with the flames for hours before they got them under control and several of the firemen were overcome by heat, but none was seriously affected.

CZAR MEETS HIS ADVISERS Council of Ministers is Now Confer ring on Subject of National Assembly.

ST. PETERSBURG, Aug. 1.-The council of ministers assembled at Peterhof this afternoon, under the presidency of the emperor, to arrange a project for a nationa assesmbly. The meeting was preceded by a te deum. The ministers will reside at Peterhof during the discussion, which is expected to occupy several sessions. Those present numbered forty-four, including Grand Dukes Alexis, Vladimir

Alexander Michaelovitch and Nicholas Nicholaievitch, all the ministers, Senators Borbrinsky, Shirinski and Naryshkin, and Prof. Kljutshewaski and Prof. Pavloff of Moscow, nearly all of whom are members of the council of the empire. A bureau of the council has taken over from the committee of ministers the work of elaborating a project for the convocation of the national assembly. The project is to be thoroughly recast and of a more liberal form. When complete it will have little in common with the scheme presented by Minister of the Interior Bouligin. The uncil will not touch upon the question of principle, confining itself to details on which there are differences of opinion.

After five hours of discussion over the details of the project an adjournment was taken at 7 o'clock, the members of the council returning to St. Petersburg.

OPPONENT FOR CARBON TRUST Rockefeller May Back Independent Concern, with Hendquarters in Ohio.

CLEVELAND, Aug. 1.-The Plain caler today says that the National Carbon empany, known as the Carbon trust, soon day. will have a competitor with immense financial backing. It developed here yesterday that Rockefeller interests are behind the United States Carbon company, and soon will be fina seed with a capitalization close to \$1,000,600.

For more than a year the local concern has been closed down. About one month ago, however, the property was bought up by Martin B. Daly, general manager of the East Ohio Gas company, a well known Rockefeller corporation. The plant is now being overhauled at an outlay of \$100,000. It will be turning out carbon products by

Mitchell, president of the United Mine Workers, and the district officers, visited he mining town of Nanticoke today and were greeted by thousands of mine workers and others. All business places were closed and the day was a general heliday. A monster parade took place this after-noon, after which Mr. Mitchell, District President Nicholls and others made speeches

All efforts are being made to bring the membership of the United Mine Workers to 150,000. From present indications there will be no strike next spring of the anthracite miners.

SWIFT LOSES BEEF HOUSE Loss of \$50,000 Follows Fire at t8. Joseph Plant of Packing Company.

ST. JOSEPH, Mo., Aug. 1.-Fire of unknown origin, which started early today in the beef beds of the local plant of Swift and Company, entirely destroyed the beef department.

The entire fire departments of the packing ompanies and of the city were called out and after battling with the flames for four hours brought the fire under control. The \$100 he is known to have had on his person beef and oleomargarine departments were ruined and part of the poultry department was destroyed. The loss is estimated at

and Secretary Cheatham of the Southern ment addressed to the members of the astention from the "deficiencies" of the system itself "to the thieving propersities of a demands to be made on congress to reform conditions. The statement in part follows: To the Members of the Southern Cotton its present head has been made evident.

Under the present circumstances a great duty devolves upon the members of the association. We are less concerned with what has been done by a few individuals and the consequences thereof, regrettable as they may be, than with such reformation of departmental methods as shall secure for us just and accurate reports in future. Under the system at present in vogue, and which promised to be undisturbed unless public attention shall be aroused to need of reform, the reports instead by the Department of Agriculture are, in their last analysis, simply the individual opinion of a few officials of doubtful experience and honor, by which the value of the cotton crop may be and has been affected as much as \$75,000,000 in a single day.

Ask for Cotton Bureau. No such power should be delegated to any individual or statistical board except any individual or statistical board except under conditions which gusrantee the most incorruptible, expert and intelligent opin-ion, arrived at by the application of the most scientific methods and safeguarded by the most scientific precautions. It is, therefore, urgently recommended to the members of the Southern Cotton associa-tion that through their representatives in congress and by every other means avail-

Roosevelt with his demands. "I have reported my course to President Roosevelt," added Secretary Wilson, "and I have not taken President Jordan into my confidence. President Roosevel: knows what is going on in the department; Jordan does not. Yes, I hope Jordan will carry his demands to Oyster Bay."

NEBRASKA CROP CONDITIONS Corn Promises a Good Yield and Other Grains Make Fair Showing.

United States Department of Agriculure, climate and crop bulletin of the weather bureau, Nebraska section, for the

The last week has been uniformly cool, with maximum temperatures but slightly above 80 degrees. The daily mean temperature averaged 5 degrees below normal.

The rainfall equaled or exceeded normal in the greater portion of the state. In most of the southern counties the rainfall exceeded one inch, while in considerable areas it ranged from two to five inches. In parts of some northern counties little or no rain fell, while in a considerable area less than one-half of an inch fell.

The rain of the last week in central and southern counties delayed stacking and thrashing, but the work is well advanced for this time of the year. The harvest of caus and spring wheat has progressed nicely in northern counties. Oats are a fair to good crop, and spring wheat a light crop. Haying has been general and has been retarded somewhat by rain. The second crop of alfalfa is being cut. It is a good crop. A part of the crop was damaged by rain in southwestern counties. Corn has grown well and is earing picely in southern counties. All but very late corn is now generally in tassel. The crop is ten days to two weeks late in northern counties, but nearly as far advanced as usual in southern counties at this time of the year. The crop is in a very promising condition in mest counties. Fail plowing has begun quite generally with the ground in good condition.

The Burlington statistician has prepared the following soil and crop report for Ne-The Burlington statistician has prepared

on either of the other two divisions. An average of the estimates of yield made in this week's report shows twenty-four bushels per acre on this vivision. The weight ranges from sixty to sixty-four pounds per bushel.

bushel. McCook Division—An average of the estimates of wheat on McCook division indicates twenty-sevon and one-half bushels per acre. Very much less threshing has been done on McCook division than either of the others. The weight of wheat ranges from sixty to sixty-four pounds per bushel.

even however, that an average evop may a expected. With especially good weather that is, plenty of ruin and late frost—very such above an average crop may be exceiled. Corn is generally in silk and tassle, robably is not senerally more than one reek late, based on an average condition to previous years.

t previous years. Wymore Division—What has been said of Wymore Division—What has been said of Lincoln division corn is practically true on the Wymore division. Corn is in silk and tassle and making very rapid growth. The outcome of the crop depends upon conditions during the next forty-five days.

McCook Division—On the McCook division corn is somewhat later than on either of the other two divisions, but has generally been "laid by" and is in wonderfully fine condition. If the weather from now on is favorable we have every reason to hope for more than an average crop.

FRUITS.

weather and season of usual length, I be-

for more than an average crop.

Lincoln Division—Summer apples are generally good in places; prospects for fall apples not good. Perhaps there may be 40 per cent of an average yield.

Wymore Division—In the southeastern part of Nebruska and northeastern part of Kansas prospects for fall apples is fairly good; in places a fair yield of summer apples.

good; in places a lair yield of submer apples.

McCook Division—Very little fruit raised on this division, except on the eastern part of the division, where the situation is about the same as on the two eastern divisions.

POTATOES.

Lincoln Division—Average acreage; good yield; good quality.

Wymore Division—Yield will be good; quality good for eastern Nebraska potatoes; average acreage.

McCook Division-Potato crop generally PASTURES AND MEADOWS. Line

Lincoln Division—Conditions excellent; growth of grass and pastures retarded somewhat by the hot, dry weather of last week; recent rains have started grass to growing and pastures are everywhere excellent; second crop of alfaifa large and generally harvested.

Wymore Division—Conditions excellent generally harvested.

Wymore Division—Conditions excellent growth of grass and passures retarded somewhat by the hot, dry weather of last week; recent rains have started grass to growing and pastures are everywhere exvellent; second crop of alfalfa large and generally harvested.

McCook Division—Conditions excellent; growth of grass and pastures retarded somewhat by the hot, dry weather of last week; recent rains have started grass to week; recent rains have started grave ex-growing and pastures are everywhere ex-cellent; second crop of alfalfa large and

SUGAR BEETS. Lincoln Division-Not extensively raised

Lincoln Division—Not extensively raised on this division.

Wymere Division—Not extensively raised on this division.

McCook Division—Made a good growth during the week; nothing special to report.

WEATHER.

Weather was generally cool with copious rains; average temperature at six stations in Nebraska and Kansas for which temperature is given at \$a. m. was \$5-6 degrees lower for week ending July 25. At Denver the average temperature was 1 degree lower.

Wet Wenther Interferes with Thresh-

ing in Missouri Valley.

Southern Association Officers Make Charges

WASHINGTON, Aug. 1.-President Jordan Cotton association today issued a statesociation calling attention to the recent disclosures in the cotton statistical work in the Department of Agriculture, declaring that efforts are being made to divert atfew unworthy officials," and setting forth Association: The members of the associa-tion have been apprised through the pub-ile press from day to day of the work done by the officers of the association at Wash-ington. As a result of their charges the unreliability of the reports of the Depart-ment of Agriculture relating to the cotton crop has been fully disclosed and the mal-administration of that department under its present head has been made evident. Under the present circumstances a great

tion that through their representatives in congress and by every other means available to them they exert their influence and that of the association toward securing the immediate reorganization of the Agricultural department, especially with reference to its reports on the cotton report and that their representatives in congress be recuested specifically to demand:

1. The establishment within the Department of Agriculture of a bureau to be known as the "cotton bureau" charged specially and solely with the duty of reporting upon the cotton crop and all matters concerning that staple.

2. The appoinment at the head of the bureau at an adequate salary, a man whose reputation and antecedents shall be beyond reproach and whose familiarity with cotton cultivation shall be an additional guarantee of his fitness.

week ending August 1, 1906: The last week has been uniformly co

the following soil and crop report for Nebranks for the week ending July 29: WHEAT.

Lincoln Division—There is very little to add to what has already been said concerning the wheat crop. The harvest is completed, threshing being done. Reports from six stations scattered over the division indicate an average yield of twenty-five bushels per acre. The weight ranges from sixty to sixty-four pounds per bushel. Wymore Division—On Wymore division more threshing was probably been done than on either of the other two divigions. An av-

DATS.
Lincoln Division—About all harvested, but not very much threshing done yet and no very definite estimate made as to yiold.
Wymore Division—Harvest is completed and estimates of yield made would indicate about thirty-six bushels per acre.
McCook Division—Oats have been partially harvested, but practically no threshing done.
