HOW TO MAKE GOOD COFFEE.

Use LION COFFEE, because to get best results you must use the best coffee.

Grind your LION COFFEE rather fine. Use "a tablespoonful to each cup, and one
extra for the pot." First mix it with a little cold water, enough to make a thick pasts, and
add white of an egg (if egg is to be used as a settler), then follow one of the following rules:

ist. WITH BOILING WATER. Add boiling water, and let it boil THREE MINUTES ONLY. Add a little cold water and set aside live minutes to settle. Serve promptly.

2d. WITH COLD WATER. Add your cold water to the paste and bring it to a boil. Then set aside, add a little cold water, and in five minutes it's ready to serve.

3 Don't bell it too long.
Don't let it stand more than ten minutes before serving.
Don't use water that has been belled before.

TWO WAYS TO SETTLE COFFEE. 1st. With Eggs. Use part of the white of an egg, mixing it with the ground LION COFFEE before boiling.

COFFEE before boiling.

3d. With Cold Water instead of eggs. After boiling add a dash of cold water, and set aside for eight or ten minutes, then serve through a strainer.

Insist on getting a package of genuine LION COFFEE, prepare it according to this recipe and you will only use LION COFFEE in future. (Sold only in 1 lb. scaled packages.)

(From a Staff Correspondent.) LINCOLN, Neb., Aug. 15.—(Special.)—In-surance Deputy Pierce will in the imme-Paying State We diate future begin an examination of the books and records of the fraternal insurance companies doing business in Nebraska. In all probability, owing to the litigation now going on in the order of Royal Highlanders, this lodge will be the first to receive official investigation. Had it not been that Mr. Pierce was compelled to go to New York in connection with the examination of the large old line compaines he would have started the examination of the Highlanders last week. Special Examiner Wiggins will be in Lincoln tomorrow and unless he is otherwise engaged the investigation will begin at once.

It has been customary for the insurance department to make a thorough examination of the fraternal orders in Nebraska at least once in two years, but amined for years. The fact that the investigations are to be started in no way of the various companies are not conthat they are being conducted to the best advantage of the members.

October 1 Mr. Pierce and Mr. Wiggins will go to New York where Mr. Wiggins will conduct the examination of the larger old line companies in conjunction with the representatives of six states. The first company to be examined will be the New York Life which made the request that it be the first. A fee graded according to the class of company inspected is paid the examiner by the company. Mr. Pierce will only remain in New York long enough to see the work started and then will return to Nebraska. He does not expect to receive a fee though the company will be expected to pay his expenses going and

CONDITION OF NEBRASKA CROPS

Corn is Growing Finely, but Rain is Needed in the Northwest.

United States Department of Agriculweek ending August 15:

The past week was warm, with maximum temperatures above 90 degrees on severel days. The daily mean temperature averaged 2 degrees above normal in most of the state, and 5 degrees above normal in the extreme eastern counties.

Showers occurred in many counties during the week, but the rainfall was generally less than .25 of an inch, however it exceeded 1 inch in a few northwestern counties.

OFFICE OF THE WEATHER BUREAU, OMAHA, Aug. 15.—Official record of tem-perature and precipitation compared with the corresponding day of the last three Stacking and thrashing has progressed stacking and thrashing has progressed well except in a few southwestern counties, where work was delayed by wet weather the first part of the week. Spring wheat is mostly cut and the damage by rust is generally considered small. Considerable grain is still in the shock in western and northern counties, while in central and anythestern counties it is mostly either and northern counties, while in saily either southeastern counties it is mostly either southeastern counties. WHEAT.
Lincoln Division—Cwing to favorable veather, threshing has continued without interruption. Three stations show an avinterruption. Three stations show an average of twenty-eight bushels per acre. Wymore Division—Threshing has progressed well and yield is generally about as shown in previous reports.

McCook Division—As there was more rain on McCook division, threshing was interrupted to a greater extent, although fair progress was made. Wheat was growing in places in the shock because of wet weather during the week; this damage will not amount to very much in the aggregate.

OATS.

SUMMARY OF CROP CONDITIONS

Pavorable Temperatures for Grains in All Districts East of Rockies. WASHINGTON, Aug. 15 .- Crop condiions are summarized as follows in the weekly bulletin issued by the weather bu reau today:

During the week ending August 14, very

reau today:

During the week ending August 14, very favorable temperatures prevailing in all districts east of the Rocky mountains, the week averaging slightly cooler than usual in the gulf states and warmer than usual throughout the central and northern portions of the country. The drought prevailing in the previous week in the middle and south Atlantic and east gulf states has been relieved by abundant rains, which proved darmaging in portions of the Carolinas and Fiorida. Needed rains also occurred in portions of the upper Mississippl and lower Missouri valleys, but parts of Nebraska, Iowa, Arkansas and Texas are in need of moisture. Farm work has interrupted by heavy rains in the central gulf district and in the lower Obio valley. Rain is badly needed on the north Facific coast.

The reports continue to indicate an excellent outlook-for corn throughout the central valleys, lake region and middle Atlantic states. Rain has afforded relief in the Obio valley, and while the crop in portions of Illinois, Missouri and Nebraska was in need of rain at the close of the week, the weather man of August 14 shows that good rains have occurred where needed in the two first mentioned states. Early corn is now practically made in the southern portions of Kansas and Missouri.

Spring wheat has done well, only slight injury from rust being reported. Underligh temperatures the crop has ripened rapidly, some of the sarly sown having been harvested in North Dakota. Cutting is well advanced in central Minnesota and northern South Dakota, and is practically finished in the southern portions of these states and in Iowa and Nebraska. In Oregon, spring wheat has been badly shriveled in the Willamette valley, where the yields are disappointing.

Only a small part of the oat crop in the stream northern south parts.

in the Willamette valley, where the yields are disappointing.
Only a small part of the oat crop in the extreme northern districts remains unharvested. Threshing is well advanced and all reports indicate satisfactory yields.
As in the previous weeks, the least favorable reports respecting cotton are received from the eastern districts, where the prevalence of rust and shedding continues. Durling the past week a large part of the conlence of rust and shedding continues. During the past week a large part of the central and eastern portions of the cotton belt has received from two to six inches of rain, which has proved injurious. In northern Alahama and in portions of Mississippi, Louisiana and Texas cotton has improved, but in other portions of these states the crop has deteriorated. In Oklahoma and Indian territories, Arkansas and Missouri Lotton has generally improved, although local complaints of shedding, rust and insects are received from Arkansas.

Too much rain and lack of sunshine have prevailed unfavorable to the tobacco in prevailed unfavorable to the tobacco i Maryland, Virginia and Kentucky; else where this crop has advanced—satisfac-torily. orily.
The apple outlook continues unchanged, a poor crop being indicated in nearly all

poor crop being indicated in nearly au he apple producing states. The soil is in excellent condition for fall plowing throughout the central valleys, lake region and at the coast districts, and this work has made good progress.

A Warning to Eothers. Too much care cannot be used with small children during the hot weather of the summer months to guard against bowel troubles. Give Chamberlain's Colic, Cholera and Diarrhoea Remedy and then a dose of castor oil, and the disease may be checked in its incipiency and all danger avoided. The castor oil and this remedy should be procured at once and kept ready for instant use as soon as the first indication of any bowel trouble appears. This is the most successful treatment known and may be relied upon with implicit confidence even in cases of cholera infantum.
