# BUTTERFLY SKIRTS

In regard to the "Butterfly" Skirt which has aroused so much curiosity among the ladies of Omaha, and for that matter all over the country, we beg to say that in a short time we will show the GENUINE and ORIGINAL skirt which has created such a furor in New York, Philadelphia, Chicago and the large cities.

We wish to impress upon our customers that it is not a "Butterfly" Skirt unless it has a label on the band with the Butterfly trade mark.

This garment is sold and controlled in Omaha by Thompson, Belden & Co. only. We take this means of informing our customers to prevent their being deceived by untruthful advertisements.

### PERKINS IS CROSS-EXAMINED

(Continued from First Page.)

Topic of discussion was the recent disclosure of life insurance companies being made by a committee of the New York legislature.

The president has in course his annual message to the congress and as he proposes to discuss the insurance question in that message with special reference to federal legislation for the regulation of insurance, he naturally desired to confer with his close friends as to the manner in which he should treat the subject.

The conference last night continued until a late hour. No details of it are obtainable. It is known, however, that the president has been urged strongly to recommend to congress the enactment of such legislation as will give the federal government supervisory control of insurance companies.

Whereas, At the present time the attention of the public is directed to evils recently discovered in the business of life insurance to the extent that the long record of faithful handling of the funds of policy holders in the American life insurance companies is in danger of being overlooked, now, therefore, be it

Resolved, That the National Association of Life Underwriters record the fact that the funds of the policy holders in life insurance companies of America are being administered with a fidelity, integrity and ability, which recent events have but served to emphasize, and be it further

Resolved, That the best interests of the policy holders and the companies, both of which in a special sense are committed to us, the association suggest full and free publicity of all the operations of the life insurance companies as best calculated to minimize future opportunity for evil and to retain the confidence of the public in the best, and what will surely grow to be the greatest, system of organized beneficence.

Taggart Denies McCall Charge. INDIANAPOLIS, Sept. 21.—Thomas Taggart, chairman of the national democratic committee, left Indianapolis last night for New York. He would not discuss the nature of the business, but some of his friends are inclined to believe that he has been summoned to testify before the legislative committee which is investigating the insurance conditions in New York relative to the alleged contributions to the national democratic campaign fund.

NEW YORK, Sept. 21.—Chairman Taggart of the democratic national committee arrived in New York today from Indianapolis. He denied the statement made by President McCall of the New York Life before the insurance investigation committee that the democratic national committee had solicited money for the democratic party from that company.

NEW YORK, Sept. 21.—(Special Telegram.)—The ethics controlling the formation of underwriting syndicates are being extensively discussed in connection with the testimony given by the legislative investigating committee. It is the consensus of opinion among those best qualified to judge that the records of the Mutual Life show: First, that its participation in such syndicates was amply justified by financial usages throughout the civilized world; second, that the results of such participation have inured to the benefit and profit of its policy holders; third, that the occasional participation of some of the company's trustees in such syndicates was a source of proportionate profit to the company. The testimony likewise proved that the Mutual Life has never entered into any joint accounts with bankers or brokers wherein profits on purchases or sales were divided.
