> CHICAGO, Aug. 14—Prevailing belief that a large crop is virtually assured resulted in a weak market here today, for which the close showed a net lose of Myc for September. Corn is down up. Onto are off type. Provisions are practically unchanged, except ribs, which are up log-12%c. Soaking rains in the spring wheat country where dry weather is needed for the finishing and harvesting of the crop gave the wheat market a semblance of strength at the start. Minneapolis quotations came strong. September prices at the opening showed to the upturn, however, and early buyers began to liquidate. As a result September receded to Myc. A raily occurred late in the session, due chiefly to shorts covering on a report of improved export business. September closed easy at \$1,45814c.

NEW YORK, Aug. 14.—The speculative

Atlantic and the gulf lines had been settled and the cutting of rates done away with.

Some attention was given to the assertions that American bankers were being sounded with a view to sharing in a Russian foun. The flotation of a Russian loan The flotation of a Russian loan of the flotation of the world's minney markets of such a flotation leaves the question of the point chosen rather secondary in importance, so far as the effect on money rates is concerned. The deposit of \$500,000 at the sub-treasury for telegraphic transfer to Chicago marks the running of the tide of the currency movement in favor of the interior as against New York, which was aiready shifting last week. The forces which will decide the course of the autumn money markets are thus definitely at work. Stocks made substantial recovery late in the day, the corns grangers again leading, but the persistence of the selling to realize made the closing irregular.

played, although buyers were picking up the cattle right along.

The good feeling that prevailed last week on she stuff was not in evidence today and sellers were unable to hold their cows and helfers up to steady prices. The very best kinds were a shade lower and from that to 10c lower on the commoner grades. Busi-ness in this division was dull and trading slow. Bulls were lower today, but yeal -- ives

and stags held about steady with la Friand stags held about steady with in cri-day.

There was a good supply of stockers and feeders and the same good demand that has been in evidence for the past week. Good heavy feeders were steady with the close of last week, but the lighter weights were not in as good demand as the heavy stuff and were lower. Representative sales:
