rebates, and the not unprecedented specnecessary party to the offense is pro- tional comity are unlike theirs, and there that to obtain the far eastern markets nounced innocent.

PUBLICITY THE TRUE REMEDY.

The problem of the hour is the prevention of the most flagrant abuses by putlic carriers and semi-public institutions, like life insurance companies and depositories of trust funds. All the investigations that have heretofore been made in the management of railroads, express, telegraph and telephone companies that control the arteries of commerce have invariably shown that the worst abuses from which their patrons have suffered

Helty. other section of the country.

The limelight of publicity would also successful. have disclosed the extent to which the railway, telegraph and telephone companies divert their earnings toward the corruption of public officials-administrative, executive and even somtimes Judimen, state legislatures, city councils, o juries and political nominating conventions.

One of the passing wonders marking the
city road—
A tolker dying in harness, heedless of call A toiler dying in harness, heedless of call

What was the sign? A symbol to touch the tireless will?

Does He who taught in parables speak in parables still? parables still?
The seed on the rock is wasted—on heedless hearts of men.
That gather and sow and grasp and lose—labor and sleep—and then—Then for the prize!—A crowd in the street of ever-echoing tread—The toller crushed by the heavy load, there in his harness—dead!

More About the Superiority of Toric Lenses Over Flat Lenses.

The object of wearing glasses is to focus the rays of light so that they will fail directly on the retina, or mirror, in the back of the eye.

In the flat lens, at but one point, the center of the lens, do the rays of light meet the lens' surface at right angles. Hence at all other points the rays of light are imperfectly focused, or deflected and lost. Now, remember that the Toric lens

curves as the eye curves. Therefore, at every point the rays of light meet the surface of the lens at right angles. Hence the least possible deflection and loss of rays, and the focusing most perfectly of a greater number of rays on the retina.

Hence the most aid to weak eyes, the most perfect vision and the most eve comfort it is possible to receive from wearing glasses.

Next Sunday we give another point of uperiority of Toric lenses. Come in ext week and let us fit you. HUTESON OPTICAL CO.

213 South 16th Street. Factory on Premises
