounds at the same time last year. Receipts to date are 210,643,425 pounds, against 248,120,610 pounds for the same period last year.

LONDON, July 29.—WOOL—The arrivals of wool for the fifth series of auction sales amount to 33,734 bales, including 12,500 forwarded direct to spinners. The imports this week were: New South Wales, 2,156 bales; Queensland, 5,680 bales; Victoria, 153 bales; New Zealand, 1,362 bales; Cape of Good Hope and Natal, 584 bales; China, 460 bales; the continent, 166 bales.

CATTLE—There were no cattle reported in this morning and consequently no market. The receipts for the week show a slight decrease as compared with last week and were much heavier than the same week last year, when the packing house troubles made receipts very uncertain. The quality of the offerings was very good.

The market for the week closed in good shape, the demand the latter part of the week was good and prices ruled higher. On the opening and earlier days of the week conditions were rather unfavorable and trading slow. Packers claimed a poor outlet for dressed beef and were poor buyers. During the latter part of the week the receipts consisted largely of corn-fed cattle and grass stuff was scarce. For this reason the market on range cattle was a little stronger than the close of last week. The good dry-lot beeves and choice grades of corn feds showed even a greater advance than this and the market for the week was strong to 10c higher. The warmed up and only partly fatted stuff was in poor demand and was 10@15c lower for the week.

The cow and heifer trade was not quite as satisfactory as was the steer market. The increased receipts of range cows had a depressing effect on grass natives and prices were lower. About 10@15c would cover the loss on these kinds, with the market the first of the week slow. On the good corn-fed cows and heifers, which have been getting scarce, prices held up pretty well and the market was just about steady, but on the general run of stuff prices were at the decline noted above.

Prices on bulls were off about as much as on steers, with the exception of feeder bulls, for which there was a good demand at steady prices. Veal calves and stags showed little change and were just about steady.

The supply of stockers and feeders was fairly good and there was a good demand all the week. Good heavy feeders were 10@20c higher for the week, with the light and common grades ruling about steady.

HOGS—There was only a light run here, about eighty-eight loads being on sale. With such light receipts buyers started in early and, although prices ruled lower, there was considerable activity to the trade and a clearance was made in good season. Buyers paid little attention to weights or quality today and bunched the sales. Early advices from eastern points were discouraging and had a bear effect on the market here. The hogs were picked up right along at a decline of about 2½c, the bulk of the stuff selling at $5.47½@5.50, with some hogs bringing $5.52½ and tops reaching $5.55. The market for the week has been very satisfactory; the receipts were liberal, but prices held up very well. A steady advance was noted from Tuesday till Friday, when prices dropped about 7½c, but even with this decline and the further decline today the market is about steady with the close of last week. SHEEP—There were only five cars reported in this morning, four of which were consigned to a packer, leaving only one car on sale, not enough to make a test of the market. The receipts this week were liberal and it was due partly to this fact that the market shows a big decline. Prices flowed steadily downward every day until Friday, when conditions were reversed and the trade showed some strength. There was but a poor demand for killers and trading nearly every day was slow and dull, with prices lower. The decline amounted to 25@40c as compared to the close of last week, but sheep were higher as compared to the low day of this week. Lambs were off fully a quarter, but were about that much higher as compared with the low day of the week. There was a very good demand for feeders all the week and the supply did not fill the requirements of the trade. Prices on this class of stuff were steady to a little stronger. With lighter receipts next week, which are looked for on account of the decline, sheep men expect stronger prices.

Quotations on fat sheep and lambs: Good to choice spring lambs, $6.00@6.50; good to choice yearling wethers, $4.50@4.75; good to choice wethers, $4.25@4.40; good to choice light ewes, $4.00@4.25; good to choice heavy ewes, $4.00@4.15.

GRAIN AND PRODUCE MARKET

Wheat Holds Up Better Than Was Expected.

ONLY SLIGHT LOSS AT WEEK'S END

September and December Corn Are Strong—Oats a Little Weak—July Wheat Corner on at Winnipeg.

OMAHA, July 29, 1905.

Wheat held up better than was expected, considering that the day was Saturday, that there were heavy receipts at Chicago, Kansas City and St. Louis, and that the weather in the northwest was clear. Kansas City and St. Louis reported 484,000 bushels, as against 330,000 bushels last year. Chicago came to the front with 339,000 bushels. Free receipts are expected next week. July closed at 85⅛c, September at 84⅝c and December at 85⅝c. The average loss was ⅛c.

September and December corn were firm at a little better figures, but July eased off ⅛c. The condition of the growing crop is good and it is said there will be no increase in receipts next week. July closed at 54c, old July at 54c, September at 52⅝c, December at 45⅝c and old December at 47⅝c.

Oats were a trifle easier, July finished at 29¼c; September at 27⅞c and December at 28⅛c.

Spot wheat and corn at Liverpool closed quiet and unchanged from yesterday. Wheat futures were ⅛@¼d lower and corn was ⅛d lower.

The Winnipeg market was excited without much trade yesterday. The July corner is still on. Prices at one time were $1.37. At another time it was quoted at $1.11 bid and at the close $1.34, or a net advance of 4c for the day. October closed at 86⅛c, a decline of 1¼c.

The price at Liverpool today for September wheat is 97c, or 3c out of line with Chicago. C. H. Spencer of St. Louis sticks to the belief that wheat will go to the export basis. "Deliveries at Chicago yesterday were 145,000 bushels of wheat, 180,000 bushels of corn and 80,000 bushels of oats. Australian wheat shipments of the week were 280,000 bushels, as against 188,000 bushels last week and 296,000 bushels last year. Indian shipments are decreasing.

President E. S. Woodworth of the Minneapolis Chamber of Commerce, said at Chicago yesterday that present indications are for a good crop of spring wheat in the three northwestern states. Colonel W. F. Hayes, expert for a Chicago house, wired from Fergus Falls, Minn.: "Having inspected the fields and heard the evidence I decide there is no black rust in the northwest. Crops are promising."
