

APPRAISERS NOT YET NAMED

Men to Name Value of Estates to Be Bequeathed by Conference.

MOST IMPORTANT OF PROBATE CASES

County Judge, Attorney and Attorneys of Record for Various Estates Will Decide on Plan.

Judge Vinsonhaber has not yet named any appraisers for estates in probate. He was to have done so Tuesday morning, but it was found on examination that the specifications of the county attorney for the appointment of such appraisers were deficient in some particulars. At least two of the estates on the list for which applications were submitted have been settled, so that the heirs would be the proper parties defendant.

After consideration, it has been decided to hold a conference of the county judge, county attorney and the attorneys of record for the various estates, to decide on a plan of action that will accomplish the result the county attorney desires in view most expeditiously. In this way all the arguments can be heard at one time, pro and con.

Judge Slaughter was willing that the county judge should deny the application for appraisers and then come in with a mandamus proceeding. This method of procedure did not meet the approval of the county judge, and after some discussion it was decided to have a conference as indicated. Just when the matter will be presented to the county court in its next session is not decided, but it will be some day this week.

NEW CREAMERY FOR OMAHA

Another Butter Making Plant of Large Proportions Will Be Established Here.

Omaha's supremacy as butter-making city is to be strengthened before winter sets in by the addition of another large creamery to the seven already established here. The newest plant is that of the Andrew Wood company, which is to have a capacity at the start of 20,000 pounds of butter a day, and to make a million pounds of butter a week.

Another change lies in defining the standing of a check and the funds against which it is drawn in the bank. It is made plain that a check does not constitute an assignment until presented at the bank. If several checks are issued against the same funds the one that gets to the bank first has the prior lien and is paid.

PLANS FOR NEW WAREHOUSE

Specifications for Wright & Wilhelm's Structure Placed in Hands of Contractors.

Plans and specifications for the new Wright & Wilhelm warehouse at Tenth and Jones have been placed in the hands of contractors by Architect John Latenser and bids are to be returned August 14. The structure is to be 65x132 feet in one part and 32x100 feet in another, forming an L about the corner of the old building. It will be five stories in height and will conform in material and appearance to the old quarters. It will more than double the storage capacity of the house. At present two warehouses at points remote from the city are required to take care of the business. When the new home is finished all the business will be under one roof. The cost will be about \$100,000.

NO MORE THREE DAYS OF GRACE

Negotiable Instruments Law Passed by the Last Legislature Goes Into Effect.

The old reminiscence of anti-railroad days, the three days of grace on promissory notes and other paper of the same ilk, no longer exists legally in Nebraska. Tuesday the law abolishing the three days of grace and codifying all the state laws and court decisions on negotiable paper went into effect, and from now on the handling of these things is expected to be most simplified. When the last legislature passed the law it fell into line with sixteen other states that have done the same thing. These are New York, Pennsylvania, Connecticut, Maryland, Florida, Tennessee, Ohio, Wisconsin, Iowa, Montana, Idaho, Utah, Colorado, Arizona, Washington and Oregon. The law is one advocated by the American Bar association and has the approval of the American Bankers' association. In it are incorporated all the various statutes that have heretofore borne on the subject, together with the essence of court decisions. The main difference in the new law, so far as it generally affects persons is the abolition of the days of grace. This will save much clerical labor figuring interest in banks and commercial houses. A slight draft becomes practically a demand draft and must be paid on the day presented if accepted. If a note falls due on Sunday or a holiday it is payable on the first business day following.

BUILDING MATERIAL SCARCE

Because of This Contractors Say Construction of Buildings in Omaha Is Retarded.

Scarcity of lumber is delaying the construction of several of the new and larger buildings of the city. Manager Myrick of the Capital City Construction company, which is building the new office building and warehouse of the American Radiator and Standard Oil company, and also the new building on Farnam below Tenth streets, said Tuesday morning that the failure of the mills to turn out the heavier timbers required for the Allen building had held back the construction considerably. The heavy rains of the spring made it impossible to get out the heavier timbers at the mill in Arkansas, otherwise the Allen Bros. building would now be to the third story instead of the first floor as at present. Mr. Myrick says that the lack of this heavy material is delaying the construction of his new cereal building.

BENSON FOR WATER WORKS Village Votes Overwhelmingly in Favor of Bonds for the Improvement. At the special election held in Benson Tuesday the proposition to bond the city in the sum of \$30,000 to construct a system of water works was carried by a vote of 183 to 21, there being cast a total of 204 votes, one being spoiled and thrown out. The bonds are to run twenty years at 5 per cent.
