NONPAREILS BEAT THE ORIGINALS Youngsters Outplay the Veterans and

Win Handily.

Before a good sized Sunday crowd at Vinton park yesterday afternoon the Non-parelis rubbed the Lee-Glass-Andreesen Originals into the ground again by simply playing better ball. Saffelder for the losers was in good form and struck out eight of the kids, allowing but five hits, but the men back of him made enough foogles to lose seven games. The youngsters worked like Trojans, and accorded Lynch almost perfect support, outplaying the eider team in every department. "Dick" Coad the Notre Dame star quarter back, who by the way will be with Creighton university this year caught a fine game and his hitting and base running were features. B. Roben, and Cassidy worked well together at second and short, while Eddie Lynch pitched good steady ball. Score; Win Handily.

The breathing of impure air is precisely

identical, so far as its effect is concerned, upon the human body as the drinking of impure water or the eating of impure food Both air and water are foods, foods of such abundance in supply and so readily obtained that little thought is given to their which is the single life-sustaining element obtained without cost or labor, and a general indifference exists as to its origin and a quite profound lack of knowledge as to its contents and qualities. One of the newest of the New York hotels

recently installed an elaborate and intricate air-filtering plant, by which every pound of air brought into the building was thoroughly filtered and cleaned before reaching the rooms. It was not a new idea, but it of this sort, and perhaps never before on so large a scale. The results obtained were little short of startling, a very considerable quantity of dust, dirt and ashes being obtained each day.

In the present state of the ventilating art it is hardly possible that air filters can come into general use as regular articles of household equipment, valuable and serviceable as such a device would be; but the practical demonstration that the air of New York-and in an excellent locality, t should be noted-is so foul as to yield appreciable and even considerable amounts of refuse is an object lesson of the utmost importance.-American Homes and Gardens.
