## DOCTORS FOR MEN

Nerve-Sexual Debility may result from a variety of causes, such as overwork, overstudy, neglect of the human system, abusive habits, etc. It affects different people in different ways, and produces serious disturbances of both mind and body, resulting in night losses and day drains, loss of vital power, sleeplessness, despondency, nervous irritation, loss of memory, confusion of ideas, specks before the eyes, ringing in the ears, dark circles under the cyss, lassitude, languor, gloominess, depression of spirits, aversion to society, lack of confidence, pain in the back, loin or kidneys, and a long list of other distressing symptoms too numerous to mention, unfitting one for study, business or the enjoyment of life. The longer the trouble is allowed to progress the more difficult it becomes to cure owing to the natural tendency to involve and impair the functions of associate organs.

It is an established fact that no law of nature can be violated without entailing a fearful penalty, and it is certain, some day sconer or later, to manifest itself. A man who has been guilty of abuses in early life or later excesses soon perceives some of the more prominent symptoms referred to. He loses confidence in himself and energy for business pursuits. He is invariably timid, nervous and forgetful, and his mind is constantly dwelling on the subject. Such troubles when neglected or improperly treated soon make serious inroads upon the constitution, leaving the sufferer a mental, sexual and physical wreck.

To those who suffer from the symptoms we have described we wish to say that we have evolved a system of treatment that is an absolutely safe and certain cure. It restores the normal vitality which enables the weakened and debilitated organs to perform the duties assigned to them by nature. The treatment we prescribe will check the progress of wasting decay in young and middle-aged men, revive the slumbering energies and place them in prime physical condition. Specialists such as we are, who have devoted many years to the treatment of this class of troubles exclusively and enjoy such an immense practice are better qualified to advise, direct and treat such cases than the general practitioner who scatters his faculties over the whole field of medicine and surgery. We have been the means of restoring thousands of afflicted sufferers to complete and perfect health and have rescued hundreds and hundreds of young and middle-aged men who were plunging to the doom of their manhood, restoring them to perfect specimens of physical manhood.
