### GRAIN AND PRODUCE MARKET

Big Bulls Withdraw Their Support frem the West.

December Goes Off Nearly Two Cents -Corn Also is Down and Still-

ACTION FOLLOWED BY HEAVY SLUMP

Lower Prices Are Predicted.

The withdrawal of support again this morning left the wheat market in a very unstable position and susceptible to the innuence of the domestic situation, which is anything but builts? Selling was general, both for short account and in the way of realizing by followers of the built party. The weather was good. Cables were lower. The significant feature of the foreign news was the Liverpool report of cheaper Manitoba offerings. The Canadian surplus must find an outlet abroad, which is distinctly against the probability of exports of American wheat for some time. The market was down about 2c. September closed at \$3%c. December at \$3½c and May at \$8½g55%c. In corn September and October deliveries were erratic, particularly the former. May was under pressure throughout the session. Selling was general and in the absence of speculation, effective. In view of the assurance of the safety of the largest crop on record it is improbable that the present level of values can be maintained, say some of the trade. Today September closed at \$3%c, old December at \$5c. December at \$3%c, old December at \$6c. December at \$3%c, old December at \$6c. December at \$2%c, old December at \$6c. December at \$2%c and May at \$3%c.

The current delivery of oasts was steady. September closed at \$7%c. December at \$2%c and May at \$3%c. old December at \$6c. December at \$2%c old December at \$6c. December at \$2%c. old December at \$6c. December at \$2%c. old December at \$6c. December at \$3%c. old December at \$6c. December at \$3%c. old December at \$6c. December at \$6c. December at \$6c. December at \$6c. on \$6c. of the trade. Today September closed at \$7%c. December at \$6c. on OMAHA, Sept. 30, 1965.

CHICAGO GRAIN AND PROVISIONS Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, Sept. 20.—General liquidation in the wheat pit resulted today from heavy orward movement of the new grop. In consequence the December option closed to off. Other staples showed fractional onnes, corn. 14c; oats, 14694c, and provisions 20086c.

forward movement of the new erop. In consequence the December option closed \$\overline{c}\$ of Other staples showed fractional losses, corn, \$\overline{c}\$ of oats, \$\overline{c}\$ \overline{c}\$ of Other staples showed fractional losses, corn, \$\overline{c}\$ of oats, \$\overline{c}\$ \overline{c}\$ of Other staples showed fractional losses, corn, \$\overline{c}\$ of oats, \$\overline{c}\$ \overline{c}\$ of the start the market was subjected to much selling pressure. The greatest weakness was manifested in the September option which ranged botween \$\overline{c}\$ \overline{c}\$ of the day was almost entirely favorable to the bears. Cables were lower. Receipts in the northwest were heavy and the price of cash wheat at Minneapolis was off about 20. Arrivals today at Minneapolis and Duluth were 1,115 cars against 1,03 cars ayear ago. In addition to the heavy movement in the northwest, receipts today at all primary points in the United States showed a huge increase, total arrivals being 1,700,000 busite the corresponding day a year ago. At the opening December was off \$\overline{c}\$ of \$4.56. During the first half hour the price made a further decline to \$7.50. At the opening December was off \$\overline{c}\$ to \$\overline{c}\$ of \$1.50. On the market was steadled by temporary support from a leading bull. Following subsequent withdrawal of that support the market hedeme still weaker. December dropping to \$35.62. Part of the loss was regained on covering by shorts, September delivery showing the greatest reaction. The market, however, closed weak with December at \$35.6. September closed at \$35.6. Clearances of wheat and flour were equal to \$75.00 bushels. Minneapolis, Duluth and Chicago reported receipts of 1,135 cars against 1,036 cars last week and 1,100 cars a year ago.

Considering the sharp break in wheat, the corn market held remarkably steady although prices showed slight losses. Local receipts were small but the total primary movement was 25 per cent in excess of that of the corresponding dum a rearred to \$40.00 corn. The m

### DRUIDING'S FINANCIAL REVIEW

have made arrangements with Mr. F. G. Druiding of Chicago, an expert writer on nancial topics and delineator of stock exhange probabilities, to furnish a weekly financial topics gleaned from the various

We desire, however, on the part of The Hee to disclaim all responsibility for the acurateness of any forecast Mr. Druiding may make concerning future prospects of any investment or enterprise.

All special inquiries about the present or prospective value of any particular seurity should be addressed direct to Mr. F. G. Druiding, No. 524 First National bank building, Chicago, Ill.

CHICAGO. Sept. 20.—(Special.)—Money again has shown its influence over the stock market and to such an extent that all dealing has very nearly come to a stop. Although a few stocks have continued to show dealing has very nearly come to a stop. Although a few stocks have continued to show strength stagnation exists with most of them. The expected discount rate of the Bank of England has taken place, as the directors ordered minimum figures raised from 3 per cent to 4 per cent. Careful observation, however, would lead me to believe that the rate has been discounted, because British consols remain unchanged, and home securities of the gilt-edge character remain rather steady. The slight flurry in money sorved to increase interest in the weekly bank statement, which can hardly be regarded to prove favorable.

The international and domestic money markets are really the center of all interest at this time, and trading will not reopen on a broader basis until the money market settles at a normal rate. Pessimists are of the opinion that the Bank of Germany at its next meeting will follow in the footsteps of the English bank.

Southern Pacific and Chesapeake & Ohio are practically the only two stocks which yesterday showed any strength. Rumors of an early dividend in Southern Pacific were largely responsible for the steadiness which developed. Among the August earnings Lehigh Valley shows the most favorably. The showing is a gain of \$455,000, or nearly is per cent in gross for the month; or about \$217,000, or a little over 10 per cent in the net. As much as \$100,000 was added to the surplus. At least temporarily the erratic movement of Subway shares, which had a rance of \$16 points, seems to have subsided.

Stock in Sight. Receipts of live-stock at the six principal western markets yesterday; Cattle, Hogs Sheep.

Wool Market.

the beginning of the present year. The Tonopah Mining company has paid two dividends, each of 2 cents per share. One in March and the other in July, and I believe a third is due this October. It is generally understood that this cempany will get on a 50-cent quarterly dividend basis in Pebruary, or at the rate of \$2,000,000 dividend disbursements per year.

The Montana Tonopah company and the Tonopah Extension company and the Tonopah Extension company each paid quarterly dividends of 10 cents per share last July. The second dividend will be paid next menth. The capitalization of each of these companies is \$1,000,000 and the par value of the shares is \$1 cach.

By those who are intimately acquainted with mining it is claimed that the field of Tom tab outclasses anything that has been discovered in Colerado or Newba. A few days ago I had an extended conversation with a scientific prospector, who has spent considerable time in Tonopah, Bull Frog and Goldfield districts. His views are very optomistic, but he hastened to explain that great numbers of enterprises were being started that had absolutely no foundation or hope of ultimate success.

Persons looking for investment in these famous regions should exercise the greatest caution before arriving at any anal conclusions. To offer some consolution to those speculators who have been holding Subway shares I quote a statement which was given out as official: "The decilips in the shares

clasions. To offer some consolation to those speculators who have been holding Subway shares I quote a statement which was given out as official: The decline in the shares is not due to any physical or financial irregularity. It is simply the result of selling out speculative accounts. Commission houses, when the stock reached its high level, ordered their customers who had bought on margin to either sell out or take up the stock. This started to decline. There has been some good buying on the decline, but the outsiders are not obliged to support the stock and have not been doing so. The Tunnel company has constructed is all feet of freight tunnel under the Chicago streets, and it is just beginning to realize the immense benefit from the millions of dollars spent in the work of construction. It is estimated that the Chicago teaming business amounts to \$6,000,000 a year, of which the Tunnel company expects to be doing 10 per cent by the first of the year.

I can see very little logical reason for any immediate reaction toward higher prices in the stock markets, for the reason that money rates are going to be strengthened still further both in New York and in

prices in the stock markets, for the reason that money rates are going to be strengthened still further both in New York and in Chicago, the principal cause for which may be found in the steady demand from western farmers for moving western country erops. Crops are slow in moving this year. As a matter of fact, August demand for credit money was heavier than during September and the chances are eminent that October will demand even more money. In my opinion the money devoted to the purpose of moving crops this year will be the largest that has ever been known. All things considered, it appears to me that a good buil campaign cannot be expected until after the first of the year, when the up-turn will start from much lower prices.
